

The Secretary's Excellence Award

The Office of Science's Oak Ridge National Laboratory, Spallation Neutron Source (SNS) Project is presented this award for demonstrating significant results in completing a project within cost and schedule. The \$1.4 billion project exceeded its baseline objectives, delivering more technical performance capability than promised, one month ahead of schedule and under budget. In addition, the project achieved an outstanding safety record with no lost workday injuries in over 4.2 million construction work hours.
