

AMWTP Future Mission Analysis

- AMWTP is a national asset
 - Experienced and innovative workforce; world-class treatment facility
 - Successfully processed ~700 cubic meters of CH TRU waste from 11 other DOE sites
- Analysis underway to evaluate potential future mission after successful completion of Idaho cleanup mission
 - Led by EM-HQ with participation from field offices
 - Initial site visits completed to collect information on potential waste inventories and other supporting information
- DOE to brief INL CAB in October
- Analysis will not detract from top priority to fulfill Idaho Cleanup commitments.
