

Cross Reference Matrix Introduction

This cross-reference matrix is intended to provide NRC reviewers with an aid to show where *Yucca Mountain Review Plan* (YMRP) (NUREG-1804) acceptance criteria as well as 10 CFR Part 63 regulations are addressed within the *Yucca Mountain Repository License Application*. This matrix does not assert compliance with 10 CFR Part 63 or the YMRP; it is provided as an aid to reviewers. The information contained in this matrix is generally repeated in tables at the introduction to each chapter or section of the License Application, as appropriate. The YMRP acceptance criteria are also listed within the relevant subsections of the License Application, typically at the fourth level headings, to aid reviewers. The portions of 10 CFR Part 63 that are not required to be addressed in the License Application, such as administrative instructions or NRC actions, are not included in the mapping. Because 10 CFR Part 63 is the governing regulation for the geological repository, mapping to regulations other than 10 CFR Part 63 is not included in this matrix. Other regulations invoked by 10 CFR Part 63 or by the YMRP are addressed, as necessary, in the License Application.

The mapping shown in the cross-reference matrix reflects the November 2001 publication of 10 CFR Part 63 with amendments and the proposed modifications published on September 8, 2005, in the *Federal Register* (70 FR 53313). Additionally, supplements to the YMRP acceptance criteria used by the Division of High Level Waste Repository Safety (HLWRS), Interim Staff Guidance ISG-01 through ISG-04, are included where appropriate.

The acceptance criteria mapping in the License Application, and as shown in this matrix, was generally developed using the following principles:

- If the YMRP acceptance criterion is addressed in its entirety (i.e., all the subcriteria are addressed), then only the acceptance criterion is mapped to the relevant License Application subsection and the subcriteria are not identified separately (although it is implicit that they are addressed).
- If some of the subcriteria of a YMRP acceptance criterion are not addressed by a License Application subsection, then the subcriteria that are addressed are listed separately in the License Application and in this matrix. In other words, if subcriteria are listed in the matrix for a License Application subsection, then the License Application subsection is not intended to address the acceptance criterion in its entirety; the section only addresses the subcriteria that are listed.
- In general, the cross-reference matrix maps to the primary location in the License Application that a YMRP acceptance criterion is addressed. The License Application may discuss the topic of the acceptance criterion in other sections, but these sections are typically not mapped and are not shown in the cross-reference matrix. Other tools, such as providing a pointer within the License Application to another License Application section where the topic is discussed, are used to assist the reviewer.

Finally, when the YMRP was published in 2003, there were assumptions about the design solutions, safety classifications of systems and components, and analytical models that would be part of the repository design and performance assessment. In the License

Application, where the repository application differs from what was initially envisioned in the YMRP because of design evolution or other factors, the acceptance criteria are mapped to the appropriate section in the License Application where the topic is discussed, and this mapping is reflected in the cross-reference matrix even though the YMRP acceptance criterion may not be strictly applicable. For example, the acceptance criteria for the subsurface ventilation system (a system that has now been identified as not important to safety in the License Application) are mapped in the License Application and the matrix to the section of the License Application that describes the system even though the YMRP acceptance criterion assumed that the system would be important to safety.

Cross Reference Matrix - 10 CFR 63 vs. LA

10 CFR Part 63	Responsive LA Section	LA Section Description
10 CFR 63.2	GI-1.0	General Description
10 CFR 63.9(e)(1)	SAR-5.11.3	Policies and Procedures
10 CFR 63.21		
10 CFR 63.21(a)	Entire LA	
10 CFR 63.21(b)		
10 CFR 63.21(b)(1)	GI-1.1	Location and Arrangement of Structures, Systems, and Components of the Geologic Repository Operations Area
10 CFR 63.21(b)(1)	GI-1.2	General Nature of the Geologic Repository Operations Area Activities
10 CFR 63.21(b)(1)	GI-1.3	Basis for the U.S. Nuclear Regulatory Commission Exercise of Its Licensing Authority
10 CFR 63.21(b)(2)	GI-2.1	Phased Construction Schedule
10 CFR 63.21(b)(2)	GI-2.2	Schedule for Waste Receipt and Emplacement
10 CFR 63.21(b)(3)	GI-3.1	Description and Schedule for Implementation
10 CFR 63.21(b)(3)	GI-3.2	General Performance Objectives
10 CFR 63.21(b)(3)	GI-3.3	Protection Goal and Strategy

N/A	<u>Section 2.1.1.7.3.3 I, AC 4(7)</u>	<i>This AC is deemed as being not applicable since, although confirmatory checks are done per the QA program, the confirmatory checks that indicate that the design analyses are adequate are an NRC action.</i>
N/A	<u>Section 2.1.1.7.3.3 II, AC 5(11)</u>	<i>This AC is deemed as being not applicable since, although confirmatory checks are done per the QA program, the confirmatory checks that indicate that the design analyses are adequate are an NRC action.</i>
N/A	<u>Section 2.1.1.7.3.3 II, AC 7(7)</u>	<i>This AC is not applicable since, although confirmatory checks are done per the QA program, the confirmatory checks that indicate that the design analyses for subsurface ventilation systems important to safety are adequate are an NRC action.</i>
N/A	<u>Section 2.1.1.8.3 AC 3(2), HLWRS-ISG-003</u>	<i>This acceptance criterion is not applicable because there are no Category 1 event sequences identified (see SAR Section 1.7).</i>
N/A	<u>Section 2.5.1.3 AC 17(13)</u>	<i>This acceptance criterion is a potential future NRC action.</i>
N/A	<u>Section 2.5.1.3 AC 18(12)</u>	<i>Acceptance Criterion 18(12) requires the cause of each finding to be identified. In lieu of this requirement, OCRWM will at a minimum determine the cause for audit findings determined to be significant conditions adverse to quality. This position is consistent with 10 CFR 63.142(q) and NQA-1-1983, Basic Requirement 18.</i>
N/A	<u>Section 2.5.1.3 AC 18(9)</u>	<i>The OCRWM does not have an off-site QA organization.</i>

Acceptance Criteria associated with HLWRS-ISG-001 through 004 are included in this table for completeness. However, the ISG criteria may not be explicitly listed in the License Application.
