# Commercial Building Energy Asset Score

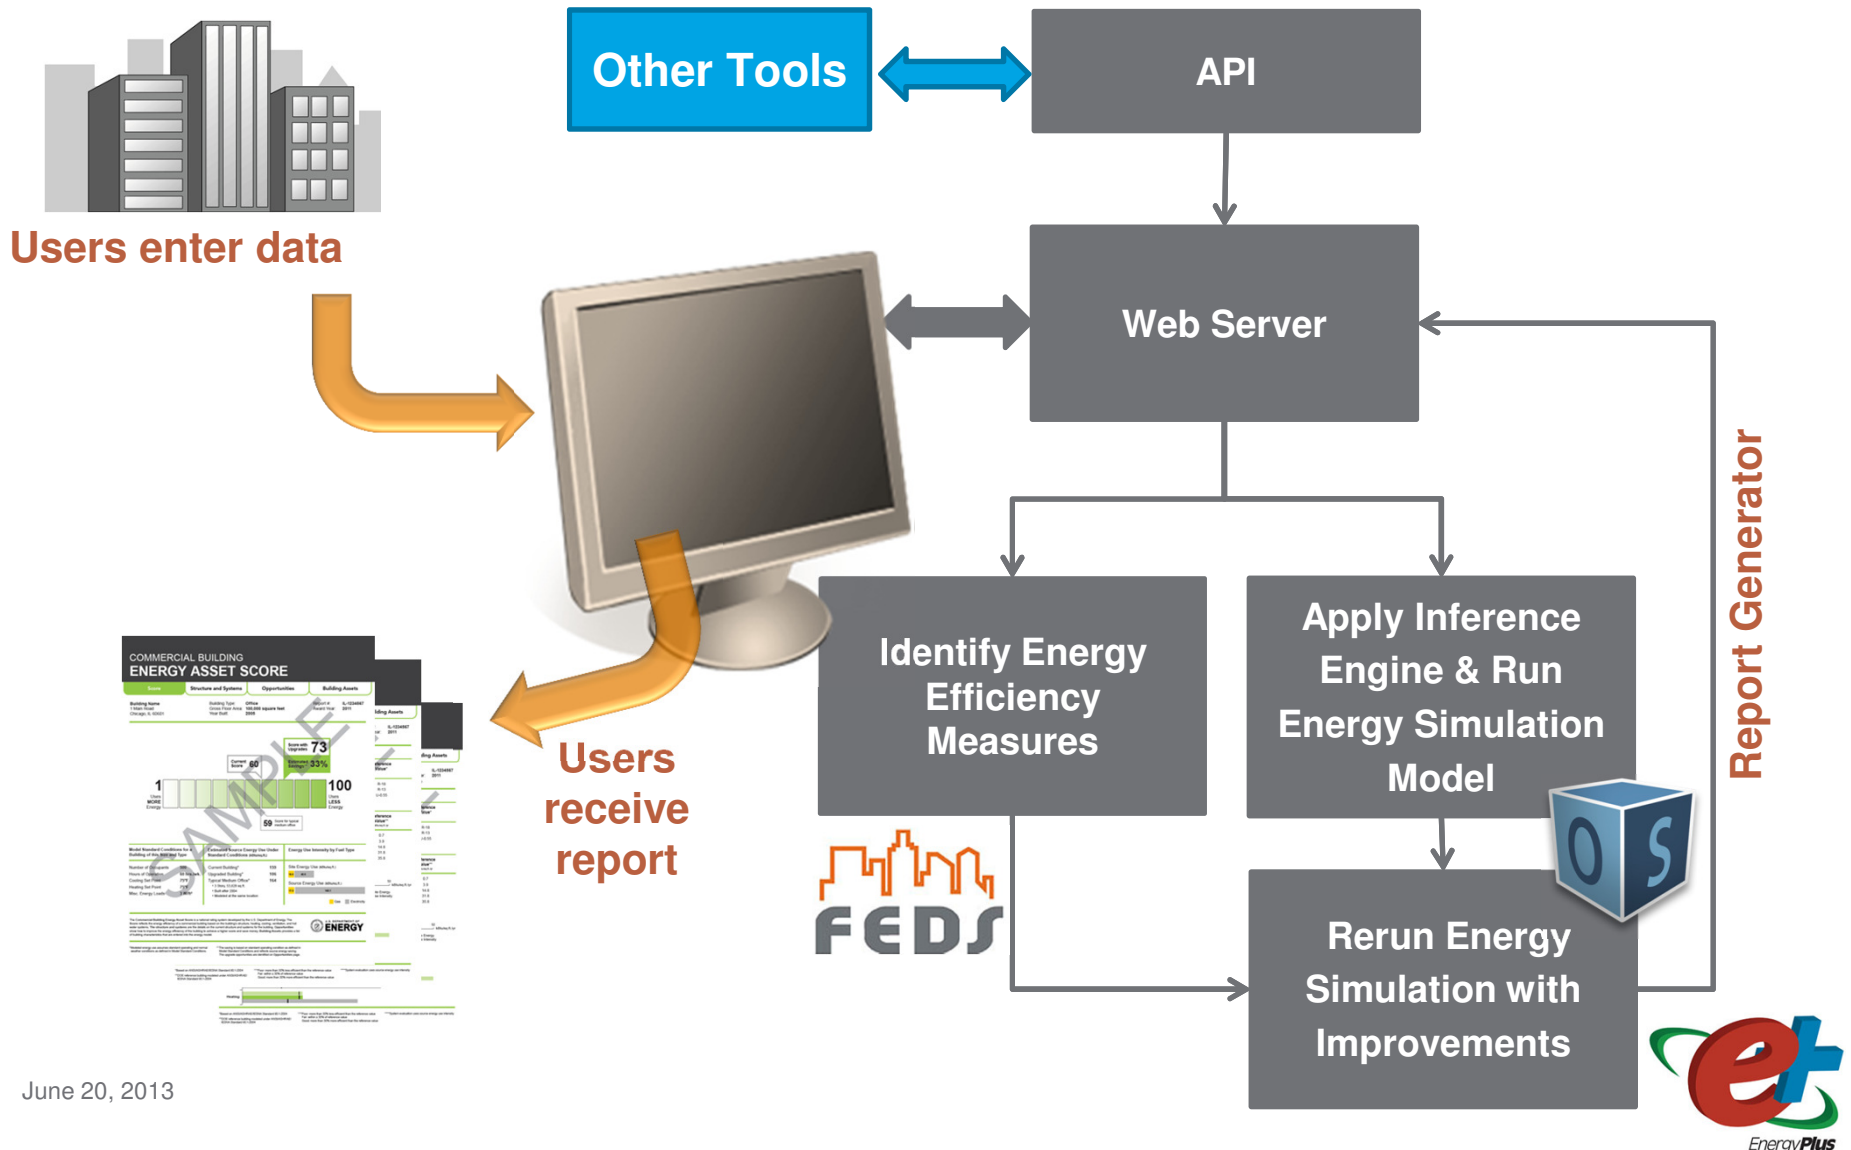

- ▶ Energy asset score evaluates the as-built physical characteristics of a building and its overall energy efficiency, independent of occupancy and operational choices.
- ▶ The physical characteristics include
  - Building envelope (window, wall, roof)
  - HVAC systems (heating, cooling, air distribution)
  - Lighting system (luminaire and lighting control systems)
  - Service hot water system
  - Other major energy-using equipment (e.g. commercial refrigerator, commercial kitchen appliances, etc.)

## Energy Asset Score

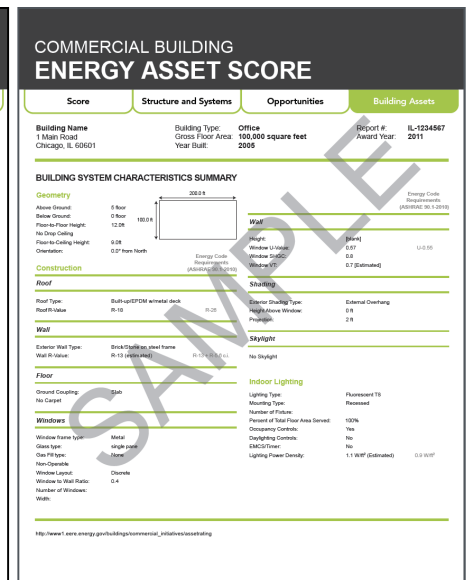

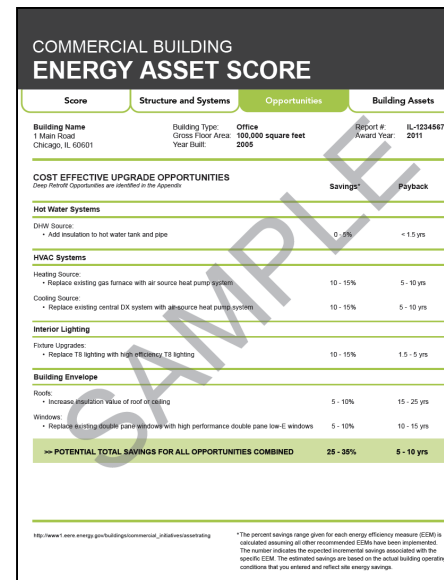

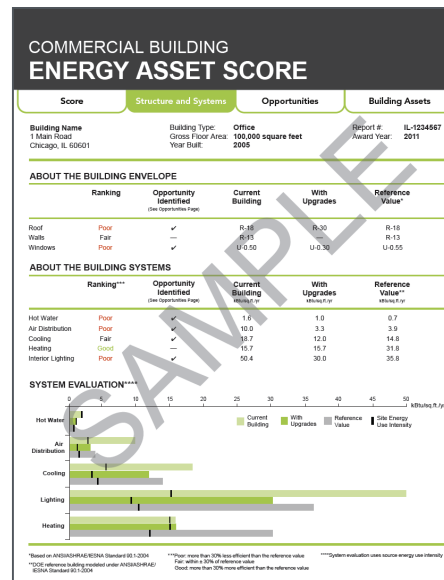

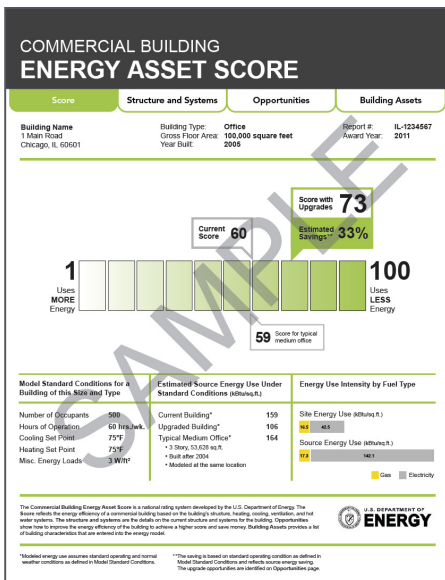

*Building energy use is affected by many factors.*

# Asset Scoring Tool

# Asset Score Report

- ▶ Report (four sections)
- Score
- Structure and Systems
- Opportunities
- Building Assets

# Project Schedule

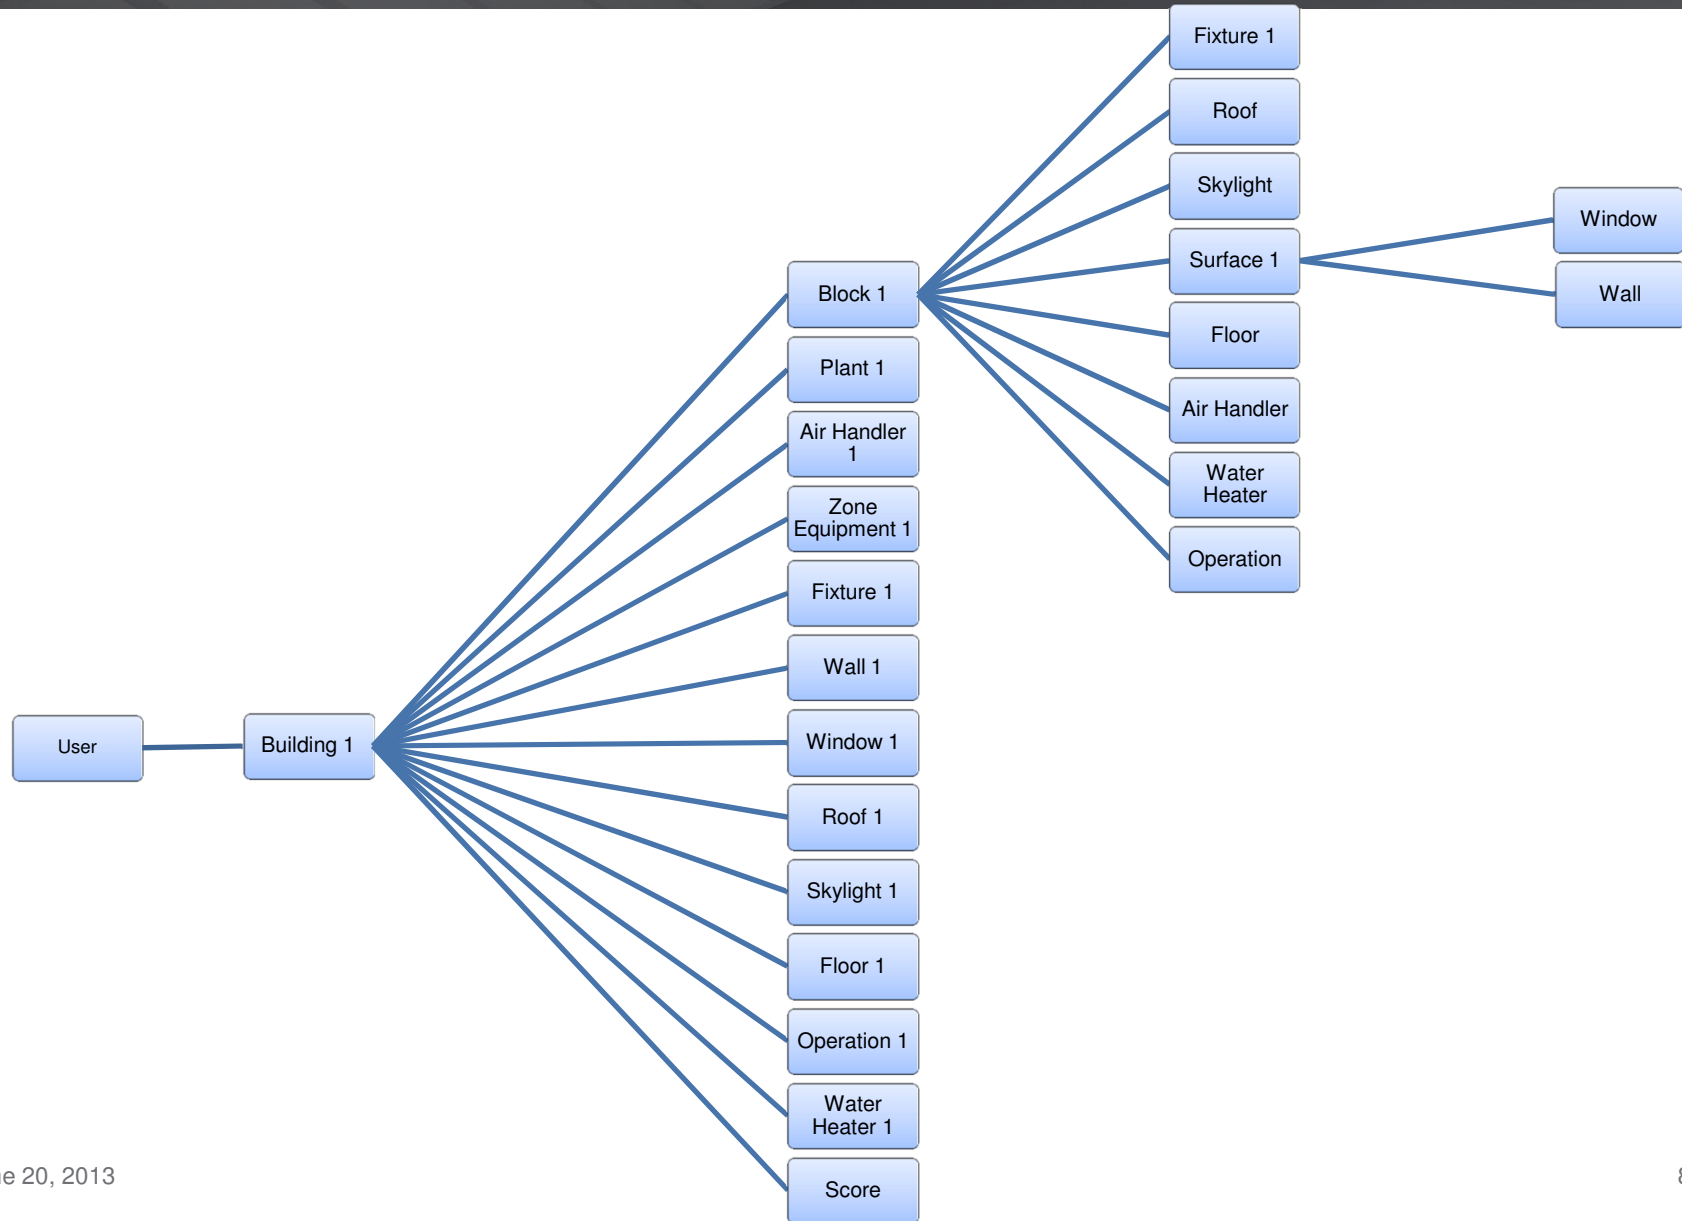

- ▶ API Development Plan, Nov 2012 – Jan 2013
- ▶ Asset Scoring Tool Update based on pilot #1 feedback and user research, Oct 2012 – Jun 2013
- ▶ API Development, Feb 2013 – Jun 2013
- ▶ Pilot 2, Jun – Sep 2013
- ▶ API testing, July – Sep 2013

# What is New?

- ▶ Two-stage data entry process
  - Build your building component inventories
  - Build your building geometry and assign component properties
- ▶ Refined data collection form based on sensitivity analysis
- ▶ Updated building system evaluation method
- ▶ Updated scoring method (not finalized yet)

# NEW Asset Scoring Tool Demo

# Objects

- ▶ RESTful
  - [http://en.wikipedia.org/wiki/Representational state transfer](http://en.wikipedia.org/wiki/Representational_state_transfer)
  - URL base – <https://assetscoreapi.pnnl.gov/api/v1>
  - HTTP Methods (e.g., GET, PUT, POST, or DELETE)
  - Supports JSON and XML
- ▶ Versioned
- ▶ Resources
  - Users
    - <https://assetscoreapi.pnnl.gov/api/v1/users>
  - Buildings
    - <https://assetscoreapi.pnnl.gov/api/v1/buildings>
- ▶ Documentation
  - <https://assetscoreapi.pnnl.gov/docs>

# API Authentication

- ▶ Token-based
- ▶ SSL required
- ▶ Generate token through authenticate service
  - POST to <https://assetscoreapi.pnnl.gov/api/v1/users/authenticate>
  - Can pass email and password via JSON, XML or URL parameters
    - JSON Example:

```
{"username": "someone@somewhere.com",  
  "password": "test"  
}
```
    - Response will contain token:

```
{"token": "xzysuLdC2hiJfRGgMkAv"}
```
- ▶ All REST resources require the token
  - <https://assetscoreapi.pnnl.gov/api/v1/buildings/1?token=yadfav34x623>
- ▶ Token does not expire
  - Each call to “authenticate” will generate a new token

# API Testing

- ▶ Dedicated server for API testing
  - <https://assetscoreapi.pnnl.gov>
- ▶ Completely independent from pilot server
  - Separate instance of code
  - Separate database
- ▶ Data generated against API testing server will NOT be migrated
  - For testing purposes only

# Questions?

Energy Asset Score website
