Subject: Notification of Planned 230kV Outage at Potomac River Generating Station

In accordance with DOE Order No. 202-05-03 Pepco is required to provide notification of any and all 230kV planned outages at Potomac River Generating Station.

To Whom It May Concern:

On Tuesday February 20, 2007 Potomac Electric Power Company (Pepco) will be taking a planned outage on the 23106 high voltage circuit between the Palmer's Corner Substation and the Potomac River Generating Station. The outage will commence at 4:00 AM on Tuesday February 20, 2007 with a scheduled return date of March 6, 2007 at 2:00 PM.

This outage is necessary to continue 230kV reliability upgrades into the Potomac River area. The outage will involve the matching of generation at the Potomac River station to the area load requirements.
