**APPLICATION OF OSWEGO HARBOR POWER LLC FOR AUTHORIZATION
TO TRANSMIT ELECTRIC ENERGY TO CANADA**

Pursuant to Section 202(e) of the Federal Power Act (the “FPA”),¹ and Part 205, Subpart W of the regulations of the U.S. Department of Energy (the “Department” or “DOE”),² Oswego Harbor Power LLC (“Applicant”) hereby submits this application (this “Application”) for authorization to transmit electric energy from the United States to Canada for a period of five years, effective as described herein. In support of this Application, Applicant respectfully states as follows:

I.

DESCRIPTION OF APPLICANT

The exact legal name of Applicant is Oswego Harbor Power LLC.

Applicant is a Delaware corporation that owns and operates an approximately 1,564 MW (summer rating) oil-fired generation facility in Oswego, New York. Oswego Harbor is an exempt wholesale generator³ that has been granted authorization by the Federal Energy Regulatory Commission (“FERC”) to make sales at market-based rates.⁴

JURISDICTION

Other than the Department, Applicant is not aware of any federal, state, or local government agency that has jurisdiction over the actions to be taken under the authority sought in this Application.⁷

⁵ A separate, unaffiliated co-investor owns 16.8% of an AlphaGen upstream owner.

⁶ See 10 C.F.R. § 205.302(b) (2025).

⁷ See 10 C.F.R. § 205.302(e) (2025).

V.

APPLICABLE TRANSMISSION FACILITIES

Consistent with the Department's prior orders, Applicant requests authorization to export power to Canada over any authorized international transmission facility that is appropriate for open access transmission by third parties in accordance with the export limits authorized by the Department.⁸ Exhibit C to this Application identifies the international transmission facilities that are currently authorized by Presidential Permit and available for open access transmission.⁹

VI.

TECHNICAL DISCUSSION AND PROCEDURES

Applicant hereby seeks authorization to transmit electric energy to Canada. As described above, Applicant owns a generation facility in New York that is interconnected with the transmission grid operated by the New York Independent System Operator, Inc. (the "NYISO"). Applicant therefore does not have an "electric power supply system"¹⁰ that would cause Applicant's electricity exports to have a reliability, fuel use, or system stability impact. Applicant also does not have any load obligations in the NYISO market or elsewhere, and the electricity produced by the generation facility owned by Applicant has not been committed to any electric power supply system or purchaser in the United States.

Applicant has entered into a contractual arrangement to sell "installed capacity" and associated energy into Canada. This commitment of installed capacity to Canada necessitated, and will continue to necessitate for the balance of the contractual commitment, monthly notifications

⁸ See, e.g., *Macquarie Energy LLC*, Order Authorizing Electricity Exports to Canada, Order No. EA-479-A (July 11, 2025).

⁹ See *id.* at 15-17.

¹⁰ 10 C.F.R. § 205.302(g) (2025).

to, and permission of, the NYISO and The Independent Electricity System Operator of Ontario (the “IESO”). The energy that is associated with this commitment of installed capacity must be linked to the specific electric generating facility owned by Applicant and, as stated previously, the output of such facility has not been committed to any system or purchaser within the United States. As a result of this commitment of installed capacity backed energy, Applicant has been and remains specifically foreclosed from selling its installed capacity within the NYISO region. Thus, there can be no “double counting” of the installed capacity and each of the NYISO and the IESO can be assured that the installed capacity is only being counted by one control area operator, and never both simultaneously, for purposes of resource adequacy reliability requirements. There may also be limited circumstances where Applicant may purchase available power in the NYISO market or from third parties, which by definition is surplus power, for resale in Canada.

Accordingly, Applicant’s proposed electricity exports will not impair or impede the sufficiency of electric power supplies in the United States or the regional coordination of electric utility planning or operations.¹¹

Applicant has made, and will continue to make, all necessary commercial arrangements and will obtain any and all other regulatory approvals required in order to carry out any electricity exports. This would include:

1. Scheduling each transaction with the NYISO, the IESO and any other appropriate balancing authorities;
2. Following all relevant procedures and/or market structures, and coordination with all parties as required pursuant to the applicable market rules;

¹¹ See *id.*

3. Complying with the applicable reliability standards and guidelines of the North American Electric Reliability Corporation and relevant Regional Entities; and
4. Obtaining necessary transmission access over approved export facilities and complying with the export limits contained in the relevant export authorization of any transmission facilities over which Applicant exports electricity to Canada.

Given that Applicant only intends to export power over existing transmission lines, this application qualifies for a categorical exclusion under the Department's regulations implementing the National Environmental Policy Act of 1969.¹²

Applicant respectfully requests that the Department grant it authorization to transmit electric energy to Canada for a term of five years, effective beginning May 1, 2024. As described in the Affidavit of Liam Baker, Senior Vice President, Regulatory Affairs, at AlphaGen, which is provided herein at Attachment 2, Applicant is hereby requesting that authorization to transmit electric energy to Canada be made effective retroactively because Applicant inadvertently made limited sales into Canada without prior authorization from the Department. Upon learning that such sales had been made without authorization, Applicant immediately contacted DOE Staff and initiated this Application process to ensure the requisite approval may be obtained as quickly as possible. Applicant has not made sales into Canada since learning of this oversight and hereby commits not to make future exports to Canada until such approval is obtained. Applicant deeply regrets this oversight and has adopted internal safeguards to ensure that such errors are not repeated.

¹² See 10 C.F.R. Part 1021, Subpart D, Appendix B, § B4.2 (2025) (providing a categorical exclusion for the "[e]xport of electric energy as provided by Section 202(e) of the [FPA] over existing transmission systems or using transmission system changes that are themselves categorically excluded").

VII.

VIII.

CONCLUSION

WHEREFORE, for the reasons set forth herein, Applicant respectfully requests that the Department issue an order granting Applicant authorization to transmit electric energy to Canada for a period of five years, effective as requested herein.

¹³ There are no corporate relationships or existing contracts between Applicant and any other person, corporation, or foreign government, which in any way relate to the control or fixing of rates for the purchase, sale, or transmission of electric energy.

¹⁴ Applicant owns generation facilities and is not a franchised electric utility with captive customers.

The exemption by a *Party* of any default, breach or non-compliance under this *Agreement* shall not operate as an exemption of that *Party's* rights under this *Agreement* in respect of any continuing or subsequent default, breach or non-observance (whether of the same or any other nature).
- 7.6 **Severability:** Each provision in this *Agreement* is distinct and severable. If any provision of this *Agreement*, in whole or in part, is or becomes illegal, invalid or unenforceable in any jurisdiction, the illegality, invalidity or unenforceability of that provision, in whole or in part, shall not affect the legality, validity or enforceability of the remaining provisions of this *Agreement* in any other jurisdiction.

- 7.11 **Counterparts:** This *Agreement* may be executed in any number of counterparts, each of which shall be deemed to be an original and all of which taken together shall be deemed to constitute one and the same instrument. Counterparts may be executed either in original

or faxed form and the *Parties* adopt any signatures received by a receiving facsimile machine as original signatures of the *Parties*; provided, however, that any *Party* providing its signature in such manner shall promptly forward to the other *Party* an original signed copy of this *Agreement* which was so faxed.

IN WITNESS WHEREOF the *Parties* have, by their duly appointed and authorized representatives, executed this *Agreement*.

Affidavit of Liam Baker

**UNITED STATES OF AMERICA
BEFORE THE
DEPARTMENT OF ENERGY
GRID DEPLOYMENT OFFICE**

Oswego Harbor Power LLC

)

Docket No. EA-_____

AFFIDAVIT OF LIAM BAKER

1. My name is Liam Baker. I am the Senior Vice President, Regulatory Affairs, at Alpha Generation, LLC (“AlphaGen”). I am submitting this affidavit in support of the “Application of Oswego Harbor Power LLC for Authorization to Transmit Electric Energy to Canada” (the “Application”).
2. Oswego Harbor Power LLC (“Oswego Harbor”) is an indirect, wholly owned subsidiary of AlphaGen.
3. Oswego Harbor owns and operates the Oswego Harbor Facility, an approximately 1,564 MW (summer rating) oil-fired generation facility in Oswego, New York. The Oswego Harbor Facility is interconnected to the transmission grid operated by the New York Independent System Operator, Inc. (“NYISO”).
4. Oswego Harbor does not have load obligations in the NYISO market or elsewhere in the United States. Oswego Harbor generally sells the electric energy produced by the Oswego Harbor Facility into the NYISO markets. As described in the Application, Oswego Harbor has also entered into a contractual commitment to sell installed capacity and associated energy in Canada.
5. In conducting a routine review of Oswego Harbor’s compliance with regulatory requirements, on September 22, 2025, AlphaGen realized that there have been limited occasions in the past where Oswego Harbor has sold electric energy produced by the

Oswego Harbor Facility to purchasers in Canada. The table below shows the dates on which Oswego Harbor sold electricity in Canada, and the amounts (in MWh) of such sales:

Date	Sales (in MWh)
5/7/2024	1.0
6/5/2024	2700.0
6/19/2024	2700.0
6/20/2024	2700.0
7/15/2024	2700.0
12/11/2024	855.0

6. The sales listed above on May 7, 2024, and December 11, 2024, by Oswego Harbor were for test energy only. Thus, since sales to Canada commenced, there have been a total of only four transactions that were the subject of the contractual obligations discussed in the Application, all of which occurred in the two-month period from June-July 2024.
7. Upon discussing the matter with employees of Oswego Harbor, I determined that the sales above resulted from the mistaken belief that, because Oswego Harbor has been granted market-based rate authorization by the Federal Energy Regulatory Commission, no other authorizations were required for sales into Canada.
8. Upon discovering that unauthorized sales had been made, Oswego Harbor immediately instructed its counsel to contact the Staff of the Department of Energy and initiated this Application process to ensure the requisite authorization is obtained as quickly as possible. Oswego Harbor has not made sales into Canada since learning of this oversight and has committed not to make future sales into Canada until such authorization is obtained.

9. Oswego Harbor has now also taken steps to avoid a recurrence of this error by designating specific personnel to monitor required authorizations, including the authorization requested in the Application.

Dear Sirs and Madams:

You submitted for filing with the Commission rate schedules under which applicants will engage in wholesale electric power and energy transactions at market-based rates. Your submittals, as modified below, comply with the Commission's requirements for market-based rates and are accepted for filing. They are designated and made effective as indicated in Appendix A to this order.

Okeechobee Generating Company (Okeechobee) requests authority to engage in sales of ancillary services (regulation, energy imbalance, spinning reserves and supplemental reserves) at market-based rates. Duke Energy Merchants, LLC (Duke) also requests authority to engage in sales of ancillary services at market-based rates. In these filings, Okeechobee and Duke request permission to make sales of ancillary services subject to the conditions set forth in Avista Corporation, 87 FERC ¶ 61,223 (1999) (Avista), with respect to similarly situated entities which are unable to develop a reliable

market power analysis for ancillary services. Because Okeechobee's and Duke's rate schedules do not reflect all of the requirements of Avista, e.g., they do not contain all of the limitations identified as necessary and appropriate in Avista, we will deny their requests for authorization to make sales of ancillary services at market-based rates without prejudice to resubmittal.

We will grant the request of Oswego for authority to make sales of ancillary services at market-based rates into the PJM Power Exchange, the New York ISO market and the ISO New England market.¹

We will grant the request of Casco Bay Energy Company, LLC (Casco Bay) for authority to make sales of ancillary services at market-based rates into the ISO New England market.²

We will grant the request of Northbrook New York, LLC (Northbrook) for authority to sell ancillary services at market-based rates under its proposed rate schedule, provided it amends its proposed rate schedule to specify that it will sell ancillary services into the PJM Power Exchange, the New York ISO market or the ISO New England market.³

Any waivers or authorizations requested by the applicants, other than Northbrook, are granted to the extent specified in Appendix B to this order. As to Northbrook, it is a licensee that is presently required, among other things, to comply with 18 C.F.R.

¹See Atlantic City Electric Company, et al., 86 FERC ¶ 61,248 (1999); Central Hudson Gas & Electric Corporation, et al., 86 FERC ¶ 61,062 (1999); New England Power Pool, 85 FERC ¶ 61,379 (1998).

²See id.

³See id.

§§ 141.14, .15 (1999)(providing for the filing both of the Form No. 80, Licensed Hydropower Development Recreation Report and of the Annual Conveyance Report). We will grant Northbrook the waivers and authorizations requested by Northbrook, with the exception of 18 C.F.R. §§ 141.14, .15 (1999), to the extent specified in Appendix B to this order. Northbrook thus will still be required to file the Form No. 80s and the Annual Conveyance Reports. Waiver of the prior or advance notice requirements, if requested, is granted to the extent specified in Appendix A. The applicants must comply with the reporting requirements or other requirements specified in Appendix B to this order. ⁴

The codes of conduct submitted by the applicants are accepted if consistent with Appendix C, which reflects requirements adopted in previous Commission orders. Because the code of conduct submitted by CMS Generation Michigan Power, L.L.C. is inconsistent with Appendix C, it is hereby rejected. As to this applicant, Appendix C has been designated as the applicable code of conduct.

Pursuant to Rule 214 of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 385.214 (1999), an entity's filing of a timely notice of intervention or a timely, unopposed motion to intervene in a proceeding makes it a party to that proceeding.

Should an applicant or any of its affiliates deny, delay, or require unreasonable terms, conditions, or rates for natural gas fuel or services to a potential electric competitor in bulk power markets, then that electric competitor may file a complaint with the Commission that could result in the applicant's or its affiliate's authority to sell power at market-based rates being suspended. ⁵

Sales of accounts receivable are not dispositions of jurisdictional facilities and are not within the scope of section 203 of the FPA. To the extent an applicant seeks a

⁴On May 27, 1999, the Commission issued an order in which it modified the reporting requirements for long-term transactions applicable to public utilities without ownership or control over generation or transmission facilities that are authorized to sell power at market-based rates (power marketers). Southern Company Services, et al., 87 FERC ¶ 61,214 (1999), reh'g pending (Southern). Specifically, with respect to any long-term transaction agreed to by a power marketer after 30 days from the date of issuance of a final order in the Southern case, the power marketer must file a service agreement with the Commission within 30 days after service commences, rather than reporting transactions thereunder in its quarterly transaction summaries.

case-specific finding on this or any related point, it may file a petition for a declaratory order with the Commission.

Oswego, Duke, Midwest Generation, L.L.C (Midwest), Casco Bay and Northbrook seek Commission approval to reassign transmission capacity. We find their requests to be consistent with our requirements.

Oswego, Okeechobee, Midwest, Casco Bay and Northbrook must inform the Commission of the date service commences or the date of acquisition of the facility, as appropriate.

By direction of the Commission.

Linwood A. Watson, Jr.,
Acting Secretary.

APPENDIX B

(1) If requested, waiver of Parts 41, 101, and 141 of the Commission's regulations, with the exception of 18 C.F.R. §§ 141.14, .15 (1999), is granted. Licensees remain obligated to file the Form No. 80 and the Annual Conveyance Report.

(2) Within 30 days of the date of this order, any person desiring to be heard or to protest the Commission's blanket approval of issuances of securities or assumptions of liabilities by those applicants who have sought such approval should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 C.F.R. §§ 385.211 and 385.214.

(3) Absent a request to be heard within the period set forth in Paragraph (2) above, if the applicants have requested such authorization, the applicants are hereby authorized to issue securities and assume obligations or liabilities as guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issue or assumption is for some lawful object within the corporate purposes of the applicants, compatible with the public interest, and reasonably necessary or appropriate for such purposes.

(4) If requested, until further order of this Commission, the full requirements of Part 45 of the Commission's regulations, except as noted below, are hereby waived with respect to any person now holding or who may hold an otherwise proscribed interlocking directorate involving the applicants. Any such person instead shall file a sworn application providing the following information:

- (a) full name and business address; and
- (b) all jurisdictional interlocks, identifying the affected companies and the positions held by that person.

(5) The Commission reserves the right to modify this order to require a further showing that neither the public nor private interests will be adversely affected by continued Commission approval of the applicants' issuances of securities or assumptions of liabilities, or by the continued holding of any affected interlocks.

(6) If requested, waiver of the provisions of Subparts B and C of Part 35 of the Commission's regulations, with the exception of sections 35.12(a), 35.13(b), 35.15 and 36.16, is granted for transactions under the rate schedules at issue here.

(7) (a) Applicants who own generating facilities may file umbrella service agreements for short-term power sales (one year or less) within 30 days of the date of commencement of short-term service, to be followed by quarterly transaction summaries of specific sales (including risk management transactions if they result in actual delivery of electricity). For long-term transactions (longer than one year), applicants must submit the actual individual service agreement for each transaction within 30 days of the date of commencement of service. To ensure the clear identification of filings, and in order to facilitate the orderly maintenance of the Commission's files and public access to documents, long-term transaction service agreements should not be filed together with short-term transaction summaries. For applicants who own, control or operate facilities used for the transmission of electric energy in interstate commerce, prices for generation, transmission and ancillary services must be stated separately in the quarterly reports and long-term service agreements.

(b) Applicants who do not own generating facilities must file quarterly reports detailing the purchase and sale transactions undertaken in the prior quarter (including risk management transactions if they result in actual delivery of electricity). Applicants who are power marketers should include in their quarterly reports only those risk management transactions that result in the actual delivery of electricity.

(8) The first quarterly report filed by an applicant in response to Paragraph (7) above will be due within 30 days of the end of the quarter in which the rate schedule is made effective.

(9) Each applicant must file an updated market analysis within three years of the date of this order, and every three years thereafter. The Commission reserves the right to require such an analysis at any time. The applicants must also inform the Commission promptly of any change in status that would reflect a departure from the characteristics the Commission has relied upon in approving market-based pricing. These include, but are not limited to: (a) ownership of generation or transmission supplies; or (b) affiliation with any entity not disclosed in the applicants' filing that owns generation or transmission facilities or inputs to electric power production, or affiliation with any entity that has a

franchised service area. Alternatively, the applicants may elect to report such changes in conjunction with the updated market analysis required above. Each applicant must notify the Commission of which option it elects in the first quarterly report filed pursuant to Paragraph (7) above.
