# **State of Kansas**ENERGY SECTOR RISK PROFILE

#### **Kansas State Facts**

((P))

POPULATION

2.91 M

HOUSING UNITS
1.28 M

BUSINESS
ESTABLISHMENTS
0.07 M

**ENERGY EMPLOYMENT:** 48,696 jobs

**PUBLIC UTILITY COMMISSION:** Kansas Corporation Commission

**STATE ENERGY OFFICE:** Kansas Energy Office

**EMERGENCY MANAGEMENT AGENCY:** Kansas Division of

**Emergency Management** 

AVERAGE ELECTRICITY TARIFF: 10.72 cents/kWh

**ENERGY EXPENDITURES:** \$3,841/capita

**ENERGY CONSUMPTION PER CAPITA:** 369 MMBtu (16th highest out of 50 states and Washington, D.C.)

**GDP:** \$168.3 billion

Data from 2020 or most recent year available. For more information, see the Data Sources document.

#### **ANNUAL ENERGY CONSUMPTION**

**ELECTRIC POWER: 42,040 GWh** 

COAL: 13,300 MSTN
NATURAL GAS: 271 Bcf

MOTOR GASOLINE: 38,000 Mbbl DISTILLATE FUEL: 27,300 Mbbl

#### **ANNUAL ENERGY PRODUCTION**

**ELECTRIC POWER GENERATION:** 168 plants, 50.9 TWh,

12.3 GW total capacity

Coal: 5 plants, 17.3 TWh, 4.9 GW total capacity
Hydro: 1 plant, 0.0 TWh, 0.0 GW total capacity
Natural Gas: 61 plants, 3.0 TWh, 4.2 GW total capacity
Nuclear: 1 plant, 9.2 TWh, 1.3 GW total capacity
Petroleum: 55 plants, 0.1 TWh, 0.6 GW total capacity
Wind & Solar: 42 plants, 21.1 TWh, 6.2 GW total capacity
Other sources: 3 plants, 0.1 TWh, 0.0 GW total capacity

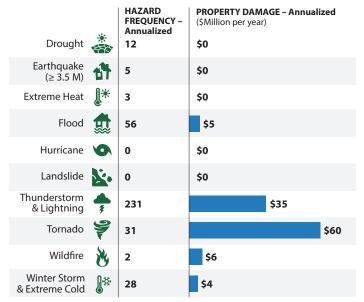

**COAL:** 0 MSTN

NATURAL GAS: 180 Bcf CRUDE OIL: 33,200 Mbbl ETHANOL: 12,100 Mbbl Data from EIA (2018, 2019). This State Energy Risk Profile examines the relative magnitude of the risks that the state of Kansas's energy infrastructure routinely encounters in comparison with the probable impacts. Natural and man-made hazards with the potential to cause disruption of the energy infrastructure are identified. Certain natural and adversarial threats, such as cybersecurity, electromagnetic pulse, geomagnetic disturbance, pandemics, or impacts caused by infrastructure interdependencies, are ill-suited to location-based probabilistic risk assessment as they may not adhere to geographic boundaries, have limited occurrence, or have limited historic data. Cybersecurity and other threats not included in these profiles are ever present and should be included in state energy security planning. A complete list of data sources and national level comparisons can be found in the Data Sources document.

#### **Kansas Risks and Hazards Overview**

- The natural hazard that caused the greatest overall property loss between 2009 and 2019 was **Tornadoes** at \$60 million per year (4th leading cause nationwide at \$2 billion per year).
- Kansas had 267 Major Disaster Declarations, 33 Emergency Declarations, and 14 Fire Management Assistance Declarations for 16 events between 2013 and 2019.
- Kansas registered 1% greater Heating Degree Days and 2% greater Cooling Degree Days than average in 2019.
- There is 1 Fusion Center located in Topeka.

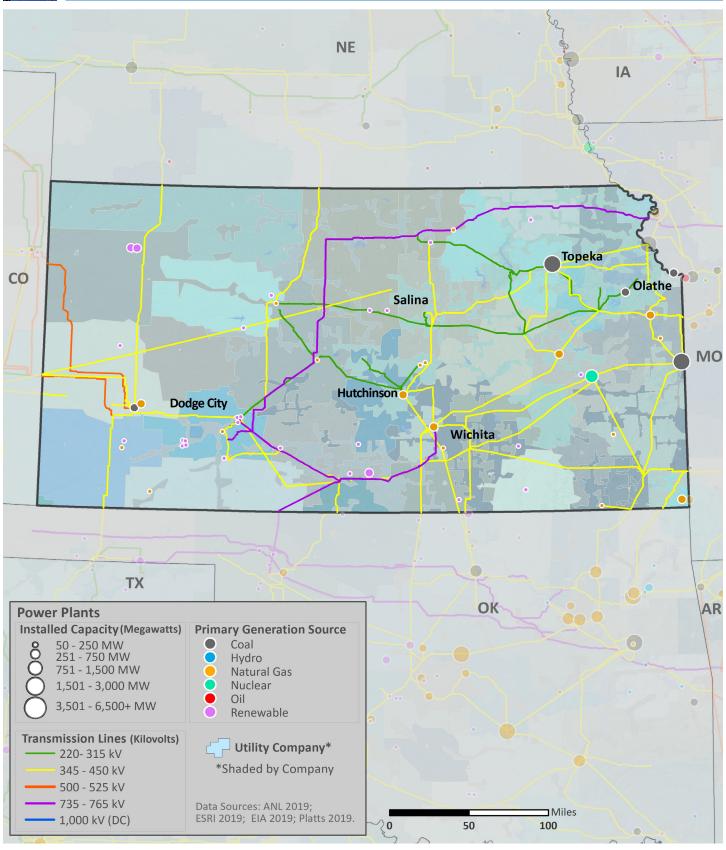

#### Annualized Frequency of and Property Damage Due to Natural Hazards, 2009–2019

Data Sources: NOAA and USGS

# **ELECTRIC**

#### **Electric Infrastructure**

- Kansas has 146 electric utilities:
  - 2 Investor owned
  - 29 Cooperative
  - 113 Municipal
  - 2 Other utilities
- Plant retirements scheduled by 2025: None.

# 1.1 service interruptions that lasted an average of 2.6 hours.

- In Kansas, between 2008 and 2017:
  - The greatest number of electric outages occurred in June (2nd for outages nationwide)
  - The leading cause of electric outages was Weather or Falling Trees (leading cause nationwide)

• In 2018, the average Kansas electric customer experienced

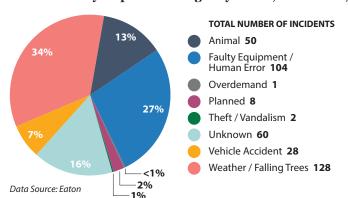

- Electric outages affected 79,094 customers on average

#### Electric Customers and Consumption by Sector, 2018

		CUSTOMERS	CONSUMPTION
Residential	<u> </u>	83%	34%
Commercial		15%	38%
Industrial	<u>-</u>	2%	28%
Transportation	<b>7</b>	<1%	<1%

#### Electric Utility-Reported Outages by Cause, 2008-2017

#### Electric Utility Outage Data, 2008-2017

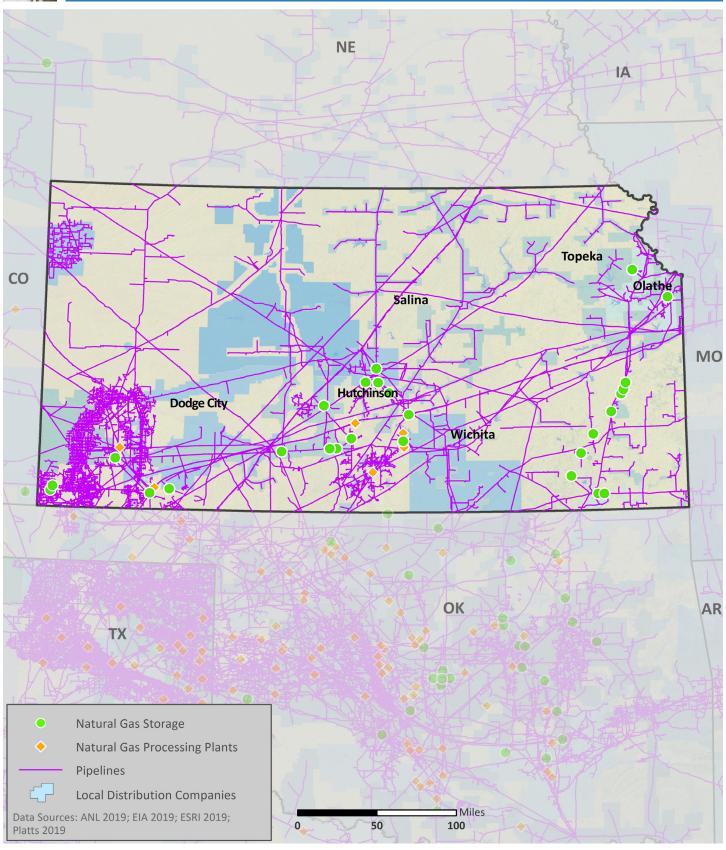

Note: This chart uses a logarithmic scale to display a very wide range of values. Data Source: Eaton

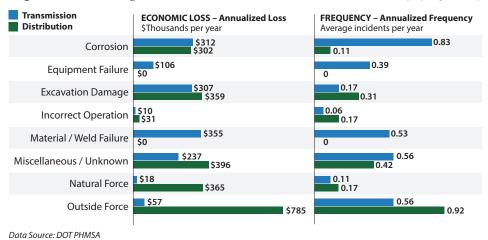

# NATURAL GAS

## **Natural Gas Transport**

Top Events Affecting Natural Gas Transmission and Distribution, 1984-2019

- As of 2018, Kansas had:
  - 13,721 miles of natural gas transmission pipelines
  - 23,038 miles of natural gas distribution pipelines
- 71% of Kansas's natural gas transmission system and 13% of the distribution system were constructed prior to 1970 or in an unknown year.
- Between 1984 and 2019, Kansas's natural gas supply was most impacted by:
  - Material Failures when transported by transmission pipelines (leading cause nationwide at \$28.43M per year)
  - Outside Forces when transported by distribution pipelines (leading cause nationwide at \$76.59M per year)

## **Natural Gas Processing and Liquefied Natural Gas**

Natural Gas Customers and Consumption by Sector, 2018

Residential <b>1</b>	â	CUSTOMERS 90%	CONSUMPTION 25%
Commercial		9%	15%
Industrial <b>i</b>	#	<1%	50%
Transportation	3	<1%	<1%
Electric Power	<b>8</b>	<1%	10%
Other		<1%	<1%

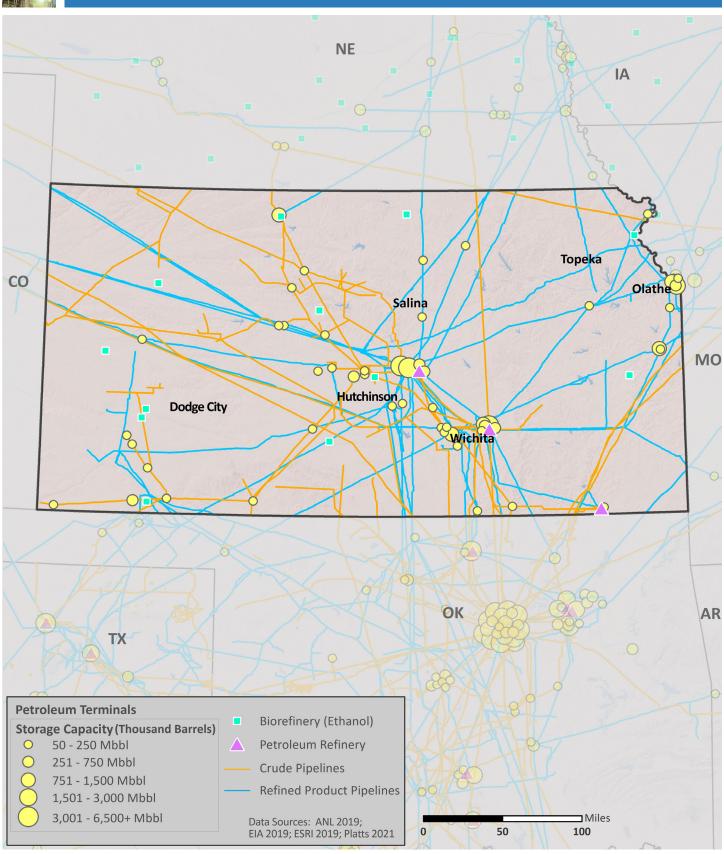

- Kansas has 6 natural gas processing facilities with a total capacity of 1,211 MMcf/d.
- Kansas has o liquefied natural gas (LNG) facilities.

Data Source: EIA

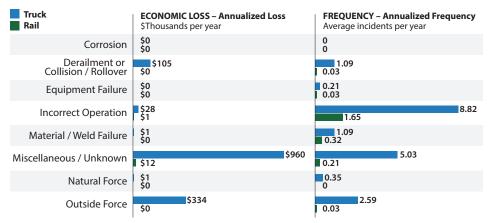

# **PETROLEUM**

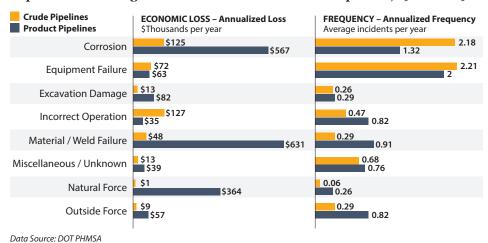

## **Petroleum Transport**

#### Top Events Affecting Petroleum Transport by Truck and Rail, 1986-2019

Data Source: DOT PHMSA

#### Top Events Affecting Crude Oil and Refined Product Pipelines, 1986-2019

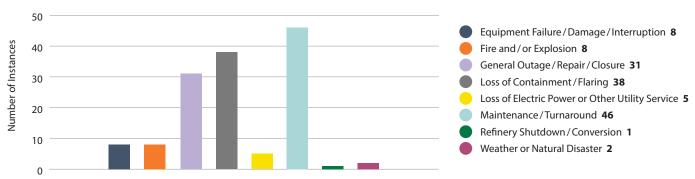

- As of 2018, Kansas had:
  - 3,729 miles of crude oil pipelines
  - 3,431 miles of refined product pipelines
  - o miles of biofuels pipelines
- 51% of Kansas's petroleum pipeline systems were constructed prior to 1970 or in an unknown year.
- Between 1986 and 2019, Kansas's petroleum supply was most impacted by:
  - Miscellaneous or Unknown events when transported by truck (3rd leading cause nationwide at \$52.87M per year)
  - Miscellaneous or Unknown events when transported by rail (3rd leading cause nationwide at \$6.11M per year)
  - Incorrect Operations when transported by crude pipelines (6th leading cause nationwide at \$4.23M per year)
  - Material Failures when transported by product pipelines (4th leading cause nationwide at \$9.47M per year)
- Disruptions in other states may impact supply.

## **Petroleum Refineries**

- Kansas has 3 petroleum refineries with a total operable capacity of 393.7 Mb/d.
- Between 2009 and 2019, the leading cause of petroleum refinery disruptions in Kansas was:
  - **Maintenance** (2nd leading cause nationwide)

### Causes and Frequency of Petroleum Refinery Disruptions, 2009 – 2019
