ATTACHMENTS D-1 and D-2
Electronic Copy of Groundwater Data for Group 7 Reporting Area
Read-me File

This Readme file contains information regarding electronic copies of groundwater data tables included in Attachments D-1 and D-2 of the *Group 7 RCRA Facility Investigation (RFI) Report, Santa Susana Field Laboratory* (MWH 2009). This file is provided electronically on the compact disc (CD) provided in this attachment.

This section provides a read-only CD that contains summary data tables of all available groundwater samples collected in the Group 7 Reporting Area through fourth quarter 2008.

The following tables are included:

Attachment D-1:
Groundwater Data Used for Characterization

Attachment D-2:
RMHF Direct Pathway Sampling and Analytical Results
RMHF Indirect Pathway Sampling and Analytical Results
Building 4133 Indirect Pathway Sampling and Analytical Results
Building 4029 Indirect Pathway Sampling and Analytical Results

These tables are provided in PDF format, and are sorted by well identification, sample collection date, and analyte. Data included in the risk assessments are populated with a "yes" in the "Included in Risk Assessment" column of each table.

Data Table Structure

Each table includes the following columns:

- **RFI Site** – Group 7 RFI Site where monitoring well or piezometer is located.
- **Well ID** – Monitoring well or piezometer identification.
- **Sample ID** –Identification number assigned to individual sample.
- **Analytical Method** – Analytical method used to analyze sample.
- **Analyte** – Chemical for which the sample was analyzed.
- **Result Value** – The concentration of a detected analyte or, if the analyte was not detected, the detection limit.
- **Units** – Unit of measurement for analyte (e.g., milligrams per liter [mg/L]).
- **Qualifier Code** – Qualifier code assigned by data reviewer during the validation process or, if not validated, the qualifier code assigned by the analytical laboratory.

- **Collection Date** – Date of sample collection.
- **Sample Type** – Indicates whether the sample is a primary, field duplicate, or split sample.
- **SDG Number** – SDG number assigned by the laboratory upon receipt of samples. A single SDG number is assigned to all samples on one COC form (up to 20 samples), and each laboratory report includes one SDG.
- **Analytical Laboratory** – Analytical laboratory where the sample was analyzed.
- **Northings and Eastings** – Map Coordinates (State Plane, NAD 27 Zone V).
- **Included in Risk Assessment** – A "yes" in this column indicates the result was included in the risk assessment. A "no" in this column indicates the result was not included in the risk assessment. See Appendix E of the Group 7 Bundle Report for more information regarding risk assessment criteria.
- **Rationale for Risk Exclusion –** Provides rationale for excluding certain results from the risk assessment. Results with no content in this column were included in the risk assessment.

Group 7 RFI Bundle Report
Groundwater Data Used for Characterization
Santa Susana Field Laboratory
