

United States Department of Energy

Department of Energy Achievement Award

Presented to

The National Nuclear Security Administration's Y-12 Nuclear Facility Risk Reduction Project Team

The Y-12 Nuclear Facility Risk Reduction (NFRR) Project Team is commended for delivering the \$76 million project \$6 million under budget and 11 months ahead of schedule. The NFRR Project Team managed numerous complex challenges associated with upgrading the structures, systems, and components in operating nuclear facilities that were constructed in the 1940s. The nature of the project required daily interface with the operating facility, during both the design and construction phase. Successful completion of the NFRR Project allows the National Nuclear Security Administration's Office of Defense Programs to ensure the continued safety, security, and reliability of our Nation's nuclear weapon stockpile.

Ernest J. Moniz
Secretary of Energy
