Section 1512 of the American Reinvestment and Recovery Act Outlines Recipient Reporting Requirements

“Recipient reports required by Section 1512 of the Recovery Act will answer important questions, such as:

- Who is receiving Recovery Act dollars and in what amounts?
- What projects or activities are being funded with Recovery Act dollars?
- What is the completion status of such projects or activities and what impact have they had on job creation and retention?”

“When published on www.Recovery.gov, these reports will provide the public with an unprecedented level of transparency into how Federal dollars are being spent and will help drive accountability for the timely, prudent, and effective spending of recovery dollars.”

As a Prime Recipient what do I need to report?

- Data related to Prime Recipient
- Data related to Sub-Recipients
 - Primes may choose to delegate some reporting to Sub-Recipients
 - **Exception:** Primes must report Jobs for Sub-Recipients
- Data related to Vendors

Prime Recipient - A non-federal organization receiving Recovery Act funding (grants, loans, or cooperative agreements) directly from the Federal Government.

Sub-Recipient - A non-federal organization spending Federal awards received from another organization to carry out a Federal program – not a program beneficiary.

Vendor - A dealer, distributor, merchant, or other seller providing goods or services that are required of the conduct of a Recovery program.

- Sub-Recipient vs. Vendor Example: A State is the Prime Recipient. Weatherization agencies such as Community Action Agencies are sub-recipients. The company that the sub-recipient buys insulation from or is used to install the insulation is a vendor.

Jobs Guidance

- Actual direct Jobs reported as FTEs. Direct jobs are defined as those directly funded by the Recovery Act.
- Jobs calculations are no longer cumulative and are based on the reporting quarter. An example is included in this presentation.
- For cost share or cooperative agreements, calculate jobs based only on the portion of funds attributed to the Recovery Act.

Note: This guidance is subject to change in future quarters as OMB issues new or clarifying guidance. We will notify all of DOE's ARRA recipients of any changes.

OMB Definition: Full-Time Equivalent (FTE)

The estimate of the number of jobs required by the Recovery Act should be expressed as “full-time equivalents” (FTE), which is calculated as total hours worked in jobs created or retained divided by the number of hours in a full-time schedule, as defined by the recipient. The FTE estimates must be reported cumulatively each calendar quarter.

Calculating Jobs – Grant or Loan Recipient Example

Formula

$$\frac{\text{Total Number of Hours Worked and Funded by Recovery Act within Reporting Quarter}}{\text{Quarterly Hours in a Full-Time Schedule}} = \text{NUMBER OF JOBS}$$

Step 1:

Calculate Quarterly Hours in a Full-Time Schedule

(the same denominator should be used for all subsequent quarters)

40 hours in a full-time work week * 52 weeks per year = 2080 hours per year

2080 / 4 quarters per year = 520 quarterly hours

Note: For industries with a different standard work week, use the above formula substituting your standard work week hours.

Step 2:

Collect the total number of hours worked and funded within the quarter. For this example, assume the hours worked in the quarter were:

Employee	Hours Worked Previous Reporting Quarter	Hours Worked Current Reporting Quarter
Prime Employee 1	250	520
Prime Employee 2	0	260
Sub Employee A	170	100
Sub Employee B	<u>300</u>	<u>520</u>
Total	720	1400

Step 3:

Calculate the FTEs Created or Retained for the Quarter using the above formula

Calculation:

1400 (hours worked) / 520 (hours in a full time schedule) = **2.7 Jobs**

Calculating Jobs – Cooperative Agreement/Cost Share Example

Continue from previous example. Assume \$100 million in total investment of which \$50 million is provided by DOE and \$50 million is private investment.

Step 4:

Calculate DOE share of award.

$$\text{DOE Investment/Total Investment} = \$50\text{M}/\$100\text{M} = 50\%$$

Step 5:

Calculate the FTEs Created or Retained for the Quarter

Multiply the FTEs Created or Retained for the Quarter (calculated in Step 3) by the DOE Share calculated in Step 4.

$$2.7 \text{ Jobs} * 50\% = \mathbf{1.35 \text{ Jobs Created}}$$
