Subject: Request to be Listed as an Intervenor - Northern Pass Transmission, LLC

Dear Mr. Lawrence,

I respectfully request "Intervenor Status" relative to the Northern Pass Transmission, LLC. I have been an active member of the Northern Pass Opposition since learning of this proposal in January, 2011. I feel that this partnership, formed by Northeast Utilities and Hydro Quebec, should bury the transmission lines using today's technology, i.e. HVDC Light Technology. Northern Pass executives, however, remain unwavering in their intent to use the cheapest method possible to complete their project by erecting 85 to 135 foot steel towers 180 miles through the heart of New Hampshire. It is imperative that we protect the beauty of the White Mountain National Forest, protect property values, and protect the health of our children.

Thank you for accepting my request to intervene.

My contact information is as follows:

Lee Ann Moulder
37 Birch Lane
Holderness, NH 03245
