Historical Atlas of New Mexico (Norman, 1969)

Historical Atlas of California (Norman, 1974)

Library of Congress Cataloging in Publication Data

Beck, Warren A.

Historical atlas of California.

Includes bibliographical references.

1. California—Historical geography—Maps.
2. California—History. I. Haase, Ynez D., joint author. II. Title.

G1526.S1B4 1974 911'.794 74-5952

ISBN 0-8061-1211-5 (cloth)

ISBN 0-8061-1212-3 (paper)

Copyright 1974 by the University of Oklahoma Press, Publishing Division of the University. Manufactured in the U.S.A. First edition, 1974; second printing, 1975.

PREFACE

MANY PERSONS HAVE offered valuable advice, but in developing this *Historical Atlas of California* the authors have had to, in the end, rely on their own judgment. There are so many exciting possibilities for maps covering the history and geography of the Golden State that some had to be omitted, and we know that our final choices will not satisfy all. Some of our maps cover subjects which, although essential to our atlas, have been adequately treated elsewhere. Many, however, have never been properly researched and presented in map form before: for example, readily available sources do not include the location of the Hispanic land grants. In addition, our maps of the Spanish and Mexican expeditions, those of the great Anglo ranchos, and those of the World War II military installations are examples of the many areas in which the authors have had to do primary research and plow new ground. We hope that specialists in isolated areas of California will forgive any unintentional slighting of their interests; the authors had to produce an atlas for the student, the scholar, and those with a general interest in California.

A book of this kind must depend on the efforts and expert knowledge of many institutions and persons. This is particularly true when the subject is relatively new and different. Foremost of those to whom we are indebted are the untold number of scholars who have labored in Clio's vineyard for years to produce the many monographs which have been utilized in the preparation of this work. Individuals to whom a special note of appreciation is due include Mr. Granville L. Rogers, Mr. Donald Duke, Mr. Leslie Walker, Professor George P. Hammond, Professor Sherburne F. Cook, Professor John Leighly, Professor Rodney Steiner, Professor Charles A. Bell, and Professor Imre Sutton.

Libraries which have assisted the authors over the past five years of work on this book are the University of California, Santa Barbara (Map Room), California State University, Fullerton

(Special Collections), University of California, Los Angeles (Special Collections), Henry E. Huntington Library, Southwest Museum, Santa Barbara Franciscan Mission Archives, Museum of Vertebrate Zoology of the University of California, Berkeley, Bancroft Library of the University of California, Berkeley, California Historical Society (Jay Williar), La Casa de Rancho Los Cerritos, Kern County Historical Society, Santa Barbara Botanical Garden Library, Wells Fargo Bank History Room, Title Insurance and Trust Company Library, and California State Library.

Public and private agencies who answered our many questions either by mail or phone include California State Division of Forestry, California Agency-Bureau of Indian Affairs, California State Land Division, California Department of Water Resources, City of Los Angeles Department of Water and Power, United States Geological Survey, United States Bureau of Land Management, United States Fish and Wildlife Service, United States National Park Service, United States Bureau of Indian Affairs, United States Forest Service-headquarters, San Francisco, Angeles National Forest, Klamath National Forest, Tahoe National Forest, San Bernardino National Forest, Cleveland National Forest, Los Padres National Forest, Stanislaus National Forest, Pacific Southwest Forest and Range Experiment Station of the United States Forest Service (Berkeley and Riverside Offices), Engineering Department, County of Monterey, Orange County Road Department, San Joaquin Valley Information Service, Western Engineers, Miller & Lux inc., Heggbad-Marguleas-Tenneco, Inc., Tejon Ranch Co., and Sunical Division, Hearst Corporation.

A special word of thanks is due to Mr. Grady Overstreet, who gave of his time to help draft some of the final plates, and to Mr. Edward H. Parker, who made valuable suggestions to improve both maps and manuscript.
