

The Secretary's Award of Achievement

The National Nuclear Security Administration's Lawrence Livermore National Laboratory, Terascale Simulation Facility (TSF) Project is presented this award for demonstrating significant results in completing a project within cost and schedule. The \$94.1 million project demonstrated outstanding accomplishments in performance, innovation, teamwork and safety, completing 8 months ahead of schedule, \$1.2 million under cost. Significant innovations in design included providing for maximum facility flexibility while still providing heating and cooling for demanding systems, innovative computer cooling capabilities, highest achievable clear space, and effective use of natural lighting for offices. The design allowed for improved facility performance over the baseline requirements.
