Subject: RE: Strom, Inc DOE/FE Docket No. 14-56-LNG
Date: Friday, July 30, 2021 5:32:00 PM

Dear Mr. Luke,

As noted below, on October 17, 2019, Strom submitted a request to DOE to amend Order No. 3537 to have the term begin on the earlier of the date of first export or 10 years from the date the authorization is issued (i.e., October 21, 2024). DOE has made attempts to inquire about the details of this request and to determine if it is still needed, but has not received a response from Strom. Please confirm if the request is needed by responding to this email. If we do not receive a response by August 30, 2021, DOE will deem the extension request withdrawn, without prejudice to Strom refiling at another time (10 C.F.R. §§ 590.203, 590.204).

Please be aware that, even if the extension request is withdrawn, Order No. 3537 will remain in effect. We can certainly discuss any questions you may have, please let me know if that would be helpful.

Regards,
Jennifer

Importance: High

Hello,

I hope this email finds you well. I am following up again on the DOE authorization for Strom, Inc. Please respond to this email to let me know if you are still considering the extension request submitted in 2019 and when we will receive the semi-annual report due on April 1, 2021. Details of the request and the semi-annual report requirement are below. Please feel free to contact me with any questions or to discuss.

Thank you,
Jennifer

Subject: Strom, Inc DOE/FE Docket No. 14-56-LNG

Hello,

I am the new Director for the Division of Natural Gas Regulation within the Office of Fossil Energy at the Department of Energy. We were reviewing the docket for Strom, Inc. Docket No. 14-56-LNG and found that on October 17, 2019, a request was submitted to DOE to amend Order No. 3537 which grants Strom, Inc. authority to export liquefied natural gas to any country with which the United States has, or in the future enters into, a free trade agreement (FTA) requiring national treatment for trade in natural gas for a 25-year term. The request was to amend Ordering Paragraph A, to have the term begin on the earlier of the date of first export or 10 years from the date the authorization is issued (October 21, 2024) instead of beginning on the earlier of the date of first export or 5 years from the date the authorization is issued (October 21, 2019). I understand that you may have been communicating with Ben Nussdorf on the details of this request. Unfortunately Ben no longer works at DOE, so I wanted to check if this is still a valid request or if it was intended to be withdrawn and closed out. Please understand that the authorization for Strom, Inc is still in effect, the current statement in Ordering Paragraph A just means that the 25-year term has started. Is this request still valid and needed? If so, are there any changes to the request or to any of the information regarding the facility in the original order? Please provide any updates to the request or to the background of the Applicant so that this request can be processed formally. If Strom, Inc no longer needs this extension, please send an email to fergas@hq.doe.gov withdrawing the request from October 17, 2019 and we will update the docket.

In addition, the semi-annual report for Strom, Inc was due on April 1, 2021. Ordering Paragraph G states:

Strom shall file with the Office of Oil and Gas Global Security and Supply, on a semi-annual basis, written reports describing the progress of the proposed Project. The reports shall be filed on or by April 1 and October 1 of each year, and shall include information on the progress of the proposed Project, the date the facility is expected to be operational, and the status of the long-term contracts associated with the long-term export of LNG and any long-term supply contracts.

The semi-annual report should be e-mailed to: fergas@hq.doe.gov.

If you have any questions concerning the extension request or the semi-annual report, please

contact me by phone or email. I look forward to hearing from you.

Thank you,
Jennifer
