### **Connecticut CHP Economics**

The most important indicators for CHP economics are electricity and gas prices. For most potential CHP installations, natural gas and electricity rates for host facilities will fall within the range of average commercial and industrial prices. Lower energy prices may be possible for large CHP applications.

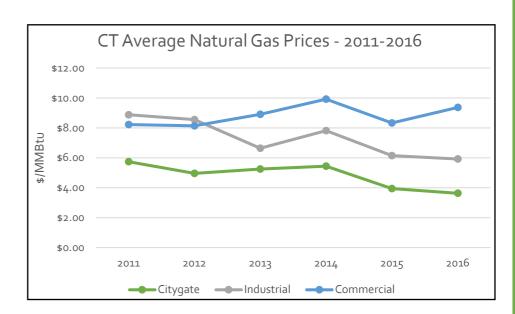

#### Connecticut Natural Gas Prices

#### Connecticut Average Gas Prices - 2016

Sector	CT Price (\$/MMBtu)	U.S. Price (\$/MMBtu)
Citygate*	3.63	3.75
Industrial	5.92	3.39
Commercial	9.37	7.22

Source: U.S. Energy Information Administration, "Natural Gas Prices", https://www.eia.gov/dnav/ng/ng\_pri\_sum\_dcu\_SCT\_a.htm

The EIA industrial natural gas price is a full tariff rate, and most large consumers are purchasing gas commodities from marketers at a lower rate.

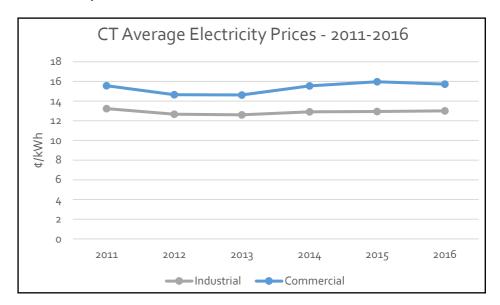

#### **Connecticut Electricity Prices**

#### Connecticut Average Electricity Prices - 2016

Sector	CT Price (¢/kWh)	U.S. Price (¢/kWh)
Industrial	13.02	6.75
Commercial	15.72	10.37

Source: U.S. Energy Information Administration, "Electricity Data Browser", https://www.eia.gov/electricity/data.cfm

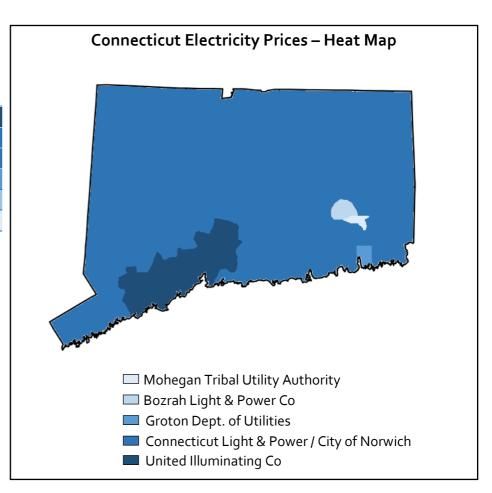

Electricity rates can vary greatly by utility and facility size range. The rates below from EIA represent general averages; individual facility rates may vary.

#### Connecticut Average Delivered Electricity Prices by Utility

Utility	Industrial Price (¢/kWh)	Commercial Price (¢/kWh)	Average Price** (¢/kWh)
United Illuminating Co	18.47	19.03	18.75
Connecticut Light & Power	15.73	17.17	16.45
City of Norwich	15.89	16.83	16.36
Groton Dept. of Utilities	10.96	13.94	12.45
Bozrah Light & Power	6.08	17.59	11.83
Mohegan Tribal Utility	-	9.59	9.59

Source: U.S. Energy Information Administration, "Annual retail price of electricity by utility", https://www.eia.gov/electricity/data.cfm

- \*Citygate is a point or measuring station at which a distributing gas utility receives gas from a NG pipeline company or transmission system.
- \*\*Average of commercial and industrial electricity prices as reported by EIA.

#### **CHP for Resiliency Accelerator**

The U.S. DOE is collaborating with a group of cities, states, and utilities who are actively pursuing CHP as a consideration in resiliency planning for critical infrastructure in their jurisdictions. This has included defining resiliency, identifying critical infrastructure, and assessing CHP opportunities. This process is being documented in a Resiliency Planning Tool. For more information: <a href="CHP for Resiliency Accelerator Website">CHP for Resiliency Accelerator Website</a>.
