American Institute of Architects (AIA)

Project Summary

Timeline:

Start: Oct. 1, 2013

Planned end: Dec. 31, 2014

Key Milestones:

1. Jan. 2014 – expanded AIA 2030 data call
2. Jul. 2014 – AIA SEED
3. Dec. 2014 – Portal Launch

Budget:

Total DOE \$ to date: \$200k

Total future DOE \$: \$100k

Target Market/Audience:

A&E firms

AIA, Architecture2030, LFRT

BTO (impact analysis)

Key Partners:

American Institute of Architects (AIA)
Architecture 2030
AIA 2030 Commitment Working Group
Large Firm Round Table (LFRT)

Project Goals:

- Grow AIA 2030 Commitment program
- Give firms tools for
 - Self-study
 - Benchmarking and target-setting
 - Operational performance tracking (BPD)
 - Asset valuation (Asset Score)
- Quantify impact of simulation in design
 - Limited 2012 data: 12% reduction

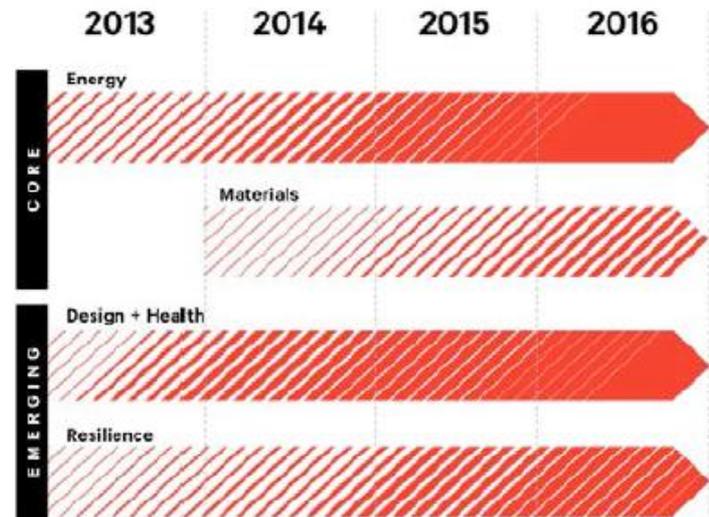

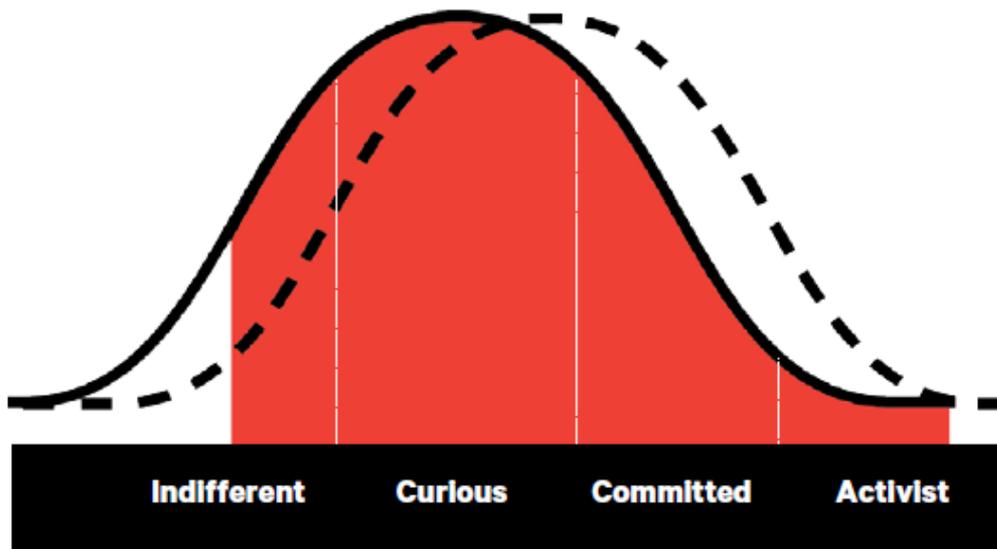

Project Basis: AIA Priorities and Initiatives

- Building on AIA 2030 Commitment Program
- AIA Sustainability Leadership Opportunity Scan (2013)

#1 of 4 CORE Priority Issues is Energy

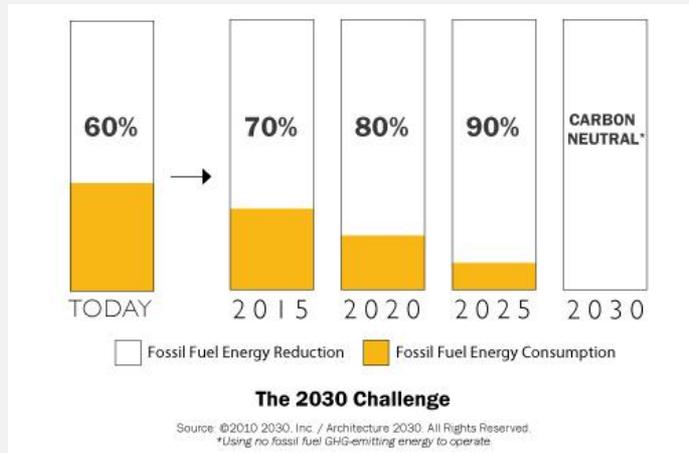

#1 of 7 Priority Trends is a Drive for Measured Performance

OWN AND PROPEL THE BELL

Each issue is at a different place in its evolution. The scan includes a three-year roadmap of priority actions for each issue.

Architecture 2030 and AIA 2030 Commitment

2030 Commitment Goal: Promote Adoption of the AIA 2030 Commitment and reporting and facilitate the Integration of energy benchmarking + energy modeling

Collaboration Partners:

ASHRAE, National Institute of Building Sciences, U.S. Department of Energy and Energy Labs, Architecture 2030, Rocky Mountain Institute, New Buildings Institute

AIA adopts the 2030 Challenge

AIA 2030 Commitment – 2010-2012 Results

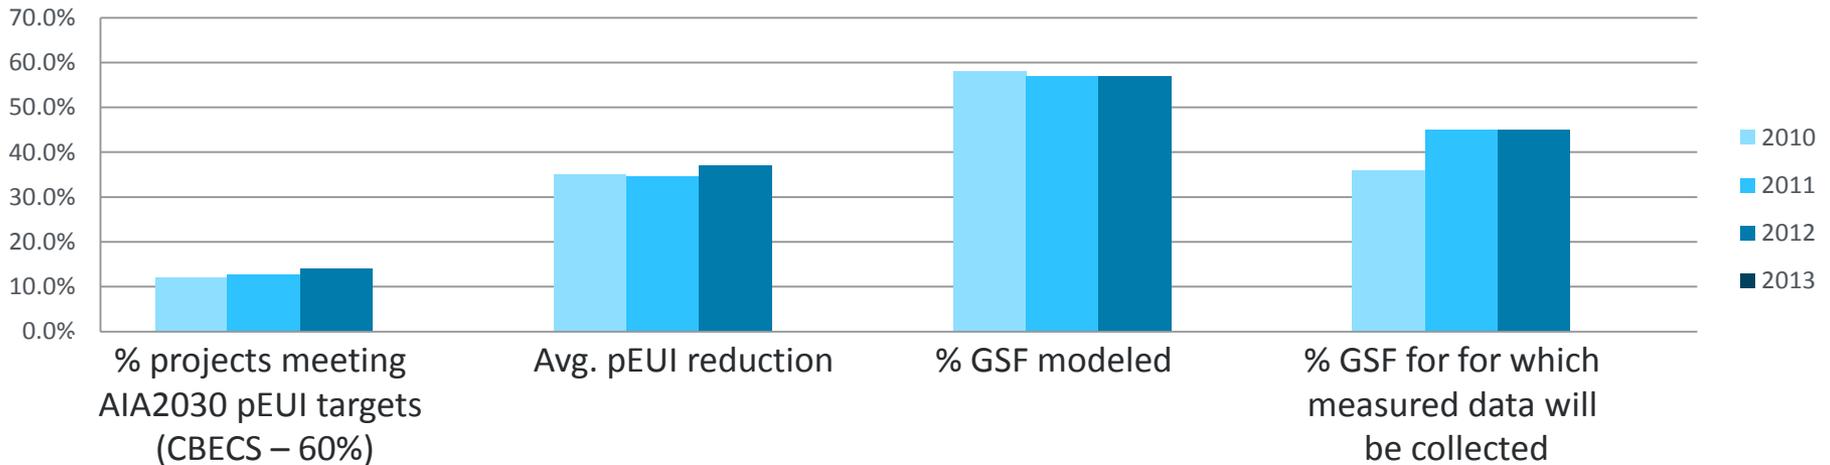

No. of Firms Submitting Data

Total Project Gross S.F. (millions)

Key Yearly Metric Comparisons

Purpose and Objectives

Problem Statement:

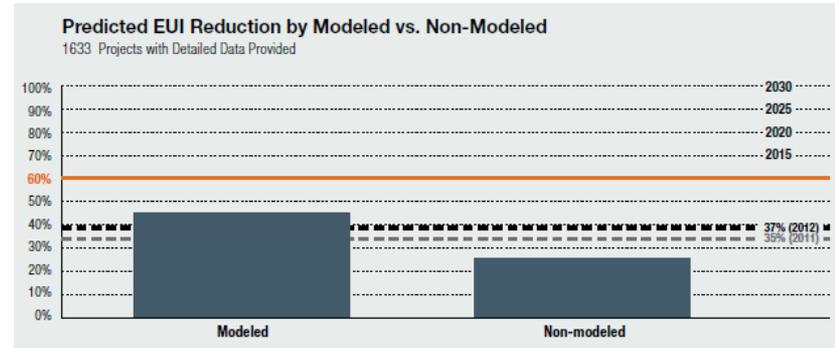

- Make performance tracking and reporting into standard architecture practice.
- Quantify and promote role of simulation-driven high-performance design.

Target Market and Audience:

- Architecture, engineering, and energy consulting firms
- Current AIA 2030 participants: 276 firms, potential participants: 83,000 members

Impact of Project:

- # firms, gsf, gsf meeting 2030 targets
 - Yr 1: Target 25% growth of participating firms
 - Yr 1-3: 200% growth of contributing firms
 - Yr 3+: >500 firms contributing project data + 25 billion s.f. contributed + continued growth

Approach

Approach:

- **Build** on existing AIA 2030 Commitment reporting program
- **Develop** nexus that adds on-going value for firms, AIA, and DOE
- Leverage added value to **expand** participation—set Metcalfe’s Law in motion

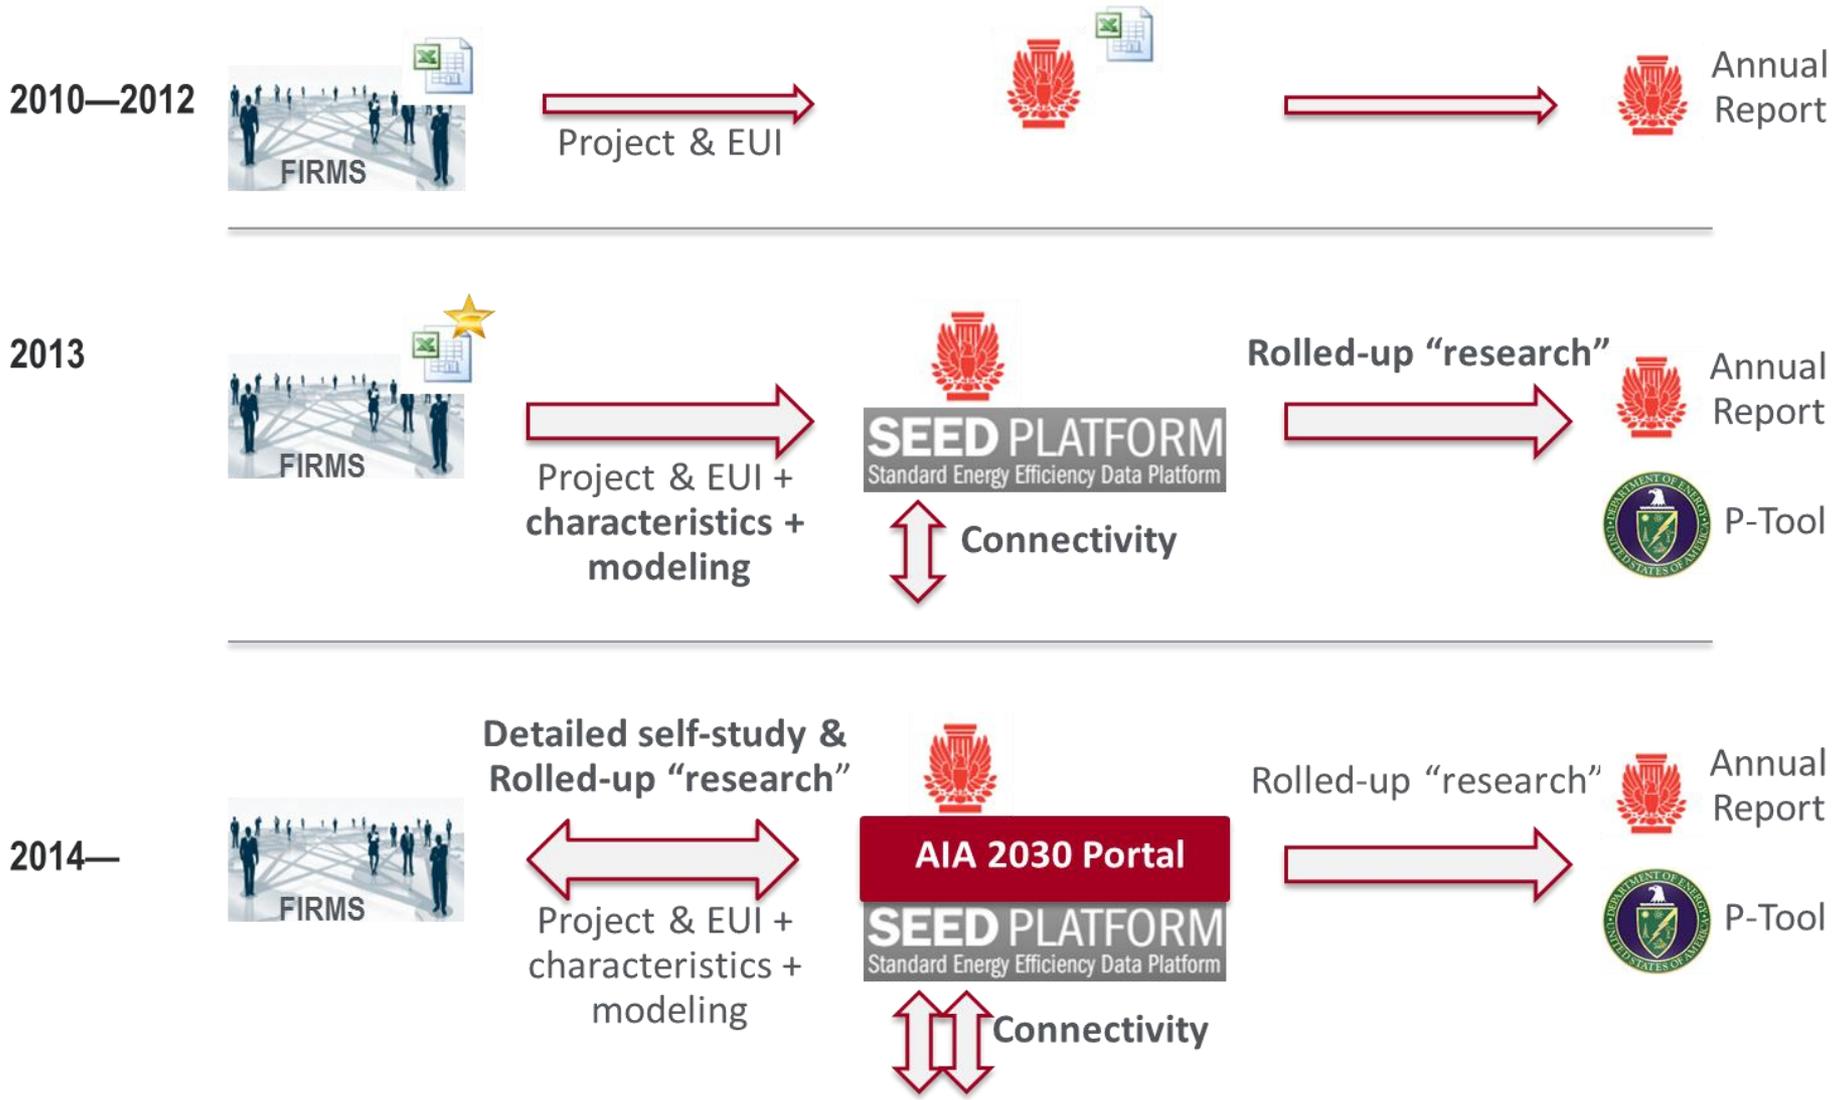

Key Issues:

- SEED timeline and feature set
- Building firm awareness of and engagement with portal project
- Convincing firms to contribute more data before easy-input portal is ready

Distinctive Characteristics:

- Connects A&E firms to benchmarking, valuation, and performance tracking
- Opportunities for expanded AIA engagement (e.g., net-zero energy initiative?)
 - Part of larger AIA / EERE memorandum of understanding
- Building project-level tracking for impact analysis
 - Currently for design performance (“uber goal”) and tool use
 - But could be extended if not too onerous

AIA 2030 Commitment Transition Plan

Phase I (Jan 2014): 2013 Reporting

Updated spreadsheet tool for 2013 reporting round

- Collaborated with AIA & 2030 WG, developed data guide for firms
- Changed from firm-level to project-level reporting
- Added building characteristics enough to get Asset Score & Home Energy Score
 - Initial ask was: location, floor area, lighting power
 - Added basic geometry, envelope, HVAC system types & some ECMs
- Added fields for design stage, modeling tool use, and modeling effort
- Developed tool guide for firms

2013 results: Reporting cycle nearly completed (~90 firms reporting so far)

- Data will be imported into the online tool

Phase II (Jun 2014): AIA 2030 SEED

Create AIA SEED instance; initialize with 2013 accounts & data

- Chose SEED for connectivity: ENERGY STAR Portfolio Manager, etc.
- Expanding SEED 1.1 to handle BPD (Building Performance Database)-type uses
 - SEED 1.0 already supports “organizational” (e.g., firm) record ownership
 - Added query capability and “shared” fields (e.g., gsf and pEUI)
 - Like BPD, query will not return fewer than X records (for anonymity)
 - Upshot: firms can see their own project records in full
 - Upshot: firms can query records of other firms but see only “shared” fields
 - Upshot: AIA and DOE are essentially firms with no records of their own
 - Can only see anonymized rollups

Phase III (Dec 2014): AIA 2030 Commitment Portal

Create online portal for AIA 2030 SEED instance

- Define & refine using dynamic mockups
 - Graphical, software guided entry of project data
 - Standard reports at firm and overall level
 - Flexible queries for self-study & “research”
- API for custom portals
 - Some firms already have these in-house

Progress and Accomplishments

Lessons Learned:

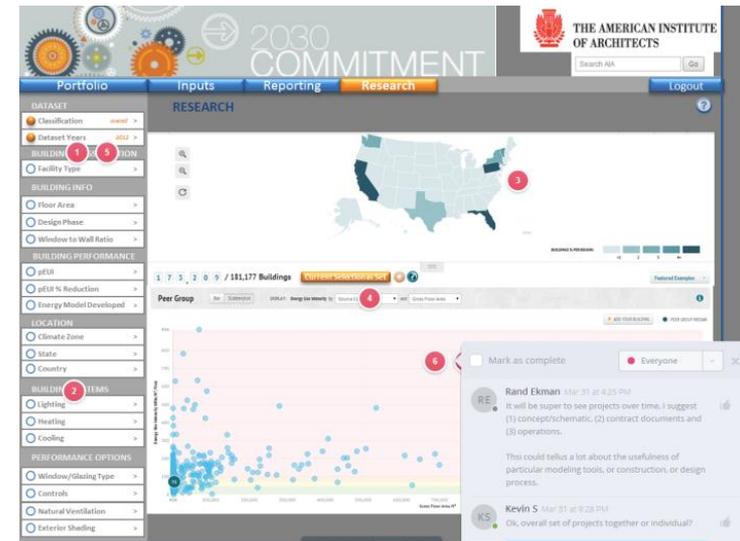

- Firms need to clearly see the value of entering more information per building
- Firms comfortable with sharing some data, but privacy must explicit and right
- Integration takes adaptability, especially when aligning with other projects

Accomplishments:

- Engagement of AIA & AIA 2030 working group
- Updated spreadsheet tool & use guide
- SEED 1.1 specifications
- Portal design mock-ups for review/comment
- Draft of portal functional specification
- Working group identifying firm's value case

Market Impact:

- Portal will be launched Q1 FY15
- Starting to build and maintain groundswell of interest towards launch

Interactive Mock-up for dialog with AIA WG

Value Proposition of More Information and Sharing

Near term: a place to hold & track project data

- “I’m a small firm, I can’t afford a custom project database.”

Near term: “research” capability

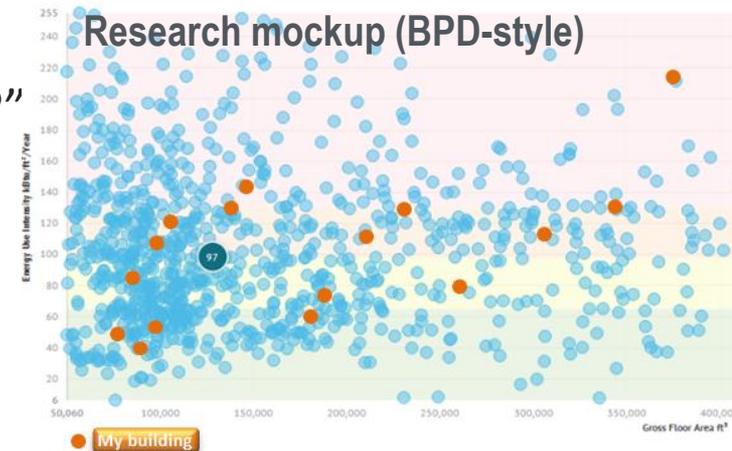

- “How am I doing relative to others? For this building type? In this region?”
- “I’m a large firm, which of my offices are performing better than others?”
- “Which ECMs are incorporated in my lowest-energy projects?”
- “How much has energy modeling help me reduce design EUI?”

Medium term: service connectivity

- “What should the EUI target for this project be?”
- “What is DOE’s Asset Score for this building?”

Medium term: post-occupancy tracking

- “Is this building performing as designed?”

Project Integration and Collaboration

Project Integration:

- Bi-weekly meetings with AIA & AIA 2030 Commitment Working Group
- Aligned with SEED, BPD & Asset Score

Partners, Subcontractors, and Collaborators:

- AIA: Existing program, national deployment, cost-share
- AIA 2030 National Working Group: design input, testing, deployment push
- Architecture 2030
- Subcontractor Sustainable IQ: project management, portal design, deployment
- Subcontractor Building Energy: Phase 1 development (SEED 1.1)
- Subcontractor TBD: Phase 2 development (AIA 2030 Portal)

Communications:

- Presented at Large Firm Roundtable (Nov. 2013)
- Will present at AIA National Convention (Jun. 2013)
- Will present at local/regional AIA events

Outreach and Deployment (Q3, Q4)

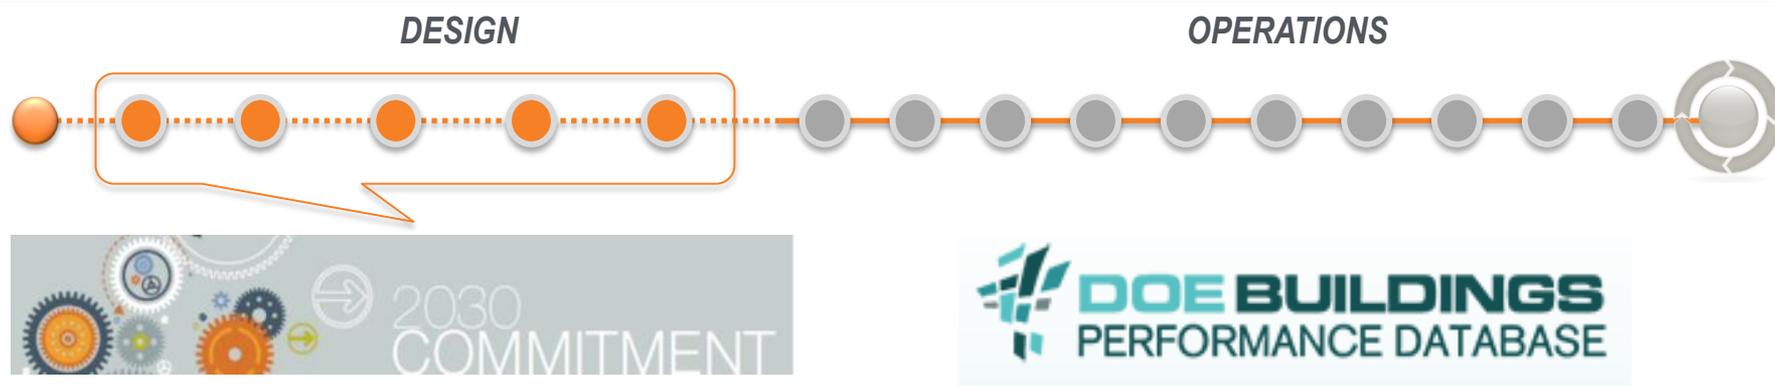

AIA PR Plan for AIA 2030 Commitment Portal Highlights

- AIA National Convention 2014 – workshop, forum, presence on exhibit floor
- Roll-Out of a new online AIA Energy Portal highlighted the 2030 Commitment
- A new 2030 Commitment website
- A new 2030 Commitment member forum
- Local/Regional outreach through Chapters and Working Group
- AIA National Convention 2015 – targeting a showcase

Diverse group for feedback & outreach to other networks

Next Steps and Future Plans

Next steps

- Finalize portal design with AIA & AIA Working Group, select contractor
- Recruit portal sponsors
- Support AIA's efforts to expand program participation

Future

- Integration with residential & commercial Asset Scores ... and firm outreach
- Integration with BPD for post-occupancy feedback ... and firm outreach
- Integration with design & simulation tools for automated project input
- Integration with target-setting tools (beyond Target Finder) ... and firm outreach

Potential future

- Adding DOE recognition for ZNE projects?
- Expanding "2030 Commitment" beyond AIA?

REFERENCE SLIDES

Project Budget

Project Budget: \$200k

Variances: Significant scope adjustments

- Shifted database from EnergyIQ to SEED to align with other DOE efforts.
- Moved project funds to (general) SEED extensions and instance management.
- Moved project funds to portal design. AIA/DOE will fund portal development.

Spend to Date: \$150k

Additional Funding: AIA is recruiting portal sponsors to fund ongoing maintenance and potential expansion

Budget History

FY2013 (past)		FY2014 (current)		FY2015 (planned)	
DOE	Cost-share	DOE	Cost-share	DOE	Cost-share
n.a.	n.a.	\$200k	~\$100k (tbd)	\$100k	~\$100k (tbd)

Project Plan and Schedule

- Project milestones revised to reflect SEED dependence
- Current work includes finalizing prototypes and functional specification for portal using industry feedback, and extending and testing SEED.
- Future work includes developing and testing portal and outreach.

Project Schedule												
Project Start: October 1, 2013			Completed Work									
Projected End: Dec 31, 2014			Active Task (in progress work)
