Details			
At 02:40 hrs Laboratory Employee (b)(6)	Emp (b)(6)	Site 300 Maintenance	
Mechanic Ph# (b)(6) informed me (b)(6) of a possible Unmanned Aerial System; (UAS) flight over Site 300.			
(b)(6) stated he saw a bright light in the sky, he noticed it was approaching his direction. He stopped on route #3, across from B-892, as he followed the flight of the UAS; from the east to the west. The UAS slowed as it approached leading (b)(6) to believe it had a camera. He watched for a moment noticing two red lights and one white light on the UAS. He estimated the red lights were ten to fourteen inches apart. He did not notice identifying marks on the UAS. The UAS flew approximately 20 to 30 feet above his vehicle.			
I sent Site 300 Officers to check all areas of the Site to determine if the drone was on Site. Negative results.			
I went off Site and conducted a perimeter check on Corral Hollow Road from the Fireworks facility to the Maintenance Facility at Carnegie Park to see if any vehicle(s) were parked on Corral			

OFFICIAL USE ONLY

Hollow Road, which meet with negative results.

Site 300 Patrols were placed on heighten alert.

I informed the CAS of the incident and the Watch Commander.

The Watch Commander made all notifications and sent out the Email Event Notification.
