|                      | "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis. |            |            |                             |                           |                 |

## General Sample Comments

State of California Lab Certification No. 2501  
The volatile analysis was performed on soil from SL-106-SA7-SB-17.0.

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

|                      | "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis. |            |            |                             |                           |                 |

## General Sample Comments

State of California Lab Certification No. 2501  
The volatile analysis was performed on soil from SL-106-SA7-SB-19.5.

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

| N-nitrosodiphenylamine decomposes in the GC inlet forming diphenylamine. The result reported for N-nitrosodiphenylamine represents the combined total of both compounds.                                    |                              |              |            |                             |                           |                 |

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4,5-TP, 2,4,5-T, and 2,4-DB.

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank, Laboratory Control Sample, and this sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

| 3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The result reported for 4-methylphenol represents the combined total of both compounds. |                              |              |            |                             |                           |                 |

| N-nitrosodiphenylamine decomposes in the GC inlet forming diphenylamine. The result reported for N-nitrosodiphenylamine represents the combined total of both compounds.                                    |                              |              |            |                             |                           |                 |

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4,5-TP, and 2,4-DB.

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.  
Reporting limits were raised due to interference from the sample matrix.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4-DB.

**Pesticides/PCBs** **SW-846 8081A** **ug/kg** **ug/kg** **ug/kg**

\*=This limit was used in the evaluation of the final result

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

| 3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The result reported for 4-methylphenol represents the combined total of both compounds. |                              |              |            |                             |                           |                 |

| N-nitrosodiphenylamine decomposes in the GC inlet forming diphenylamine. The result reported for N-nitrosodiphenylamine represents the combined total of both compounds.                                    |                              |              |            |                             |                           |                 |

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4-D, 2,4,5-T, and 2,4-DB.

**Pesticides/PCBs** **SW-846 8081A** **ug/kg** **ug/kg** **ug/kg**

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

| When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. Various compounds were affected. |                            |                         |              |                             |                           |                 |

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4-D, 2,4,5-T, and 2,4-DB.

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

|                      | "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis. |            |            |                             |                           |                 |

## General Sample Comments

State of California Lab Certification No. 2501

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4,5-TP, 2,4,5-T, and 2,4-DB.

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.  
Reporting limits were raised due to interference from the sample matrix.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: dicamba, MCPA and 2,4-DB.

**Pesticides/PCBs** **SW-846 8081A** **ug/kg** **ug/kg** **ug/kg**

\*=This limit was used in the evaluation of the final result

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

|              | 3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The result reported for 4-methylphenol represents the combined total of both compounds. |                     |              |                             |                           |                 |

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

The TCX surrogate recovery is below the client specified client limits of 50-130% for this sample; however the recovery is within the in house limits of 28-121%.

Reporting limits were raised due to interference from the sample matrix.

|                      | "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis.  |            |                   |                             |                           |                 |

\*=This limit was used in the evaluation of the final result

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4-DB.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. Various compounds were affected.

The recovery for the sample surrogate(s) is outside the QC acceptance limits as noted on the QC Summary. The following corrective action was taken:  
The sample was re-extracted outside of the method required holding time, and surrogate recoveries are within the QC acceptance limits. Since the hold time had expired prior to the second extraction all results are reported from the original extract. Similar results were obtained in both extracts.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4-DB.

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

The recovery for the sample surrogate(s) is outside the QC acceptance limits as noted on the QC Summary. The following corrective action was taken:  
The sample was re-extracted outside of the method required holding time, and surrogate recoveries are within the QC acceptance limits. Since the hold time had expired prior to the second extraction all results are reported from the original extract. Similar results were obtained in both extracts.

## General Sample Comments

State of California Lab Certification No. 2501

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

When the concentration detected on the primary and confirmation column is significantly different, some uncertainty as to the presence and concentration of the compound exists. In these cases, the reporting limits have been raised. The following compounds were affected: 2,4,5-TP, and 2,4-DB.

The DCB surrogate recovery is above the client specified client limits of 20-120% for the method blank and Laboratory Control Sample; however the recovery is within the in house statistical limits of 45-150%.

Reporting limits were raised due to interference from the sample matrix.

|                      | "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis. |            |            |                             |                           |                 |

## General Sample Comments

State of California Lab Certification No. 2501

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

**Sample Description:** EB-SA5DS-SS-092811 Water  
SSFL Area IV Collocated Soil Sampling  
EB-SA5DS-SS-092811

LLI Sample # WW 6422547  
LLI Group # 1268901  
Account # 13013

**Project Name:** SSFL Area IV Collocated Soil Sampling

Collected: 09/28/2011 13:00

CDM Federal Programs Corp.

Submitted: 09/29/2011 09:05

14420 Albemarle Point Place

Reported: 11/03/2011 14:54

Suite 210

| 3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The result reported for 4-methylphenol represents the combined total of both compounds. |                              |              |                    |                                     |                                   |                 |

| N-nitrosodiphenylamine decomposes in the GC inlet forming diphenylamine. The result reported for N-nitrosodiphenylamine represents the combined total of both compounds.                                    |                              |              |                    |                                     |                                   |                 |

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

Group Number: 1268901

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

- (1) The result for one or both determinations was less than five times the LOQ.
- (2) The unspiked result was more than four times the spike added.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

- (1) The result for one or both determinations was less than five times the LOQ.
- (2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

Group Number: 1268901

### Sample Matrix Quality Control

Unspiked (UNSPK) = the sample used in conjunction with the matrix spike

Background (BKG) = the sample used in conjunction with the duplicate

\*- Outside of specification

\*\*.-This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

Group Number: 1268901

### Sample Matrix Quality Control

Unspiked (UNSPK) = the sample used in conjunction with the matrix spike

Background (BKG) = the sample used in conjunction with the duplicate

\*- Outside of specification

\*\*.-This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

Group Number: 1268901

### Sample Matrix Quality Control

Unspiked (UNSPK) = the sample used in conjunction with the matrix spike

Background (BKG) = the sample used in conjunction with the duplicate

\*- Outside of specification

\*\*.-This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

Group Number: 1268901

### Sample Matrix Quality Control

Unspiked (UNSPK) = the sample used in conjunction with the matrix spike

Background (BKG) = the sample used in conjunction with the duplicate

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 11/03/11 at 02:54 PM

Group Number: 1268901

### Sample Matrix Quality Control

Unspiked (UNSPK) = the sample used in conjunction with the matrix spike

Background (BKG) = the sample used in conjunction with the duplicate

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

| <b>J</b>                | estimated value – The result is $\geq$ the Method Detection Limit (MDL) and $<$ the Limit of Quantitation (LOQ).                                                                                                                                                                                                                                                   |                 |                                  |
| <b>ppm</b>              | parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg), or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter of gas per liter of gas. |                 |                                  |
| <b>ppb</b>              | parts per billion                                                                                                                                                                                                                                                                                                                                                  |                 |                                  |
| <b>Dry weight basis</b> | Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.                                                                                                         |                 |                                  |

## U.S. EPA CLP Data Qualifiers:

### Organic Qualifiers

|              |                                                                           |
|--------------|---------------------------------------------------------------------------|
| <b>A</b>     | TIC is a possible aldol-condensation product                              |
| <b>B</b>     | Analyte was also detected in the blank                                    |
| <b>C</b>     | Pesticide result confirmed by GC/MS                                       |
| <b>D</b>     | Compound quantitated on a diluted sample                                  |
| <b>E</b>     | Concentration exceeds the calibration range of the instrument             |
| <b>N</b>     | Presumptive evidence of a compound (TICs only)                            |
| <b>P</b>     | Concentration difference between primary and confirmation columns $>25\%$ |
| <b>U</b>     | Compound was not detected                                                 |
| <b>X,Y,Z</b> | Defined in case narrative                                                 |

### Inorganic Qualifiers

|          |                                                         |
|----------|---------------------------------------------------------|
| <b>B</b> | Value is $<CRDL$ , but $\geq IDL$                       |
| <b>E</b> | Estimated due to interference                           |
| <b>M</b> | Duplicate injection precision not met                   |
| <b>N</b> | Spike sample not within control limits                  |
| <b>S</b> | Method of standard additions (MSA) used for calculation |
| <b>U</b> | Compound was not detected                               |
| <b>W</b> | Post digestion spike out of control limits              |
| <b>*</b> | Duplicate analysis not within control limits            |
| <b>+</b> | Correlation coefficient for MSA $<0.995$                |

Analytical test results meet all requirements of NELAC unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL LANCASTER LABORATORIES BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF LANCASTER LABORATORIES AND (B) WHETHER LANCASTER LABORATORIES HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Lancaster Laboratories which includes any conditions that vary from the Standard Terms and Conditions, and Lancaster hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

## Dioxins/Furans Data Qualifiers:

B Detected in Method Blank  
U Undetected  
J Estimated concentration between Estimated Detection Limit and Minimum Level  
E Exceeds calibration range  
C Confirmed quantitation on secondary GC column  
Q EMPC - Estimated Maximum Possible Concentration  
F Interference is present

## Dioxins/Furans Data Qualifiers:

B Detected in Method Blank

U Undetected

J Estimated concentration between Estimated Detection Limit and Minimum Level

E Exceeds calibration range

C Confirmed quantitation on secondary GC column

Q EMPC - Estimated Maximum Possible Concentration

F Interference is present

## Dioxins/Furans Data Qualifiers:

B Detected in Method Blank

U Undetected

J Estimated concentration between Estimated Detection Limit and Minimum Level

E Exceeds calibration range

C Confirmed quantitation on secondary GC column

Q EMPC - Estimated Maximum Possible Concentration

F Interference is present

## Dioxins/Furans Data Qualifiers:

- B* Detected in Method Blank  
*U* Undetected  
*J* Estimated concentration between Estimated Detection Limit and Minimum Level  
*E* Exceeds calibration range  
*C* Confirmed quantitation on secondary GC column  
*Q* EMPC - Estimated Maximum Possible Concentration  
*F* Interference is present

## Dioxins/Furans Data Qualifiers:

**B** Detected in Method Blank  
**U** Undetected  
**J** Estimated concentration between Estimated Detection Limit and Minimum Level  
**E** Exceeds calibration range  
**C** Confirmed quantitation on secondary GC column  
**Q** EMPC - Estimated Maximum Possible Concentration  
**F** Interference is present

## Dioxins/Furans Data Qualifiers:

- B** Detected in Method Blank
- U** Undetected
- J** Estimated concentration between Estimated Detection Limit and Minimum Level
- E** Exceeds calibration range
- C** Confirmed quantitation on secondary GC column
- Q** EMPC - Estimated Maximum Possible Concentration
- F** Interference is present

## General Sample Comments

State of California Lab Certification No. 2501

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

## Laboratory Sample Analysis Record

| CAT No. | Analysis Name                  | Method             | Trial# | Batch#       | Analysis Date and Time | Analyst           | Dilution Factor |

\*=This limit was used in the evaluation of the final result

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 10/19/11 at 10:51 PM

Group Number: 1268919

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ / MRL.

(2) The unspiked result was more than four times the spike added.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

- (1) The result for one or both determinations was less than five times the LOQ / MRL.
- (2) The unspiked result was more than four times the spike added.

## Quality Control Summary

Client Name: CDM Federal Programs Corp.  
Reported: 10/19/11 at 10:51 PM

Group Number: 1268919

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ / MRL.

(2) The unspiked result was more than four times the spike added.

sample # 6422590-604

| <b>J</b>                | estimated value – The result is $\geq$ the Method Detection Limit (MDL) and $<$ the Limit of Quantitation (LOQ).                                                                                                                                                                                                                                                   |                 |                                  |
| <b>ppm</b>              | parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg), or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter of gas per liter of gas. |                 |                                  |
| <b>ppb</b>              | parts per billion                                                                                                                                                                                                                                                                                                                                                  |                 |                                  |
| <b>Dry weight basis</b> | Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.                                                                                                         |                 |                                  |

## U.S. EPA CLP Data Qualifiers:

### Organic Qualifiers

|              |                                                                           |
|--------------|---------------------------------------------------------------------------|
| <b>A</b>     | TIC is a possible aldol-condensation product                              |
| <b>B</b>     | Analyte was also detected in the blank                                    |
| <b>C</b>     | Pesticide result confirmed by GC/MS                                       |
| <b>D</b>     | Compound quantitated on a diluted sample                                  |
| <b>E</b>     | Concentration exceeds the calibration range of the instrument             |
| <b>N</b>     | Presumptive evidence of a compound (TICs only)                            |
| <b>P</b>     | Concentration difference between primary and confirmation columns $>25\%$ |
| <b>U</b>     | Compound was not detected                                                 |
| <b>X,Y,Z</b> | Defined in case narrative                                                 |

### Inorganic Qualifiers

|          |                                                         |
|----------|---------------------------------------------------------|
| <b>B</b> | Value is $<CRDL$ , but $\geq IDL$                       |
| <b>E</b> | Estimated due to interference                           |
| <b>M</b> | Duplicate injection precision not met                   |
| <b>N</b> | Spike sample not within control limits                  |
| <b>S</b> | Method of standard additions (MSA) used for calculation |
| <b>U</b> | Compound was not detected                               |
| <b>W</b> | Post digestion spike out of control limits              |
| <b>*</b> | Duplicate analysis not within control limits            |
| <b>+</b> | Correlation coefficient for MSA $<0.995$                |

Analytical test results meet all requirements of NELAC unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL LANCASTER LABORATORIES BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF LANCASTER LABORATORIES AND (B) WHETHER LANCASTER LABORATORIES HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Lancaster Laboratories which includes any conditions that vary from the Standard Terms and Conditions, and Lancaster hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

The following compounds were detected in the method blank at the respective concentrations of:

bis(2-ethylhexyl)phthalate 7.6 ug/kg

benzo(g,h,i)perylene 1.5 ug/kg

These blank values were not subtracted from the analytical results. This sample was re-extracted outside of the method required holding time, and acceptable QC was observed. Bis(2-ethylhexyl)phthalate was again detected in the re-analysis of the sample. The data reported here is from the initial extraction of the sample.

The LCS data is outside the QC limits for various compounds. Results from the reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts with the exception that MCPA was not detected in the reextract.

The sample was injected after instrument maintenance and a new calibration. Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported. Reporting limits were raised due to interference from the sample matrix. The DCB surrogate recovery is above the client specified limits of 20-120%, however it is within the laboratory's in-house statistical limits of 45-150%.

| "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis. |                                |            |            |                             |                           |                 |

## General Sample Comments

State of California Lab Certification No. 2501

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

The recoveries of several compounds were outside of QC limits in the LCS. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample.

| reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts with the exception that MCPP was not detected in the reextract.. |                     |                     |              |                             |                           |                 |

The sample was injected after instrument maintenance and a new calibration. Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported. Reporting limits were raised due to interference from the sample matrix.

| "Moisture" represents the loss in weight of the sample after oven drying at 103 - 105 degrees Celsius. The moisture result reported above is on an as-received basis. |                           |                              |                   |                             |                           |                 |

## General Sample Comments

State of California Lab Certification No. 2501

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

| 3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The result reported for 4-methylphenol represents the combined total of both compounds. |                            |                     |              |                             |                           |                 |

The recoveries of several compounds were outside of QC limits in the LCS. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample.

The following compounds were detected in the method blank at the respective concentrations of:

bis(2-ethylhexyl)phthalate 7.6 ug/kg

indeno(1,2,3-cd)pyrene 1.1 ug/kg

dibenz(a,h)anthracene 1.4 ug/kg

benzo(g,h,i)perylene 1.5 ug/kg

These blank values were not subtracted from the analytical results.

The LCS data is outside the QC limits for various compounds. Results from the reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts.

The sample was injected after instrument maintenance and a new calibration.

Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported.

| 3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The result reported for 4-methylphenol represents the combined total of both compounds. |                            |                     |              |                             |                           |                 |

The recoveries of several compounds were outside of QC limits in the LCS. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample.

The following compounds were detected in the method blank at the respective concentrations of:

bis(2-ethylhexyl)phthalate 7.6 ug/kg

indeno(1,2,3-cd)pyrene 1.1 ug/kg

dibenz(a,h)anthracene 1.4 ug/kg

benzo(g,h,i)perylene 1.5 ug/kg

These blank values were not subtracted from the analytical results.

The LCS data is outside the QC limits for various compounds. Results from the reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts.

The sample was injected after instrument maintenance and a new calibration.  
Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported.

| The duplicate moisture value is provided to assess the precision of the moisture test. For comparability purposes, the initial moisture determination is the value used to perform dry weight calculations. |                               |                              |                   |                             |                           |                 |

The LCS data is outside the QC limits for various compounds. Results from the reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts.

The sample was injected after instrument maintenance and a new calibration. Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported.

The LCS data is outside the QC limits for various compounds. Results from the reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts.

The sample was injected after instrument maintenance and a new calibration. Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported.

The recoveries of several compounds were outside of QC limits in the LCS. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample.

| reextraction are within the limits with the exception of dinoseb. Dinoseb recovered at 8%. However, this compound does not recover well with this method. Since the recovery for dinoseb is within our laboratory statistical limits of 0-36%, the data is accepted. The hold time had expired prior to the reextraction therefore, all results are reported from the original extract. Similar results were obtained in both extracts. |                     |                     |              |                             |                           |                 |
| Reporting limits were raised due to interference from the sample matrix.                                                                                                                                                                                                                                                                                                                                                                |                     |                     |              |                             |                           |                 |

The sample was injected after instrument maintenance and a new calibration. Various analytes in the calibration check standards bracketing the sample were outside the acceptance criteria. This effect is attributed to the sample matrix based on our experience with the site, and the data is reported.
