Cybersecurity Events in October and November
Including
National Cybersecurity Awareness Month (NCSAM)

Every October, the Department of Energy joins the Department of Homeland Security (DHS) and other federal, state and local agencies across the country in support of *National Cybersecurity Awareness Month* and the "Stop. Think. Connect." campaign. This year marks the tenth year of the cybersecurity awareness campaign. The theme for this year is *Achieving Cybersecurity Together: It's Our Shared Responsibility*. By consistently following simple security practices and understanding the consequences of unsafe actions and behaviors, computer users greatly enhance their personal and professional security.

Throughout October and November the Office of the Chief Information Officer (OCIO) will be hosting a variety cyber awareness and educational presentations that address cybersecurity hot topics that can affect us daily at home and at work.

In addition, there will be a vendor expo at both the Forrestal and Germantown locations as well as cybersecurity educational materials and communications made available to DOE Federal employees and contractors throughout October and November.

The following schedule is provided with specific time and event information.
