

ADVISORY ALERT: Dekker, Ltd. Digital Signature – PARS II Reporting

As you know, to run reports in the PARS II, users must install an active X control to their workstations. The **FIRST TIME** a user attempts to run a report after installing the Active X control, a Security Warning will appear stating:

Security Warning: Some active content has been disabled.

That warning appears because, although the digital signature is valid, the digital signature is from a publisher (in this case Dekker, Ltd.) whom you have not yet chosen to trust. The following steps instruct you how to clear the security warning so that you may continue working with PARS II reports.

Please note: Once you complete the process of accepting the Dekker, Ltd. digital signature, this warning will not re-appear. This process must be done **ONCE** to “inform” your PC that Dekker, Ltd. is an acceptable, trusted site for your PC.

STEPS TO CLEAR THE SECURITY WARNING:

1. When the Security Warning appears, click on Options

Security Warning: some active content has been disabled

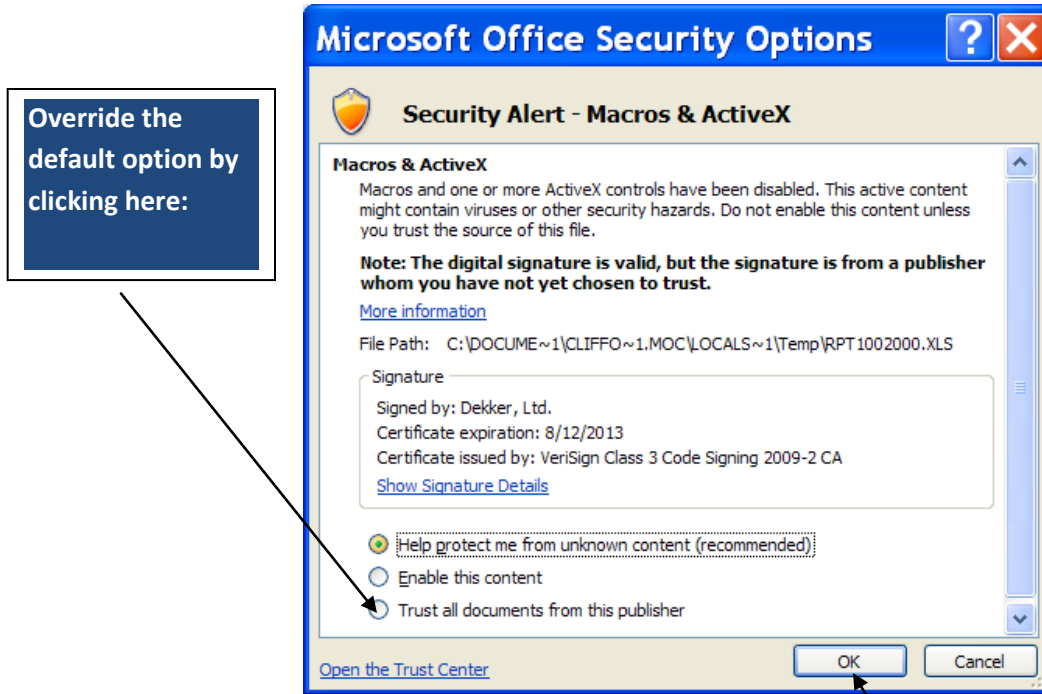

CLICK on OPTIONS

The screenshot shows the Microsoft Excel interface with a report titled "PARS Project List". A security warning dialog box is displayed at the top, stating "Security Warning: Some active content has been disabled." with an "Options..." button. An arrow points from the "Options..." button to a callout box that says "CLICK on OPTIONS".
