**SAVE** MONEY ON UTILITY BILLS

**IMPROVE** THE COMFORT LEVEL OF YOUR HOME

**INVEST** IN THE LONG-TERM VALUE OF YOUR PROPERTY

---

*Learn about energy efficiency, customized recommendations for improvements and a comprehensive list of financial resources and qualified contractors.*

---

## Personalized Home Energy Calculator

MyHomeEQ provides a full analysis of your energy usage and a score that estimates how efficient your home is compared to other homes. With just a few clicks you can learn about the most cost-effective energy efficiency improvements and qualified contractors to perform the work. MyHomeEQ is only available for single family homes in northern Illinois. If you live in a condo or apartment, visit [TheEnergyBills.org](http://TheEnergyBills.org) for additional resources.

## Low-Interest Energy Efficiency Loan

We partner with several local banks and credit unions to provide access to low-interest loans, which can be used for boilers and furnaces, or whole home improvements such as insulation and air sealing. If available incentives won't cover the whole cost of your improvements. These loans can help make up the difference.

## Rebates

Review a comprehensive list of all possible rebates and incentives for energy efficiency improvements, including rebates from all northern Illinois utilities, tax incentives, and promotional offers.

## Expert Contractors

Our participating contractors specialize in home energy efficiency, have been thoroughly reviewed and are licensed and certified as experts. The list includes contractors who take a whole-home approach that will maximize your savings, and heating systems contractors if you need to replace a furnace, boiler or air conditioner.
