#### Cheyenne Substation KV2A 115-kV Tie Line Installation Laramie County, Wyoming

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (Western) proposes to implement Phase II of the construction of the Cheyenne Substation Expansion initiated in 2009. The work will be done under the Cheyenne Substation, Stage 04, Project which includes the addition of a 115-kV connecting tie line necessary to connect the 115-kV side of a new transformer in the 230-kV substation yard to the 115-kV yard. The substation yards are within 290 feet of each other and the line would require the installation of two new pole structures outside of each substation fence. The substations are surrounded by suburban residential areas. The unfenced area has been previously disturbed in a number of locations on the planned tie line route with heavy road access and grading of the surface area.

# **B.** <u>Number and Title of the Categorical Exclusion Being Applied</u>: (See text in 10 CFR Part 1021, Subpart D.)

**B4.6.** Additions or modifications to electric power transmission facilities within a previously disturbed or developed facility area. Covered activities include, but are not limited to, switchyard rock-grounding upgrades, secondary containment projects, paving projects, seismic upgrading, tower modifications, load-shaping projects (such as the installation and use of flywheels and battery arrays), changing insulators, and replacement of poles, circuit breakers, conductors, transformers, and crossarms.

# C. <u>Regulatory Requirements in 10 CFR 1021.410 (b)</u>: (See full text in regulation and attached checklist.)

1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; and
- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to, those listed in paragraph B. (4) (see Attachment A).

#### Cheyenne Substation KV2A 115-kV Tie Line Installation Laramie County, Wyoming

- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

#### D. Special Stipulations Pertaining to the Proposal:

If the scope of work of this project changes, Western's Environmental Division must be contacted for additional environmental review.

This Categorical Exclusion is valid for the 2013 field season after the signature date. If construction has not commenced within that time, Western's Environmental Division must be contacted for an updated environmental review prior to construction.

If any cultural materials are discovered during construction, work in the area shall halt immediately, Western's Regional Preservation Officer shall be contacted, and the material evaluated by an archaeologist or historian meeting the Secretary of the Interior's Professional Qualification Standards (48 FR 22716, Sept. 1983).

E. <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

bley, fr. Signature

Date: 7/2/13

Gene Iley, Jr. NEPA Compliance Officer Rocky Mountain Customer Service Region Western Area Power Administration

## ATTACHMENT A

### Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal

Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in		X	
appendix B to subpart D.			
(b)(2) There are no extraordinary circumstances related to the		X	
proposal that may affect the significance of the environmental			
effects of the proposal, including, but not limited to, scientific			
controversy about the environmental effects of the proposal;			
uncertain effects or effects involving unique or unknown risks;			
and unresolved conflicts concerning alternate uses of available			
resources.		X	·····
(b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur		•	Í
when a proposal is broken down into small parts in order to			
avoid the appearance of significance of the total action. The			
scope of a proposal must include the consideration of connected			
and cumulative actions, that is, the proposal is not connected to			
other actions with potentially significant impacts (40 CFR			
1508.25(a)(1)), is not related to other actions with individually			
insignificant but cumulatively significant impacts (40 CFR			
1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or			
§ 1021.211 of this part concerning limitations on actions during			
EIS preparation.			
B. Conditions that are Integral Elements of the Classes of	NO	YES	Unknown
Actions in Appendix B.			
(1) Threaten a violation of applicable statutory, regulatory, or	X		
permit requirements for environment, safety and health, or			
similar requirements of DOE or Executive Orders;			
(2) Require siting and construction or major expansion of waste	Х		
storage, disposal, recovery, or treatment facilities (including			
incinerators), but the proposal may include categorically			
excluded waste storage, disposal, recovery, or treatment		[	ĺ
actions or facilities;	v		
(3) Disturb hazardous substances, pollutants, contaminants, or	Х		
CERCLA-excluded petroleum and natural gas products that		1	
preexist in the environment such that there would be			
uncontrolled or unpermitted releases; (4) Have the potential to cause significant impacts on	X		
environmentally sensitive resources. An environmentally	Λ	}	
sensitive resource is typically a resource that has been			
identified as needing protection through Executive Order,			
recontined as needing protocion unough should to older,

statue, or regulation by Federal, State, or local government,		
or a federally recognized Indian tribe. An action may be		
categorically excluded if, although sensitive resources are		
present, the action would not have the potential to cause		
significant impacts on those resources (such as construction		
of a building with its foundation well above a sole-source		
aquifer or upland surface soil removal on a site that has		
wetlands). Environmentally sensitive resources include, but		
are not limited to:	} }	
(i) Property (such as sites, buildings, structures, and	X	
objects) of historic, archaeological, or architectural		
significance designated by a Federal, State, or local		
government, or property determined to be eligible for	Í	
listing on the National Register of Historic Places;	V	
(ii) Federally-listed threatened or endangered species or	X	
their habitat (including critical habitat) or federally		
proposed or candidate species or their habitat		
(Endangered Species Act); state-listed or state-proposed		
endangered or threatened species or their habitat;		
Federally-protected marine mammals and Essential Fish		
Habitat (Marine Mammal Protection Act; Magnuson-		
Stevens Fishery Conservation and Management Act);		
and otherwise federally-protected species (such as under		
the Bald and Golden Eagle Protection Act or the		
Migratory Bird Treaty Act);		
(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4,	X	
<ul> <li>— Compliance with Floodplain and Wetland</li> </ul>		
Environmental Review Requirements: "Definitions," or		
its successor);		
(iv) Areas having a special designation such as federally-	X	
and state-designated wilderness areas, national parks,		
national monuments, national natural landmarks, wild		
and scenic rivers, state and Federal wildlife refuges,		
scenic areas (such as National Scenic and Historic Trails		
or National Scenic Areas), and marine sanctuaries;		
(v) Prime or unique farmland, or other farmland of	X	
statewide or local importance, as defined at 7 CFR		
658.2(a), — Farmland Protection Policy Act:		
Definitions, or its successor;	}	
(vi) Special sources of water (such as sole-source aquifers,	X	
wellhead protection areas, and other water sources that		
are vital in a region); and	ļ	
(vii) Tundra, coral reefs, or rain forests; or	X	

### Cheyenne Substation KV2A 115-kV Tie Line Installation Laramie County, Wyoming

(5) Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive	X	
species, unless the proposed activity would be contained or		
confined in a manner designed and operated to prevent		
unauthorized release into the environment and conducted in		
accordance with applicable requirements, such as those of		
the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.
