Proposed Action Title: Texas A&M University -- Direct CO2 Electroreduction to a Single C2+ Product

Program or Field Office: Advanced Research Projects Agency - Energy

Location(s) (City/County/State): Boston, Massachusetts; College Station, Texas

Proposed Action Description:

Funding will support the project team's small-scale research and development of a carbon dioxide (CO2) conversion process specifically targeting the direct coupling of methanol on a class of two-dimensional nanomaterials composed of layers of transition metal nitrides (MNene) surfaces to produce a single C2+ product (i.e., ethanol, ethylene, ethane, acetic acid, or acetaldehyde). Specifically, the project team will (1) conduct electrochemical experiments to identify successful methods for creating C2+ products; (2) test and validate MNenes and CO2 conversion processes to meet performance standards; and (3) develop a predictive tool to rank MNenes for use in product formation. If successful, this project will enable a process of direct CO2 conversion into a usable chemical product, contributing to U.S. energy resilience and security.

Project activities will be conducted at existing facilities at Texas A&M University (College Station, TX) and Northeastern University (Boston, MA), designed for the applicable activities. Project tasks fit within the class of actions identified under the DOE Categorical Exclusions identified below. This assessment was based on a review of the proposed scope of work and the potential environmental impacts of the project. The project team has certified that project tasks will be conducted in accordance with established safety and materials/waste management protocols and pursuant to applicable Federal, State, and local regulatory requirements. No modifications will be made to the existing facilities to accommodate the proposed work.

Categorical Exclusion(s) Applied:

A9 - Information gathering, analysis, and dissemination

B3.6 - Small-scale research and development, laboratory operations, and pilot projects

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

✔ The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

✔ There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

✔ The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.
