

United States Department of Energy

Federal Project Director of the Year for 2012

Presented to

Mr. Hannibal Joma

For demonstrating exceptional leadership and project management acumen as Federal Project Director (FPD) for the \$60 million Linac Coherent Light Source Ultrafast Science Instruments (LUSI) Project at the SLAC National Accelerator Laboratory. The LUSI Project provides three state-of-the-art ultrafast hard X-ray instruments and experimental end-stations. As LUSI's FPD since 2007, Hannibal led the integrated project team in proactively removing barriers, resolving unanticipated problems, and executing innovative solutions resulting in successful project delivery – every instrument exceeded its threshold key performance parameters. Working closely with the LUSI user community, overcoming project funding issues, and executing a phased commissioning plan enabled the start of early science. Hannibal and his team's exceptional performance resulted in the delivery of the LUSI Project ahead of schedule and under budget.

Daniel B. Poneman
Acting Secretary of Energy
