

**HSS Independent Activity Report - Rev. 0**

Report Number: HIAR-NNSS-2011-04-28

**Site:** Nevada National Security Site**Subject:** Office of Enforcement and Oversight's Office of Safety and Emergency Management Evaluations Activity Report for the Joint Actinide Shock Physics Experimental Research Facility Restart Operational Readiness Review Pre-Visit**Dates of Activity:** 04/25/2011 – 04/28/2011**Report Preparer** William Macon**Activity Description/Purpose:**

In coordination with the National Nuclear Security Administration (NNSA) Service Center, the Office of Health, Safety and Security (HSS) site lead participated in a pre-visit for the NNSA Operational Readiness Review (ORR) of the Joint Actinide Shock Physics Experimental Research (JASPER) facility restart conducted April 25-28, 2011. The site lead also participated in the JASPER facility restart ORR on July 11-22, 2011.

**Result:**

The HSS site lead participated in the ORR pre-visit as a member of the review team and is responsible for reviewing Department of Energy Order 425.1C core requirements related to the Management and Organization and Management Systems areas.

The results of the pre-visit were the completion of required site access training, coordination with Site Office and JASPER facility counterparts regarding the breadth and scope of the ORR and obtaining applicable documents for review, and the observance of an emergency management exercise conducted on April 27. The exercise pre-brief conducted on April 26 was very thorough and the accomplishment of the exercise during the pre-visit precludes the site having to perform another exercise during the ORR.
