Re: <u>FREEDOM OF INFORMATION ACT REQUEST (RESPONSE DEADLINE 20 WORKING DAYS):</u> Records Regarding a proposed Carbon Capture and Sequestration Project at Black Mesa

Dear Mr. Giove and DOE FOIA Officer:

On behalf of Black Mesa Water Coalition, Diné C.A.R.E., San Juan Citizens Alliance, Grand Canyon Trust and the Sierra Club the undersigned attorney(s) hereby submit this Freedom of Information Act ("FOIA") request pursuant to the requirements of 5 U.S.C. §552(a).

Under the provisions of FOIA we hereby request all documents in the possession, custody, or control of the U.S. Department of Energy ("DOE") and created or obtained after January 1, 2007 regarding a proposed Carbon Sequestration Project in Northern Arizona and specifically within the Black Mesa Basin that meet the following description:

(1) Any and all records of communication between the DOE and Peabody Energy and/or Peabody Western Coal Company;
(2) Any and all records of communication between the DOE and Salt River Project;
(3) Any and all records of communication between the DOE and Tucson Electric Power;
(4) Any and all records of communication between the DOE and Tri-State Generation and Commission;

(5) Any and all records of communication between the DOE and the Hopi Indian Tribe;
(6) Any and all records of communication between the DOE and the Navajo Nation;
(7) Any and all records of communication between DOE and the Office of Surface Mining Control and Enforcement;
(8) Any and all records of communication between DOE and the Bureau of Indian Affairs; and,
(9) Any and all applications or requests for Federal funding.

The term "communication" as used herein is to be given the broadest possible definition and should include, but not limited, to external and internal communications, memorandums, surveys, notes, reports, studies, emails, or portions thereof

This FOIA request is directed to you as the persons likely to have control or access to the requested documents. In order to conserve paper resources, electronic copies of the records are preferred where possible – ensuring that the electronic copies are exact and complete electronic copies of the agency record. But please provide the records in the format which is most expeditious.

Additionally, we request that all charges (*e.g.* copying and search charges) be waived, pursuant to 5 U.S.C. § 552(a)(4)(A)(iii). The requested information is not sought for commercial purposes, and disclosure of information regarding projects on Black Mesa is in the public interest. We are non-profit organizations, with over 600,000 members nationwide. We seek the documents: (1) to ensure that the permit application complies with all applicable laws and regulations; and, (2) to inform its members and the public of the potentially serious environmental consequences, through our websites and special reports. Under these circumstances, we are entitled to a fee waiver. *See Carney v. Department of Justice*, 19 F.3d 807 (2d Cir. 1994)(requester's right to fee waiver turns on subject matter of requests and ability of requester to disseminate information); *Larson v. CIA*, 843 F.2d 1481 (D.C. Cir. 1988)(fee waiver is proper where information is not sought for commercial purposes, and where disclosure would contribute significantly to understanding of government operations or activities).

In addition, our record speaks to the public interest utility of disclosure. As but one example, and based on information obtained in previous FOIA requests, public interest organizations published *Drawdown*, which has substantially advanced the public's understanding of hydrology on the Black Mesa complex.[1] In addition, information obtained in previous FOIA requests contributed significantly to the pertinence and value of our comments on other permit applications on Black Mesa. Moreover, this most recent request focuses on information relevant to the latest governmental operations and activities on Black Mesa-- specifically SRP's proposal to obtain public funding to drill a 9,000-foot hole would be drilled into a geological formation on Black Mesa where excess carbon from power production could be stored.

We look forward to your expedited response within twenty (20) days. If a response is not received within twenty (20) working days, this request will be deemed denied. If you have any

[1] See David Beckman, et. al., Drawdown: Groundwater Mining on Black Mesa (Oct. 2000) (www.nrdc.org/water/conservation/draw/drawinx.asp) (an NRDC-published report describing the impact of coal mining on Black Mesa's water supply).

comments or questions regarding this request, please do not hesitate to contact me directly at (970) 247-9334 or brad.bartlett@frontier.net.

Respectfully submitted,

/s Brad A. Bartlett
