

**ENVIRONMENTAL REVIEW FOR CATEGORICAL EXCLUSION DETERMINATION**

**Rocky Mountain Region, Western Area Power Administration**

**Rifle and Craig Substation Modifications and Approach Spans Re-Conductoring  
Garfield County, Rifle, Colorado and Moffat County, Craig, Colorado**

**Brief Description of Proposal:** Western Area Power Administration (Western) proposes to modify Rifle and Craig Substations. The modifications would occur both within and outside the fenced perimeter at the Rifle substation (owned and operated by Western), Garfield County, and the Craig substation (owned and operated by Tri-State Generation and Transmission Association, Inc.), Moffat County, Colorado.

Western would replace Disconnect Switches 380, 381, 383, 483, and 485 and Power Circuit Breakers 382 and 486 at the Rifle substation.

The approach spans from the Rifle take off structure (TOS) through structure 80/7A will be reconducted. These structures extend approximately 2500 feet to the northeast of the Rifle substation on the Craig-Rifle transmission line.

The approach spans from the Craig TOS through structure 1/0 will be reconducted. These structures extend approximately 300 feet north of the Craig Substation on the Craig-Rifle transmission line.

- A. **Number and Title of the Categorical Exclusion Being Applied:** (See text in 10 CFR Part 1021, Subpart D.)

**B4.6. Additions and modifications to transmission facilities**

**Additions or modifications to electric power transmission facilities within a previously disturbed or developed facility area.** Covered activities include, but are not limited to, switchyard rock grounding upgrades, secondary containment projects, paving projects, seismic upgrading, tower modifications, load-shaping projects (such as the installation and use of flywheels and battery arrays), changing insulators, and replacement of poles, circuit breakers, conductors, transformers, and crossarms.

**B4.13 Upgrading and rebuilding existing powerlines**

Upgrading or rebuilding approximately 20 miles in length or less and/or minor relocation of existing electric powerlines, which may involve minor relocations of small segments of the powerlines.

- B. **Regulatory Requirements in 10 CFR 1021.410 (b):** (See full text in regulation and attached checklist.)

- 1) The proposed action fits within a class of actions listed in Appendix B.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal must not:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;

## ENVIRONMENTAL REVIEW FOR CATEGORICAL EXCLUSION DETERMINATION

### **Rocky Mountain Region, Western Area Power Administration**

#### **Rifle and Craig Substation Modifications and Approach Spans Re-Conductoring Garfield County, Rifle, Colorado and Moffat County, Craig, Colorado**

- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
  - Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to; those listed in paragraph B. (4) (see Attachment A).
- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
  - 3) The proposal is not “connected” to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

#### **C. Special Stipulations Pertaining to the Proposal:**

If the scope of work of this project changes, Western’s Environmental Division must be contacted for additional environmental review.

The findings of this Categorical Exclusion depend on the contractor’s execution of, or compliance with, Western’s construction specifications for the project, specially, Division 13-Environmental Quality Protection.

This Categorical Exclusion is valid for 3 years after the signature date. If construction has not commenced within that time, Western’s Environmental Division must be contacted for an updated environmental review prior to construction.

Western has a Programmatic Agreement (PA) with the Advisory Council on Historic Preservation, State Historic Preservation Offices, Federal Agencies and Tribes in Western’s Rocky Mountain Region. The PA addresses impacts of routine maintenance of transmission lines, substations and other facilities on archaeological resources and specifically addresses cutting and dropping danger trees under Section I. Maintenance Activities with No or Minor Associated Surface Disturbance B(8). Provisions for avoidance of sensitive cultural resources require that all work within these areas be conducted by hand. Areas may only be accessed using rubber-tired vehicles.

If any cultural materials are discovered during construction, work in the area shall halt immediately, Western and the Colorado SHPO staff shall be contacted, and the material be evaluated by an archaeologist or historian meeting the Secretary of the Interior’s Professional Qualification Standards (48 FR 22716, Sept. 1983).

**ENVIRONMENTAL REVIEW FOR CATEGORICAL EXCLUSION DETERMINATION**

**Rocky Mountain Region, Western Area Power Administration**

**Rifle and Craig Substation Modifications and Approach Spans Re-Conductoring  
Garfield County, Rifle, Colorado and Moffat County, Craig, Colorado**

If re-conducting of the transmission line between Rifle substation TOS and structures 80/5A, 80/5B, 80/5, 80/6, and 80/7A occurs during the primary nesting season (April 1 to July 31), a qualified biologist should conduct a field survey of the affected habitat in Western's ROW to determine the absence or presence of nesting migratory birds. Nests in the project area during this time will be avoided.

If re-conducting of the transmission line between Craig substation TOS and structure 1/0 occurs during the primary nesting season (April 1 to July 31), a qualified biologist should conduct a field survey of the affected habitat in Western's ROW to determine the absence or presence of nesting migratory birds. Nests in the project area during this time will be avoided.

The contractor or Western will notify the landowner or appropriate agency before proceeding with work.

- D. Determination:** Based on my review of information provided to me and in my possession concerning the proposed action, I determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

**Conditions That Are Integral Elements of the Classes  
of Actions in Appendix B That Apply to This Proposal**

Checklist for Categorical Exclusion Determination, revised Nov. 2011

<b>Application of Categorical Exclusions (1021.410)</b>	<b>Disagree</b>	<b>Agree</b>	<b>Unknown</b>
(b)(1) The proposal fits within a class of actions that is listed in appendix B to subpart D.		X	
(b)(2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternate uses of available resources.		X	
(b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation.		X	
<b>B. Conditions that are Integral Elements of the Classes of Actions in Appendix B.</b>	NO	YES	Unknown
(1) Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety and health, or similar requirements of DOE or Executive Orders.	X		
(2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;	X		
(3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;	X		
(4) Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order,	X

<p>statue, or regulation by Federal, state, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to:</p>			
<p>(i) Property (such as sites, buildings, structures, and objects) of historic, archaeological, or architectural significance designated by a Federal, state, or local government, or property determined to be eligible for listing on the National Register of Historic Places;</p>	X		
<p>(ii) Federally-listed threatened or endangered species or their habitat (including critical habitat) or Federally-proposed or candidate species or their habitat (Endangered Species Act); state-listed or state-proposed endangered or threatened species or their habitat; Federally-protected marine mammals and Essential Fish Habitat (Marine Mammal Protection Act; Magnuson-Stevens Fishery Conservation and Management Act); and otherwise Federally-protected species (such as under the Bald and Golden Eagle Protection Act or the Migratory Bird Treaty Act);</p>	X		
<p>(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4, —Compliance with Floodplain and Wetland Environmental Review Requirements: “Definitions,” or its successor);</p>	X		
<p>(iv) Areas having a special designation such as Federally- and state-designated wilderness areas, national parks, national monuments, national natural landmarks, wild and scenic rivers, state and Federal wildlife refuges, scenic areas (such as National Scenic and Historic Trails or National Scenic Areas), and</p>	X		
<p>(v) Prime or unique farmland, or other farmland of statewide or local importance, as defined at 7 CFR 658.2(a), —Farmland Protection Policy Act: Definitions, or its successor;</p>	X		
<p>(vi) Special sources of water (such as sole-source aquifers, wellhead protection areas, and other water sources that are vital in a region); and</p>	X		
<p>(vii) Tundra, coral reefs, or rain forests; or</p>	X
