**Recology Hay Road** provides solid waste disposal services to both municipal and commercial customers in the San Francisco Bay Area and the Sacramento Valley.

The site primarily serves Solano County, specifically the cities of Vacaville and Dixon. Primary customers include Vacaville and Dixon Sanitary Services and the California Medical Facility.

The Hay Road Landfill began operation in 1964 and built its first liner system in 1992. It is comprised of 640 acres, 256 of which are permitted as a Class II landfill.

**The Recology facility is permitted to accept the following types of waste:**

- Municipal Solid Waste
- Waste Water Treatment Sludge
- Construction and Demolition Debris
- Green Waste and Food Waste
- Contaminated Soils
- [Friable and Non-Friable Asbestos](#)
- Other Designated Wastes as Approved by Specified Acceptance Criteria

**Printable Material**

The following PDF forms can be printed for easy reference. You will need the free [Acrobat Reader](#) to view these files.

- [Waste Acceptance Criteria](#)
- [Waste Disposal Application](#)

**Waste Water Treatment Sludges**

Waste Water Treatment Sludges are accepted dry or wet. Wet material is stored during the winter months (October through April) in the site's specially designed Class II waste pile. Subsequently, the material is removed from the waste pile, dried and blended with on-site soils, and used as an operations layer in landfill liner construction.

**Asbestos and Other Waste**

[Friable and Non-Friable Asbestos](#) materials are placed in the site's designated inert monocell. Special wastes, including contaminated soils, are also accepted and utilized as refuse cover material. *Special wastes, including waste water treatment sludge, contaminated soils or other designated wastes, are subject to analytical review and must be classified non-hazardous under the state's hazardous waste criteria.*

**Organic Compost**

Learn about the Recology Four Course Compost program at [Jepson Prairie Organics](#).

**Capacity**

The Recology landfill can accept up to 2,400 tons per day and is expected to close in approximately 70 years.

## Friable and Non-Friable Asbestos Disposal

### Asbestos Disposal Process

We accept friable and non-friable asbestos for disposal in the landfill. Friable asbestos is asbestos material that is easily crumbled or reduced to powder.

Once we receive the material at the landfill, friable and non-friable asbestos materials are placed in the site's designated inert monocell.

If you are a contractor or homeowner, we recommend hiring an asbestos abatement company that specializes in asbestos removal. These companies can be found in the Yellow Pages under "Asbestos Abatement." We also strongly recommend hiring an asbestos consultant, independent of the asbestos abatement company, to assure that the work is performed properly and that it is safe to enter the area after the work is completed. Look for these companies in the Yellow Pages under "Asbestos Consulting and Testing."

### Legal Requirements

**For more information about specific requirements, refer to:**

[Bay Area Air Quality Management District Regulation 11, Rule 2](#)

**If you have employees, refer to:**
