INTRODUCTION

The information for preparing the Department of Energy “Annual Procurement and Financial Assistance Report - FY 2009” was extracted from Departmental data systems. These systems store data which are used by program, staff, and procurement management within the Department of Energy, other Federal agencies, Congress, and the general public.

This report was prepared by the Office of Procurement and Assistance Management, Information Management Systems Division. Inquiries and comments should be addressed to:

U.S. Department of Energy
Office of Procurement and Assistance Management
Information Management Systems Division, MA-623
Washington, D.C. 20585-0705

Or Email to Larry.Hardison@hq.doe.gov

SUMMARY

The procurement and financial assistance activity of the Department of Energy (DOE) fits a special category in the Federal Government. The DOE is generally not a consumer of the technology it develops, nor does it procure production quantities of hardware or systems in support of Departmental missions. The DOE spends its procurement dollars more as a catalyst for technology development than for acquiring goods and services for Federal use.

A major portion of DOE's mission involves restoring its facilities to an environmentally acceptable condition. The DOE is also involved in basic and applied research in a wide range of technology areas including: nuclear energy, nuclear waste management, fossil energy, conservation, renewable energy, and basic energy sciences. The DOE procurement activities also support the management of the Strategic Petroleum Reserve and the Naval Petroleum and Oil Shale Reserves. In addition the DOE mission supports national security in the development of nuclear weapons. The DOE enters into contractual arrangements with large and small firms involved in the technology areas for which it is responsible. In addition, the DOE is involved in contractual and financial assistance activities with educational institutions, nonprofit organizations, and state and local governments.

A significant portion of the DOE mission is carried out by industrial, academic, and nonprofit institutions operating the DOE-owned plants and laboratories under a facilities management relationship. Consequently, a large portion of the DOE funding is directed toward such facilities management contracts. For example, these contractors operate nine major, multi-program National Laboratories located throughout the United States. These laboratories provide scientific support for the DOE programs and provide a scientific staff with various core capabilities to support various technology programs. The programs carried out in the laboratories range from fundamental research in the physical and life sciences to advanced and goal-oriented development of nuclear and alternative energy technologies and nuclear weapons development. These laboratories constitute a valuable national resource.

The DOE research and development programs offer substantial opportunities for small and small disadvantaged business enterprises, both as DOE prime contractors and as subcontractors to the facilities management contractors. Each year, a portion of the DOE prime and subcontract awards is designated for small and small disadvantaged firms. As one of the agencies designated by the Small Business Innovation Development Act of 1982, a portion of the DOE research and development budget is set aside each year for awards to small businesses.

HIGHLIGHTS OF FISCAL YEAR 2009

The DOE procurement and financial assistance obligations in FY 2009 were \$54.4 billion. This is a \$26 billion increase in obligations since last year.

Obligations for facilities management contracts totaled \$27.0 billion, and accounted for ~84% of the procurement obligations and ~50% of the total FY 2009 obligations.

Obligations to procurement contracts, not including the facilities management contracts, totaled \$5.2 billion, and accounted for ~16% of the procurement obligations and ~10% of the total FY 2009 obligations.

The number of active procurement awards over \$25,000 (excluding facilities management contracts) on September 30, 2009, was 2,967 with a total award value of \$39.4 billion.

Obligations to financial assistance totaled \$22.3 billion, and accounted for ~41% of the total obligations in FY 2009. This is increase of \$19.6 billion since last year.

The number and award value of financial assistance instruments active on September 30, 2009, was 7,655 and \$45.7 billion, respectively.

Facilities Management contracts include the Federally Funded Research and Development Laboratories, major construction and environmental cleanup sites, the Strategic Petroleum Reserve, the management and operation of the nuclear weapons complex, and the management and operation of certain health facilities.

Procurement contracts, not including the facilities management contracts, include acquisitions in areas such as support services, research and development, products and materials, construction, architect and engineering, and interagency and international agreements.

Financial Assistance awards include formula grants, project grants, cooperative agreements, direct loans and payments, and loan guarantees.

Note: Unless specifically included, data on facilities management contracts and contracts under \$25,000 are excluded from all figures on procurement activity in this report.

The FY 2009 net obligations in all categories reflect the sum of all obligation and de-obligation actions for that particular award category. Therefore, the sum for individual items within a category can have either a positive number (net obligation) or a negative number (net de-obligation).

Note that awards made by the Bonneville Power Administration are excluded, since these awards are not made with funds appropriated to the Department of Energy.

FY 2009 Obligations to Facilities Management Contracts

FY 2009 obligations to 42 facilities management contracts represented approximately 84 percent of the total DOE procurement obligations in FY 2009.

(1) BIN – Business Instrument Number which is used to uniquely identify all contracts and grants. FY 2009 Procurement Awards/Modifications and Obligations, not including Facilities Management Contracts

In FY 2009, the Department of Energy executed 8,766 procurement actions, not including Facilities Management Contracts. 6,741 of these actions, including 1,748 new awards, obligated \$5.2 billion.

A total of 2,025 modifications were processed that involved no change in funding. These actions were mainly no-cost time extensions and administrative changes.

FY 2009 Obligations to Procurement Awards by Organization Type, not including Facilities Management Contracts

During FY 2009, DOE had 3,345 procurement contracts, not including facilities management contracts that received obligations. These contracts represent awards to business firms, educational and nonprofit organizations, other Federal agencies, and companies located in foreign countries.

The educational/nonprofit category includes hospitals, state and local governments, educational institutions, and research groups.

Geographic Distribution of FY 2009 Obligations to Procurement Awards, not including Facilities Management Contracts

The Department of Energy has procurement awards in all 50 States, plus the District of Columbia. This table lists the number of non-facilities management contracts and associated obligations by place of performance.

The Foreign category contains awards with the place of performance outside of the United States. In FY 2009, these contractors were located in 41 foreign countries.

FY 2009 Financial Assistance Actions and Obligations

DOE executed 8,383 actions in FY 2009 that obligated \$22.3 billion in financial assistance. New awards issued during FY 2009 accounted for 38 percent of the 8,383 actions that obligated funds and for 59 percent of the amount obligated. An additional 1,957 modifications were executed which did not obligate funding, but made other changes to existing awards.
