Project Title: CINT Gateway - Installation and Operation of Computer Workstation Cluster, LANL

Location: Los Alamos National Laboratory

Proposed Action or Project Description:

American Recovery and Reinvestment Act: |**X**|

Sandia National Laboratories/New Mexico (SNL/NM) proposes to install a modern computer workstation cluster, which would provide the necessary advanced computational capability for the Center for Integrated Nanotechnologies (CINT) research center. The machine would be used by users and scientists of the Department of Energy's (DOE's) CINT complex, which includes SNL/NM and Los Alamos National Laboratory (LANL). The workstation cluster would be physically installed and operated in the CINT Gateway to Los Alamos Facility at LANL.

This action would not (1) violate applicable ES&H requirements, (2) require siting of waste Treatment, Storage, Disposal or Recovery facilities, (3) disturb hazardous substances (excluding naturally occurring petroleum and natural gas), thus producing uncontrolled or unpermitted releases, and (4) adversely affect environmentally sensitive resources. Furthermore, this action (1) would not present any extraordinary circumstances such that the action might have a significant impact upon the human environment, (2) is not connected to other actions with potentially significant impacts, and (3) is not related to other actions with cumulatively significant impacts. Therefore, the proposed action may be categorically excluded from further review.
