

DEPARTMENT OF ENERGY
ADMINISTRATIVE RECORDS SCHEDULE 5:
BUDGET PREPARATION, PRESENTATION, AND APPORTIONMENT
RECORDS
December 2010
Revision 2

Budget and apportionment records include the various files accumulated in the course of formulating the budget for submission to the Office of Management and Budget (OMB) and to the Congress; in defending its requests for funds before both bodies; and after enactment of an appropriation bill, in ensuring that the funds are used in such a way as to suffice for the appropriate period of time. OMB makes the funds available. The Department indicates and justifies regularly with OMB the proposed rate of expenditure. After the funds have been made available, the controls over the funds are in expenditure accounting records (ADM 7), and detailed information relative to expenditures is contained in the accountable officers' accounts (ADM 6).

Budget records are normally created at all organizational levels. They include proposals from operating levels as well as the Department-wide coordinating work done by budget offices. The records consist of detailed work papers and budgetary statements developed by operating units, the more significant budget statements and related papers representing consolidated submissions prepared to forward to the budget officers, and the records at the highest level pertaining to the budget submission for the Department.

Although OMB prescribes format and procedures for all Federal agencies, there are various internal reports and papers that support the budget and are used in its preparation. The budget submission, a record copy of which is usually designated by the Department, is a duplicate of the set of papers submitted to OMB. These include summary statements of appropriations and expenditures, statements of contract authorizations, and statements of receipts as well as narrative summary statements which highlight the principal features of the Departmental request and the immediately related supporting documents. The narrative presents the policies and the programs of the Department that the budget request is to support. In addition to the summaries, the submission includes schedules of obligations and statements pertaining to each type of appropriation and fund under which the Department operates. Finally, OMB requires additional supporting data pertaining to objects of expenditure, particular Departmental programs, and figures based on the cost of various types of service operations, such as personnel and payroll activities.

A new item has been added to this schedule to authorize the destruction of electronic mail and word processing records maintained by agencies in addition to the copy in the recordkeeping system. This item covers electronic copies of electronic mail and word processing records created and used solely to produce the recordkeeping copy, and electronic copies of electronic mail and word processing records that are needed in addition to the recordkeeping copy for dissemination, revision, or updating.
