Renewable Energy Programs

California, with its abundant natural resources, has a long history of support for renewable energy.

In 2009, 11.6 percent of all electricity came from renewable resources such as wind, solar, geothermal, biomass and small hydroelectric facilities. Large hydro plants generated another 9.2 percent of our electricity.

Renewable Energy Rebates & Incentives

Renewable Energy Programs

California, with its abundant natural resources, has a long history of support for renewable energy.

In 2009, 11.6 percent of all electricity came from renewable resources such as wind, solar, geothermal, biomass and small hydroelectric facilities. Large hydro plants generated another 9.2 percent of our electricity.

On October 7, 2015, Governor Edmund G. Brown, Jr. signed [legislation](#) to require 50 percent of the state's electricity to come from renewable energy by December 31, 2030.
