

July 3, 2014

The Honorable Ernest Moniz, Secretary of Energy

Office of Electricity Delivery and Energy Reliability (OE-20), 1222 Program

1000 Independence Avenue SW.

Washington, DC 20585

Dear Secretary Moniz,

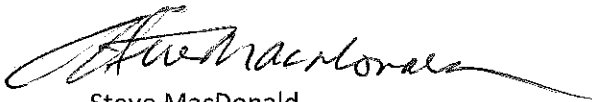

ENCLOSED please find petitions that were circulated in Sequoyah County, Oklahoma once news of the proposed Plains and Eastern Project was made aware to residents here. We have personally contacted landowners in Sequoyah County who were not notified and had no idea the DOE was presenting a Scoping Period in 2013-2014. We have contacted more landowners than Clean Line Energy has. In fact it wouldn't surprise me if most affected landowners have still not been contacted with scope of this proposed or the negative effects on their property values.

The signators of these petitions are in OPPOSITION of this proposed project. Cherokee Nation is in OPPOSITION of this proposed project. Our County Commissioners stand opposed to this proposed project. The Town of Vian is in OPPOSITION of this proposed project.

This project should be rejected as it provides no benefit to ratepayers in Oklahoma. Not one watt of wind generated electricity will be delivered to our state.

If Section 1222 is used to seize property from our landowners, property taxes will not be collected as SWPA, the Utility that will take control of the easement, is exempt from paying those taxes.

Sincerely,

Steve MacDonald

104714 S 4660 Rd

Sallisaw, Ok 74955

PETITION

CONCERNING PLAINS AND EASTERN CLEAN LINE HIGH VOLTAGE DIRECT CURRENT POWER TRANSMISSION LINE

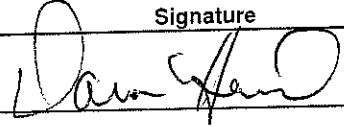

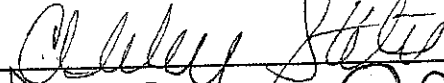

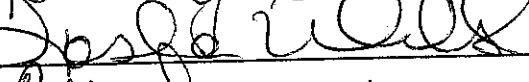

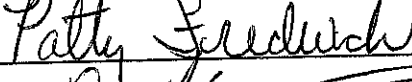

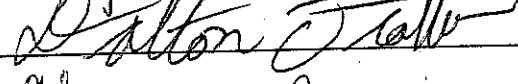

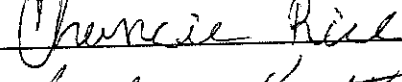

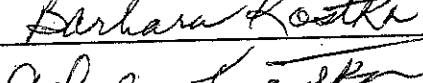

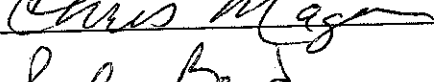

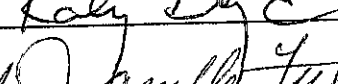

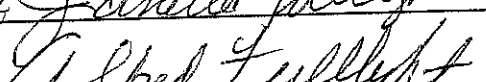

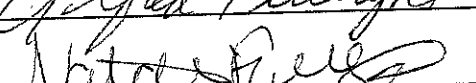

We the undersigned property owners stand opposed to Plains and Eastern Clean Line Project. They propose erecting HVDC lattice towers reaching 200 feet in height and by eminent domain taking 150-200 foot easements from Oklahoma property owners. They propose transmitting DC power from wind turbines at Guymon, Ok to Tennessee with limited benefit to the property owners along the proposed route.

PETITION

CONCERNING PLAINS AND EASTERN CLEAN LINE HIGH VOLTAGE DIRECT CURRENT POWER TRANSMISSION LINE

We the undersigned property owners stand opposed to Plains and Eastern Clean Line Project. They propose erecting HVDC lattice towers reaching 200 feet in height and by eminent domain taking 150-200 foot easements from Oklahoma property owners. They propose transmitting DC power from wind turbines at Guymon, OK to Tennessee with limited benefit to the property owners along the proposed route.
