The Honorable Arne Duncan
Secretary of Education
Washington, DC 20206-5120

Dear Secretary:

As the Latino population continues to grow in the United States, so does the need to educate this growing portion of the population. Executive Order 13555, Improving Educational Opportunities and Outcomes for Latino Students, states, "only 13 percent of Latinos hold a bachelor's degree, and just 4 percent have completed graduate or professional degree programs." These are statistics we cannot ignore. In order for our Nation to maintain its global competitive edge in science and technology research and innovation support for science, technology, engineering and mathematics (STEM) education must increase, especially among Latino populations. The executive order also notes that Minority Serving Institutions enroll nearly sixty percent of the nation's 4.7 million minority undergraduate students. It is imperative that the Department of Energy and other Federal agencies continue to do their part to prepare students to enter the STEM workforce. Enclosed is the Department of Energy's (DOE) Fiscal Year 2010 Annual Performance Report on Executive Agency Actions to Assist Hispanic Serving Institutions (HSIs).

The Department provided \$38.56 million in support to HSIs, an increase of \$16.86 million from Fiscal Year 2009. A large part of the increase in support to Hispanic Serving Institutions can be attributed to the American Recovery and Reinvestment Act. The Department supported a variety of programs including research and development opportunities, scholarships, internships and training. Large scale projects included \$3.15 million for the Department of Energy – Florida International University Science and Technology Workforce Development Initiative, developed by the Office of Environmental Management to create a pipeline of minority engineers specifically trained and mentored to enter the Department of Energy's workforce in technical areas of need.

We will continue to work with you to implement programs to ensure that the Nation's HSIs receive the necessary support to strengthen and enhance their ability to provide high quality educational opportunities for future scientists and engineers.

Sincerely,

PART A: EXECUTIVE SUMMARY OF AWARDS TO HSIs:
FISCAL YEAR 2010

OVERVIEW

In fiscal year 2010, the Department of Energy (DOE) provided \$38.56 million to support programs with Hispanic Serving Institutions (HSIs).

During fiscal year 2010, the Department supported a wide range of programs and activities:

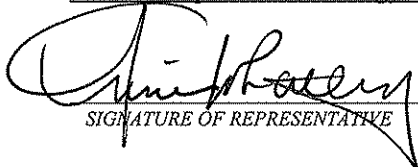

- \$7.82 million given to the University of New Mexico- Main Campus at Albuquerque for research and development.
- \$3.15 million for the Department of Energy – Florida International University Science and Technology Workforce Development Initiative developed by the Office of Environmental Management designed to create a “pipeline” of minority engineers specifically trained and mentored to enter the Department of Energy’s workforce in technical areas of need
- \$1 million to Maricopa Community College to support their 2+2+2 pipeline program that guides students from high school (the first two years) to the community college (the second two years) and then the university (the last two years). Participants are able to attend college level courses at community college campuses during the school year and in the summer.
- \$238,678 grant to Texas State Technical College to begin the only in-depth college level Wind Energy Technology Program of its kind in South Texas. In its initial phase of funding, the grant includes \$75,000 in free tuition for qualifying students who enroll in the new program.
- \$654,300 in American Recovery and Reinvestment Act funding to the University of Puerto Rico- Mayagüez for various research and development projects including High Energy Physics.
