SUMMARY

The Office of Oil and Gas Global Security and Supply, Division of Natural Gas Regulatory Activities prepares quarterly reports on natural gas import and export activities. Companies are required, as a condition of their authorizations, to file monthly reports. This Natural Gas Import and Export Report is for the third quarter of 2014 (July through September).

Sections 1 and 2 contain quarterly summary charts and tables. Section 3 contains the detailed transactions of all imports and exports. The data in Section 3 is organized by activity: long-term imports, long-term exports, short-term imports, and short-term exports. Section 4 lists revisions made to data published previously. There is a table of contents for your convenience.

Please note that some of the charts in the "Graphical Summaries and Comparisons" section have been reformatted. Also, this quarterly report is the first to record CNG imports, although they have occurred since May 2013. We received retroactive reports for truck movements of CNG into the United States at Houlton, Maine. Tables 1o and 1p now focus on CNG imports by truck, and subsequent tables have been renumbered.

We have continued the "InFocus" segment, which analyzes topics of special interest related to natural gas imports and exports and appears directory after this Summary. The third quarter 2014 InFocus further examines trends in natural gas pipeline imports and exports, focusing on the details of a third quarter increase in exports to Mexico.

Third Quarter 2014 Highlights

Imports totaled 633.6 Bcf and exports totaled 362.6 Bcf, resulting in net imports of 271.1 Bcf. As usual, most of the imports came from Canada, comprising 97.8 percent of the total. LNG imports made up nearly all the remainder, 2.1 percent of total imports. Imports from Mexico totaled 0.4 Bcf for the quarter, a negligible fraction of imports.

The majority of exports went to Mexico, making up 55.1 percent of the total. Exports to Canada comprised 42.5 percent, and the remaining 2.4 percent were domestic LNG exports by vessel. There were no LNG re-exports in the quarter.

Third Quarter 2014 vs. Second Quarter 2014 - Highlights

As illustrated in the following tables, total imports increased just 0.3 percent compared to last quarter. A 0.6 percent increase in Canadian pipeline imports was offset by a 3.4 percent decrease in Mexican pipeline imports and a 12.8 percent decrease in LNG imports. Furthermore, the average price of imports decreased by 14.0 percent. This was due to double-digit percentage decreases in prices of pipeline imports from Canada and Mexico, as well as in prices of LNG imports.

Total exports were up by 1.9 percent from the second quarter. This increase was due to an 8.5 percent increase in Mexican pipeline exports and a 352.9 percent increase in LNG exports (to 8.5 Bcf), and despite a 9.2 percent drop in Canadian pipeline exports. There were no LNG re-exports again this quarter. Export prices generally decreased, with Canadian pipeline export prices decreasing by 16.0 percent compared to last quarter, pipeline export prices to Mexico declining by 9.9 percent, and total trucked exports prices (for LNG and CNG) increasing 20.3 percent. Prices of LNG exported by vessel increased by 0.8 percent.

Third Quarter 2014 vs. Third Quarter 2013 – Highlights

Total imports were down 14.0 percent from the third quarter of 2013, with decreases across the board. Mexican pipeline imports dropped 27.8 percent (from a very small base), pipeline imports from Canada were down 11.7 percent, and imports of LNG by vessel were down by 59.4 percent. The average pipeline import price increased by 25.7 percent and LNG import prices rose by 26.3 percent.

Total exports decreased from the third quarter of 2013, by 4.9 percent. Pipeline exports to Canada decreased by 24.6 percent and Mexican pipeline exports increased by 13.0 percent. Total trucked exports increased by 38.1 percent, though by less than 0.02 Bcf in total. There was a rise in pipeline export and trucked export prices of 10.3 percent and 12.8 percent, respectively, compared to the third quarter of 2013.

Imports and Exports of LNG by Vessel

Imports of LNG by vessel decreased 12.8 percent compared to last quarter and 59.4 percent compared to the third quarter of 2013. Six cargos of LNG were imported by vessel this quarter, compared to six cargos last quarter and 13 cargos in the third quarter of 2013. Prices of LNG imported by vessel were down 10.9 percent from last quarter and up by 26.3 percent from the third quarter of 2013.

The U.S. exported three cargos of domestically-produced LNG (8.5 Bcf) to Japan in the third quarter.

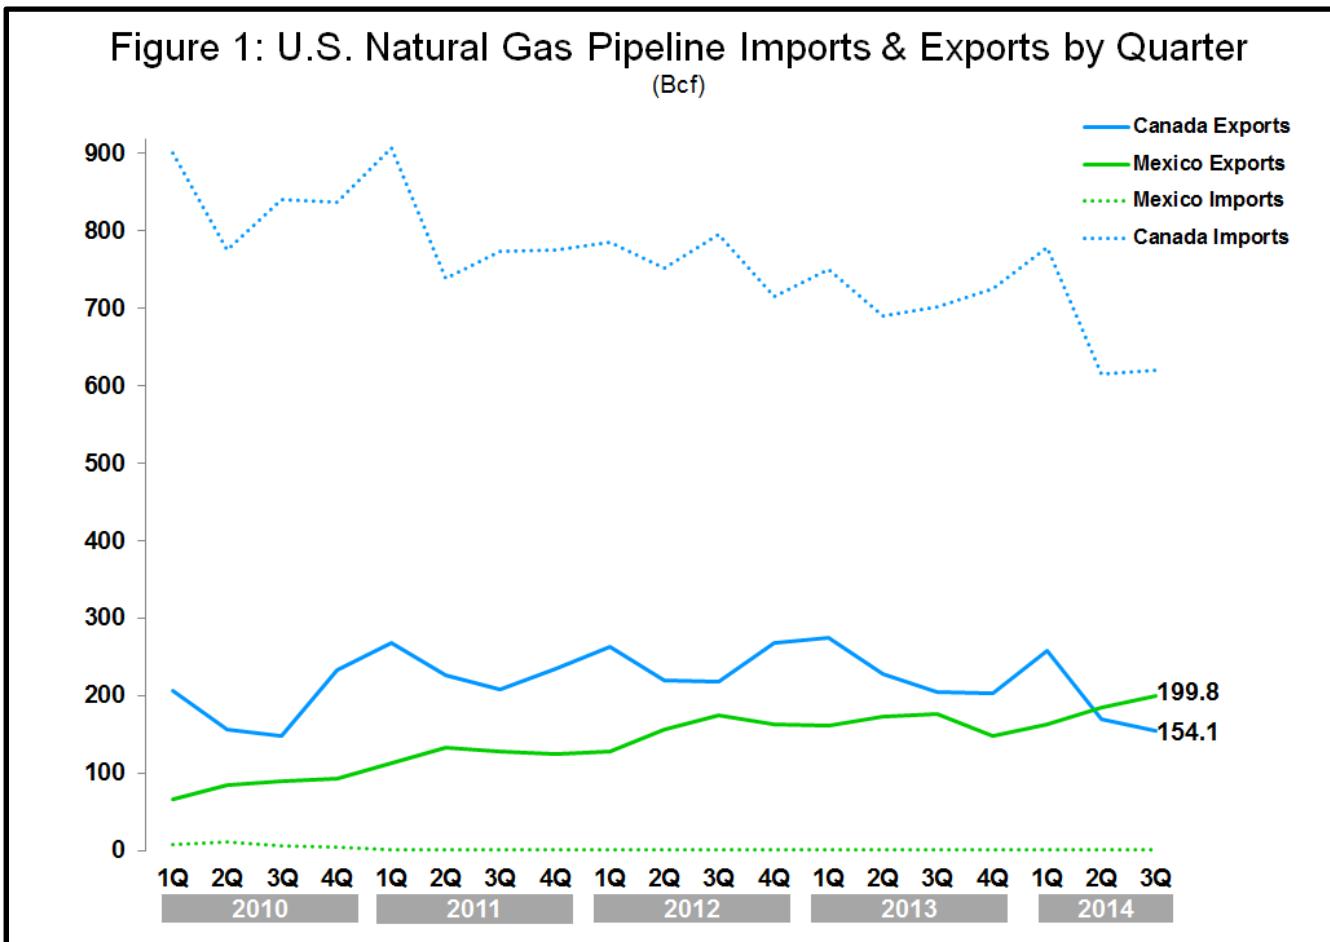

Please note that the data in this Report is subject to revision. Revisions occur when companies file late or corrected data after the Report has been published. The Quarterly Report is available on the Fossil Energy Web Site at <http://energy.gov/node/601551>. We welcome questions or comments about this Report; they can be emailed to us at ngreports@hq.doe.gov.

InFocus

Trends in Natural Gas Pipeline Imports and Exports: In-Depth Look at Exports to Mexico

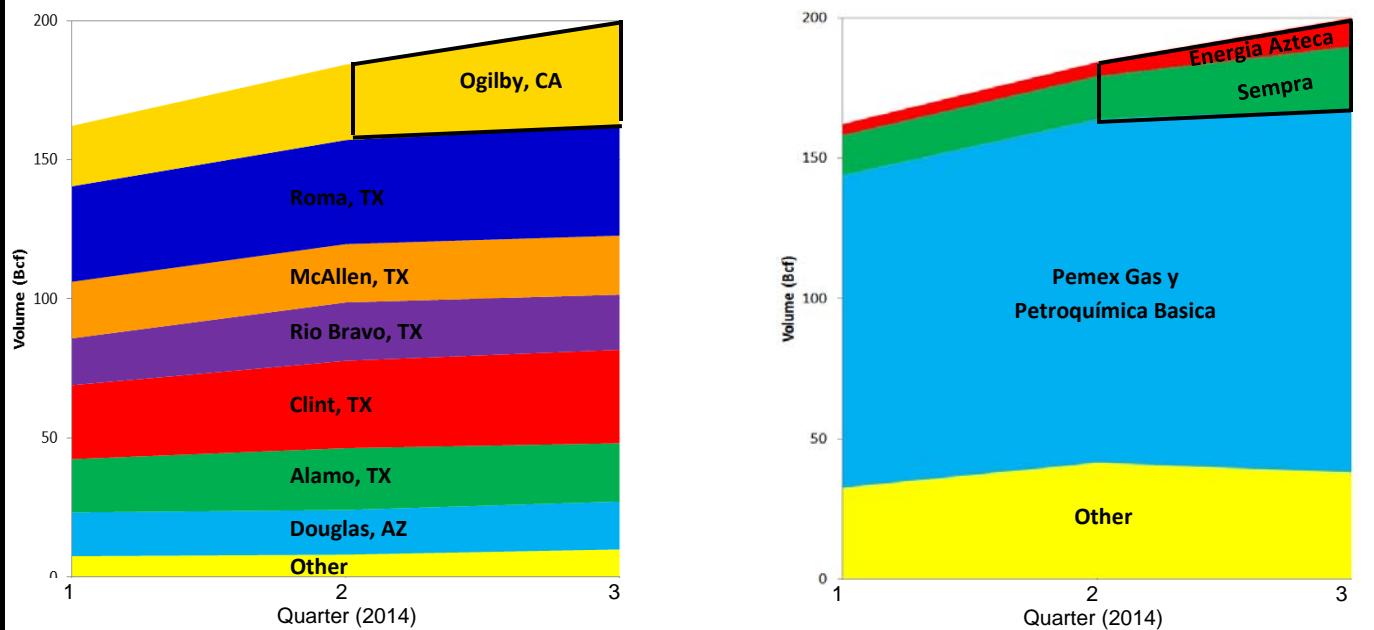

Last quarter, InFocus addressed the recent rise in exports of natural gas to Mexico by pipeline. The third quarter 2014 edition examines this continuing trend in more detail. During the second quarter, exports to Mexico exceeded exports to Canada for the first time in several years, a milestone highlighting the upward trend in exports to Mexico. During the third quarter, Mexican exports increased further and widened the gap with Canadian exports, reaching a new monthly record in July with a total of 69.4 Bcf. Analysis of the export data shows that two companies moving natural gas through a single export point were responsible for most of the recent increase.

Figure 1 illustrates the increasing trend in pipeline exports to Mexico. The third quarter saw these exports increase to 199.8 Bcf, from 184.2 Bcf in the second quarter. In the third quarter, Mexico exports were 46.0 Bcf higher than exports to Canada, a tripling of the 14.2 Bcf gap in the second quarter.

The chart on the left side of **Figure 2** shows exports to Mexico in each quarter of 2014, broken down by export point. The increase from the first quarter to the second was broad-based. Most points experienced increases and five points showing significant upswings. As the figure shows, however, fully two-thirds of the increase from the second quarter to the third moved through Ogilby, California. A few other points registered increases on the order of one or two Bcf, and a few showed a slight increase. Six points experienced modest decreases in traffic. Of the 15.7 Bcf net increase in exports to Mexico from the second quarter to the third, 10.5 Bcf transited Ogilby.

Figure 2: Exports to Mexico, by Point of Exit and Company

The chart on the right side of **Figure 2** further breaks down export movements through Ogilby, revealing that two companies were responsible for most of the third-quarter increase. Sempra LNG International's (Sempra) movements increased 7.4 Bcf from the second quarter to the third, and Energia Azteca X, S. de R.I. de C.V. (Energia Azteca) shipped 5.0 Bcf more to Mexico in the third quarter. Three other companies using Ogilby collectively registered a decline of 1.9 Bcf. Larger volumes served growing Mexican fuel requirements for electricity production. Sempra states that its increase in exports at Ogilby was due to increased demand from power generation customers. Energia Azteca has a long-term export authorization specifying that its purpose is to provide natural gas to a power plant near Mexicali, Mexico.

Historically higher during the winter months, natural gas exports to Canada may increase above volumes sent to Mexico in months following the third quarter, as preliminary fourth quarter data indicates. However, recent increases in exports to Mexico have been dynamic and will bear watching for future developments.

Quarter in Review 3rd Quarter 2014			
	Volume (Bcf)	Volume (Bcf/d)	Avg. Price (\$/MMBtu)
IMPORTS			
Pipeline Imports:			
Canada	619.6	6.73	\$3.86
Mexico	0.4	0.00	\$3.08
Total Pipeline Imports	620.0	6.74	\$3.86
Trucked Imports:			
Canada	0.1	0.00	\$5.89
Total LNG Imports by Truck	0.1	0.00	\$5.89
LNG Imports by Vessel:			
Trinidad & Tobago	10.7	0.12	\$10.48
Yemen	2.9	0.03	\$5.37
Total LNG Imports by Vessel	13.6	0.15	\$9.40
TOTAL IMPORTS	633.6	6.89	\$3.98
EXPORTS			
Pipeline Exports:			
Canada	154.1	1.68	\$4.03
Mexico	199.8	2.17	\$4.34
Total Pipeline Exports	354.0	3.85	\$4.21
Trucked Exports:			
Canada	0.0	0.00	\$10.47
Mexico	0.0	0.00	\$11.53
Total Trucked Exports	0.1	0.00	\$11.01
Domestic LNG Exports	8.5	0.09	\$15.78
LNG Re-Exports	-	-	-
Total LNG Exports by Vessel	8.5	0.09	\$15.78
TOTAL EXPORTS	362.6	3.94	\$4.48
LNG Imports to Puerto Rico	16.5	0.18	\$11.65

Notes

- Very small volumes shown as zero due to rounding.
- Trucked Exports to Canada include CNG by Truck (11,906 Mcf) and LNG by Truck (20,231 Mcf).
- Trucked Imports from Canada are CNG.
- Trucked Exports to Mexico are entirely LNG by Truck (33,180 Mcf).
- Natural gas pipeline import and export prices are the prices at the U.S. border.
- LNG import prices are landed prices.
- Domestically produced LNG export prices are delivered prices.
- LNG re-exports are exports of foreign-sourced LNG that was previously imported into the U.S. These prices are FOB prices.
- LNG Imports to Puerto Rico come from Trinidad (10.6 Bcf), Nigeria (2.9 Bcf), Norway (2.8 Bcf), and Undetermined Sources (2.8 Bcf)
- LNG imports to Puerto Rico are shown separately in this table and elsewhere in this report, for informational purposes only. Please note that these imports are not reflected in any U.S. totals because U.S. totals only reflect activity involving one or more of the 50 states or the District of Columbia.

LNG Exports by Vessel	13.1		-		100.0%	
TOTAL EXPORTS	1,141.3	\$5.65	1,218.9	\$4.00	-6.4%	41.2%
LNG Imports to Puerto Rico	45.6	\$10.49	38.5	\$9.57	18.5%	9.7%

Notes

- For 2014, Canadian Trucked Exports include both LNG by Truck (76,914 Mcf) and CNG by Truck (164,909 Mcf).
- For 2013, Canadian Trucked Exports include both LNG by Truck (53,835 Mcf) and CNG by Truck (61,668 Mcf).
- For 2014, Canadian Trucked Imports are entirely CNG.
- For 2013, Canadian Trucked Imports include both LNG by Truck (367,000 Mcf) and CNG by Truck (123,761 Mcf).
- Natural gas pipeline import and export prices are the prices at the U.S. border.
- LNG import prices are landed prices.
- Domestically produced LNG export prices are delivered prices.
- LNG re-exports are exports of foreign-sourced LNG that was previously imported into the U.S. These are FOB prices.

Notes

- In the 3rd Quarter of 2014 LNG was exported by truck to Mexico by Applied LNG Technologies, L.L.C., through Nogales, Arizona and Otay Mesa, California.
- In the 3rd Quarter of 2014 LNG was exported by truck to Canada by Prometheus Energy Group though Sweetgrass, Montana and by ENN Canada Corporation through Port Huron, Michigan.

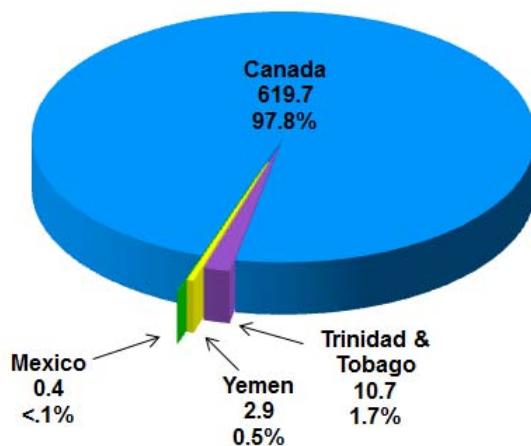

Graphical Summaries and Comparisons

Quarter in Review
&
Comparisons with Other Quarters

Natural Gas Imports, 3Q 2014

Total Imports – 633.6 Bcf

Natural Gas Imports, 3Q 2014
(Bcf)

Avg. Import Price, 3Q 2014
(\$/MMBtu)

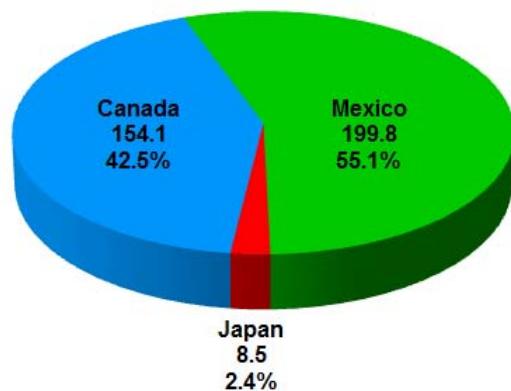

- In the third quarter of 2014, the U.S. imported 633.6 Bcf of natural gas.
- A large majority of imports originated from Canada, continuing a long-term trend. Trinidad & Tobago was the next-largest supplier, providing 1.7% of imports.
- The remaining volume was supplied by 2 other countries – Yemen and Mexico.
- Import prices averaged in the range of \$3.08 per MMBtu (for a very small amount from Mexico) to \$10.48 per MMBtu for LNG from Trinidad, during the quarter.

Natural Gas Exports, 3Q 2014

Total Imports – 362.6 Bcf

Natural Gas Exports, 3Q 2014
(Bcf)

Avg. Export Price, 3Q 2014
(\$/MMBtu)

Notes:

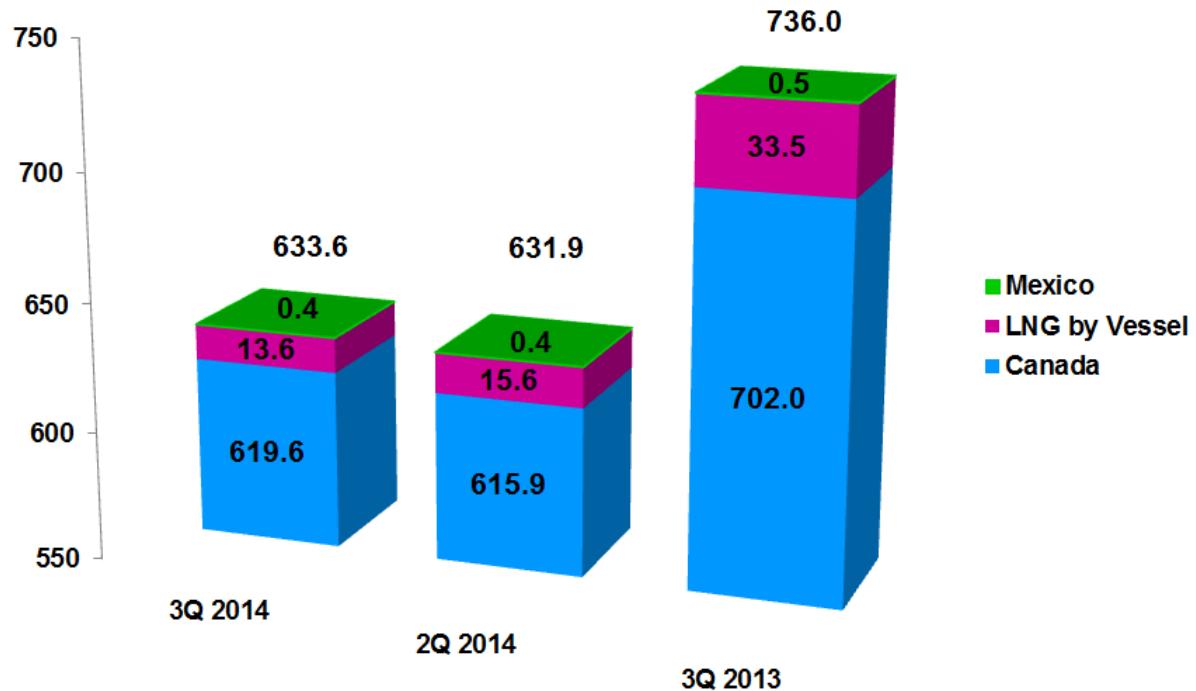

Canada and Mexico prices are at the U.S. border.

Japan price is a delivered price.

The Data on foreign-sourced LNG re-exported from the U.S. is not included here but can be found in Table 2e.

- 55.1% of U.S. exports of domestically-produced natural gas during the second quarter were sent to Mexico, while 42.5% was sent to Canada.
- U.S exports of domestically-produced liquified natural gas by vessel to Japan contributed 2.4% of total U.S. natural gas exports during the third quarter.
- Prices of exports to Japan were substantially higher than other exports, at \$15.78 per MMBtu. Mexico prices were slightly higher than the exports to Canada, with the average price of exports to Mexico at \$4.34 per MMBtu and the average price to Canada at \$4.03 per MMBtu.

Comparison of 3Q Imports with Previous Quarters (Bcf)

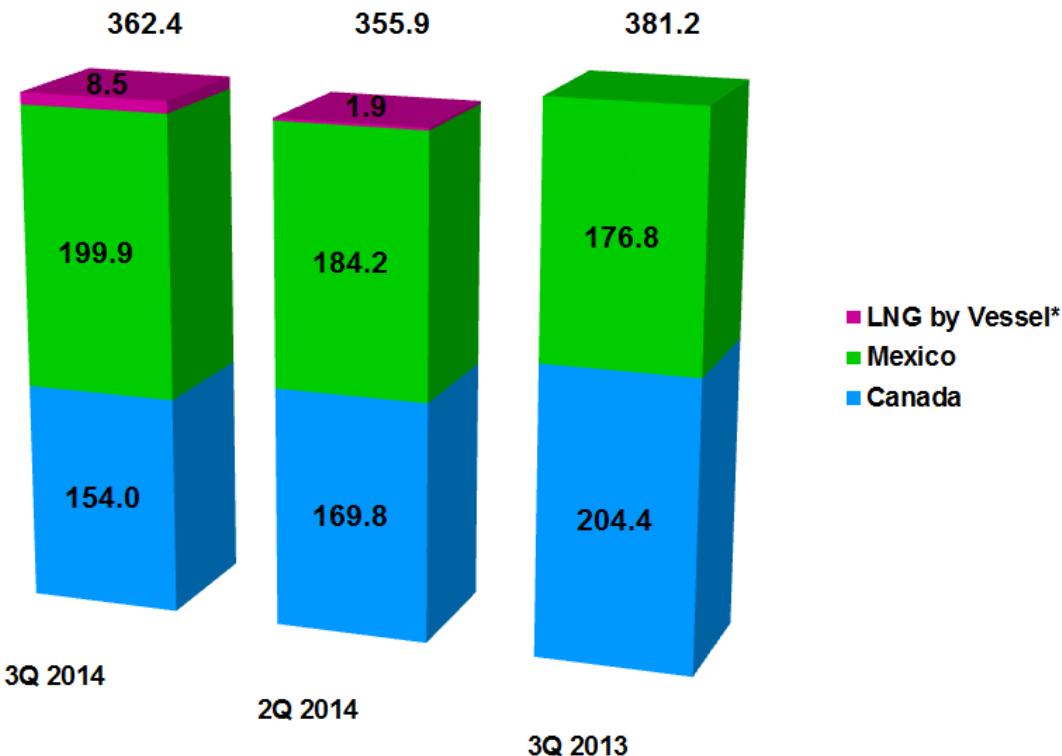

*Data on foreign-sourced LNG re-exported from the U.S. is not included here but can be found in Table 2e

- The total volume of third quarter imports was about the same as the second quarter, but lower than the third quarter of last year.
- The decrease in imports relative to the third quarter of last year is primarily due to a 12% reduction in imports from Canada, though on a percentage basis LNG by vessel imports fell more (59%) relative to the third quarter of last year. Imports from Mexico remained at a very low level.

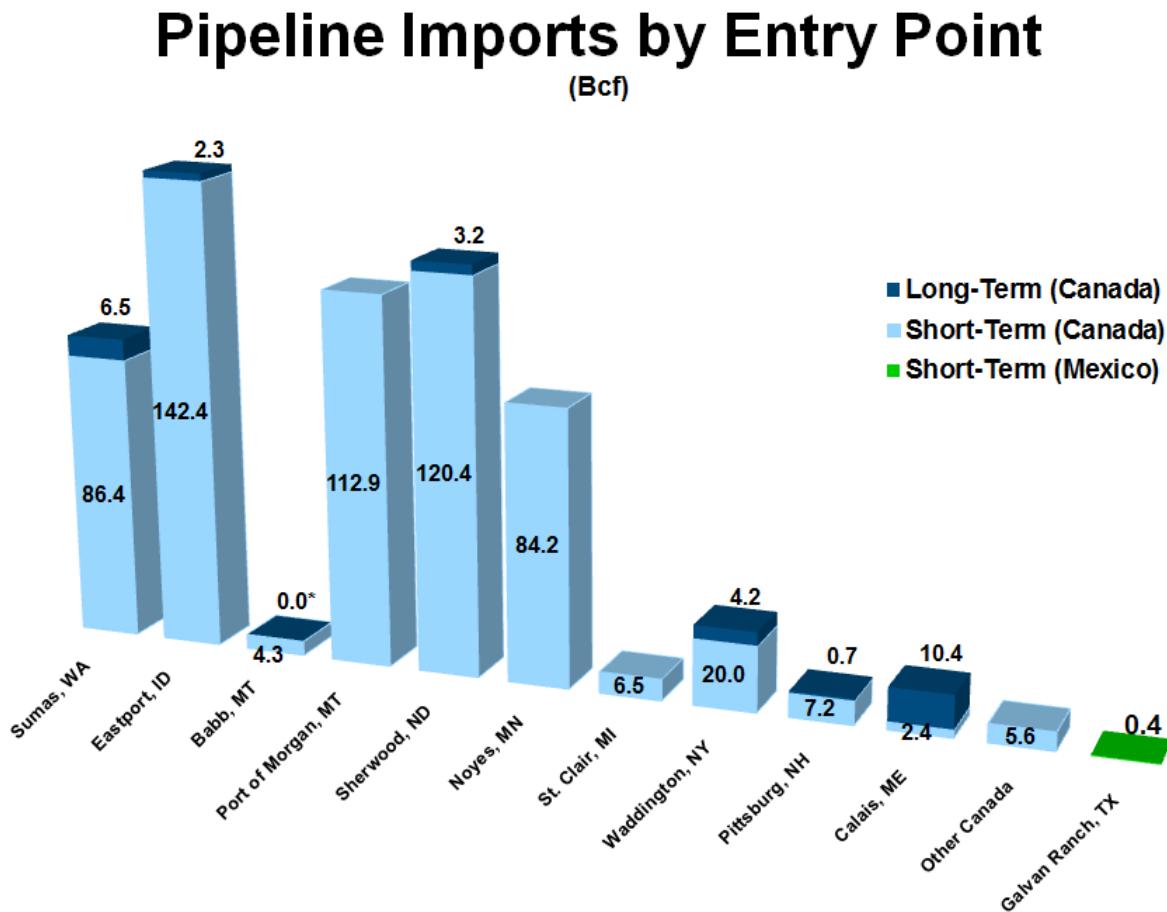

Comparison of 3Q Exports with Previous Quarters

(Bcf)

*Data on foreign-sourced LNG re-exported from the U.S. is not included here but can be found in Table 2e

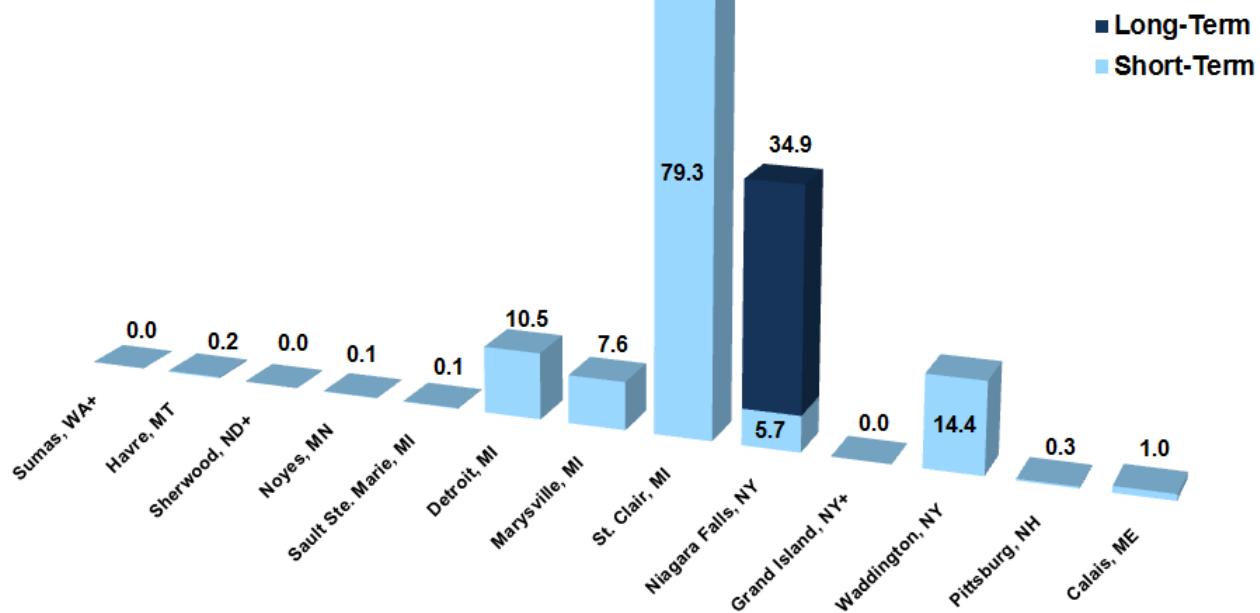

- Export volumes overall were within 5% of the second quarter and the third quarter of 2013.
- Exports to Canada were lower than in the second quarter of 2014 and the third quarter of 2013.
- Exports to Mexico, however, were higher in the third quarter than both the previous quarter and the second quarter of 2013, indicative of growth in exports to Mexico.
- U.S. exports of domestically-produced liquified natural gas by vessel rose to 8.5 Bcf in the third quarter, from 1.9 Bcf in the second quarter.

*Very small Long-Term volume shown as zero due to rounding.

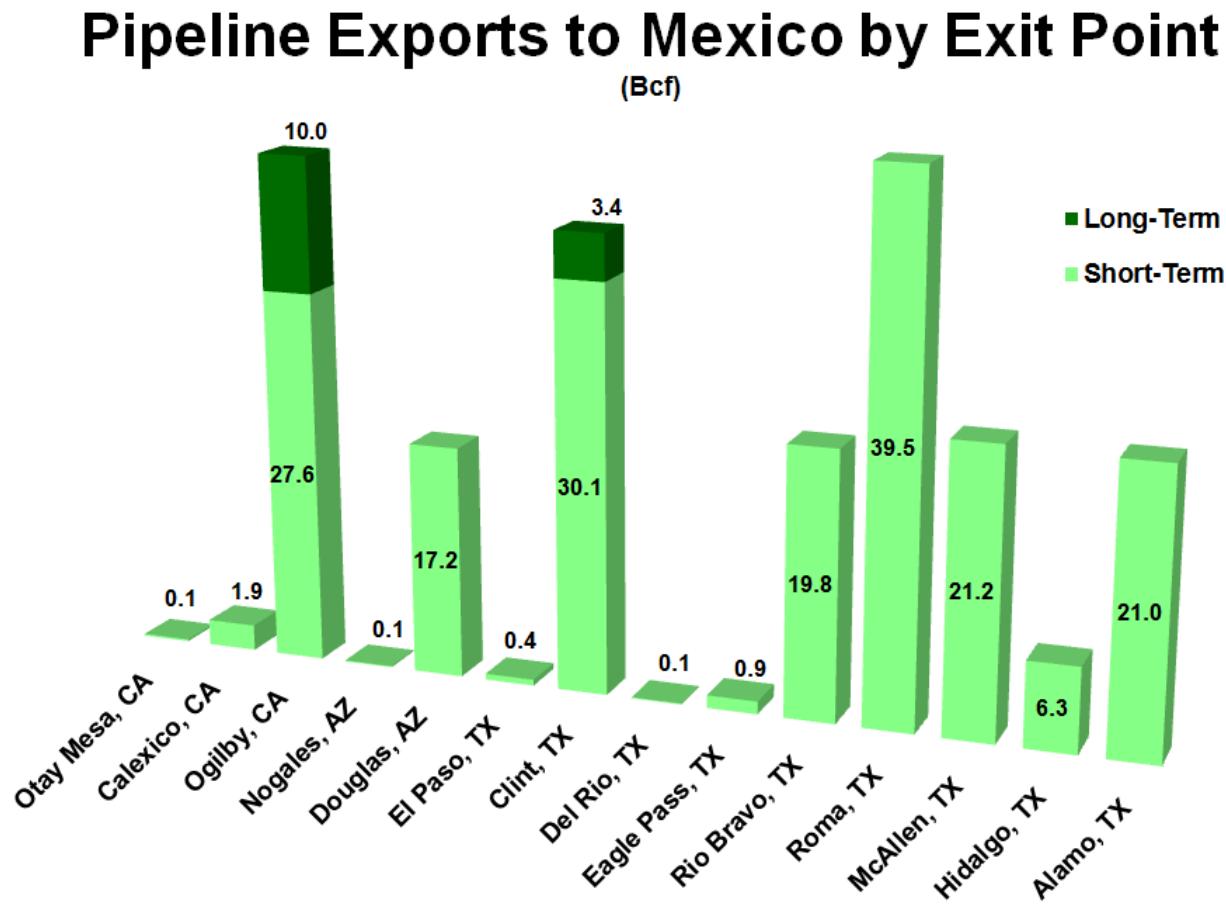

- Volumes of natural gas imported under short-term authorizations continued to eclipse volumes imported under long-term authorizations at all entry points, with the exception of Calais, Maine.
- Eastport, Idaho experienced the highest volume of imports from Canada, at 23% of the total. Sherwood, North Dakota and Port of Morgan, Montana had the second and third largest import volumes, accounting for 20% and 18% of the total respectively. These three points handled over 60% of all imports from Canada during the third quarter.
- Continuing a trend of diminished imports from Mexico in recent years, only a small volume of natural gas was brought into the country from Mexico, through only one entry point, during the third quarter.

Pipeline Exports to Canada by Exit Point (Bcf)

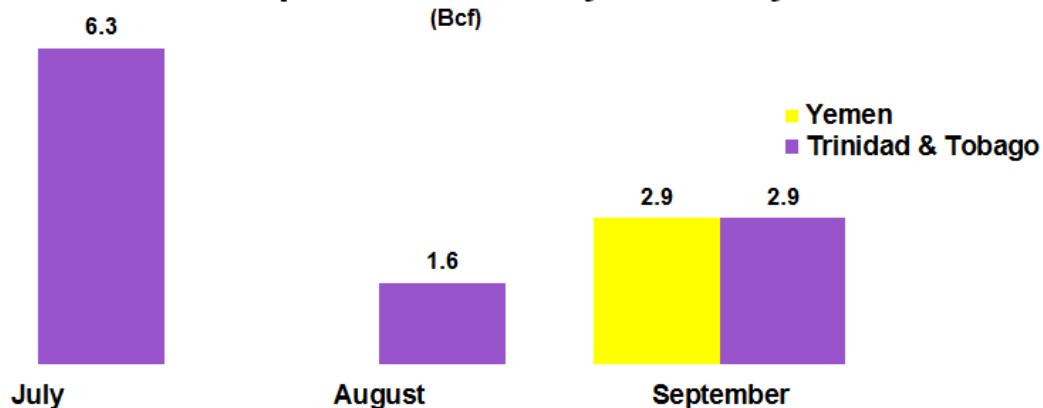

*Very small Long-Term volume shown as zero due to rounding.

- The decrease in exports to Canada occurred primarily in St. Clair, Michigan, which had over two-thirds of total Canadian exports in the second quarter but now accounts for just over half.

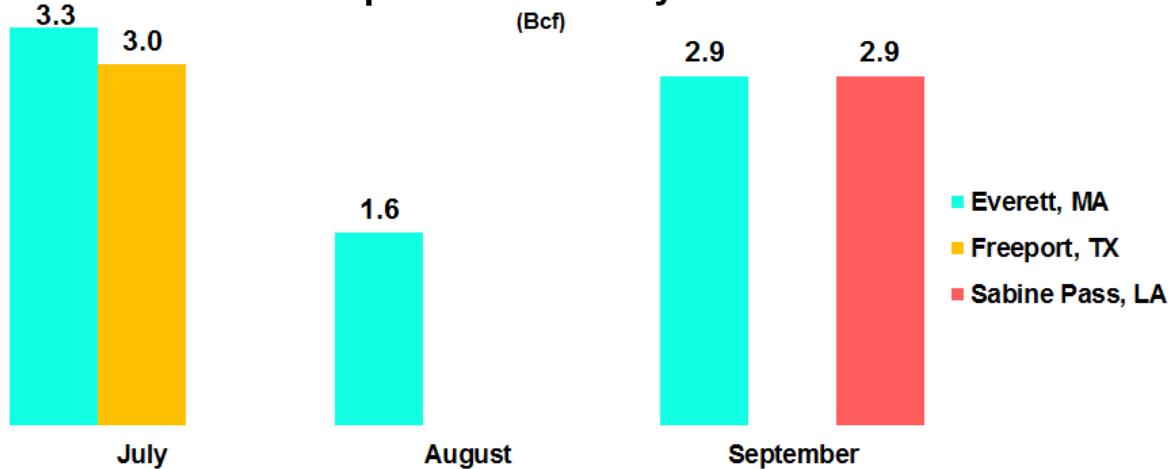

- The United States continued to export natural gas to Mexico through a large number of exit points during the second quarter. Seven points (Ogilby, California; Douglas, Arizona; Clint, Texas; Rio Bravo, Texas; Roma, Texas; McAllen, Texas; and Alamo, Texas) accounted for 95% of total Mexican exports.
- The other seven points used during the quarter handled much smaller volumes.

LNG Import Volume by Country

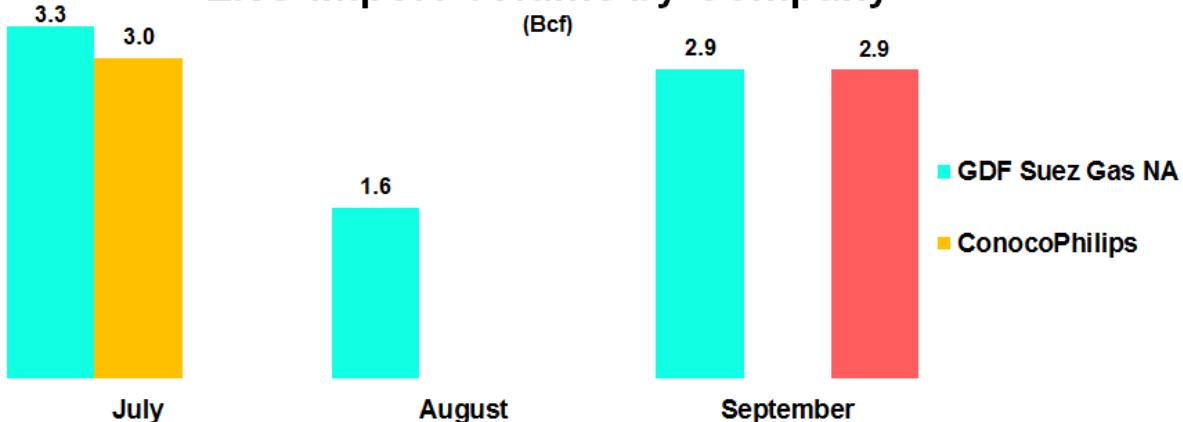

- Trinidad & Tobago was the main supplier of LNG to the U.S. in the second quarter. A smaller volume arrived from Yemen.

LNG Import Volume by Terminal

- Only three of the eleven operating U.S. LNG receiving terminals were active during the second quarter.

LNG Import Volume by Company

- Three importers were active during the second quarter.
- GDF Suez was the largest importer, accounting for over half of LNG imports during the quarter.

Revisions

Revisions

Revisions
<p>Transactions listed here show changes from data published in the <i>Natural Gas Imports and Exports Second Quarter Report 2014</i>. Revisions usually occur when importers/exporters file late or corrected data after the Report has been published. Specific reasons for revisions are provided for each transaction listed below. Depending on the time period for revised data, Quarterly Reports prior to the 1st Quarter 2014 may also be affected. Revisions may affect transaction-level data as well as total volumes and average prices that were previously published.</p>
