

Hydrogeologic Tour of SSFL

Stop 4 – Groundwater Extraction and Treatment System (GETS)

At the fourth stop, tour participants will visit the GETS. Boeing's lead engineer for GETS, Debbie Taege, will point out the various parts of the treatment system and explain the purpose that each serves. Tour participants will have the option of a $\frac{1}{4}$ mile hike to an exposure of the Shear Zone near its junction with the Coca Fault.
