Subject: Application for Long-Term Authorization to Export LNG To Free Trade Agreement Countries and Non-Free Trade Agreement Countries.

Dear Ms. Sweeney,

ST LNG, LLC hereby submits for filing with the U.S. Department of Energy, Office of Fossil Energy (DOE/FE), its application for long-term, multi-contract authorization to export domestically produced liquefied natural gas (LNG). ST LNG requests this authority to export LNG of up to the equivalent of 460 Bcf per year (approximately 8.4 million metric tons per annum of LNG) from its planned, offshore liquefaction project to be located in the Brazos Block 476 in the Gulf of America. The requested export authority would permit ST LNG, LLC itself or acting as an agent for others to export LNG to any country which has or in the future develops the capacity to import LNG via ocean-going carrier and with which the United States does not prohibit trade but also does or does not have a Free Trade Agreement. ST LNG, LLC requests authorization for exports over a twenty year period, commencing on the earlier of the date of first export or seven years from the date the requested authorization is granted.

ST LNG is submitting this filing electronically by e-mail. A fee of \$50.00 is also paid electronically as required by 10 C.F.R. § 590.207. Proof of which is attached. Please contact me if you have any questions regarding this application.
