

Splitting the cycle the right way

Tour Engine, Inc.

Oded Tour, Ph.D. CEO

Poster 19

Efficient, Green, Simple

TourEngine - Key Features

Efficient: Over 55% BTE

Green: CO₂ and NOx reduction

Simple: Reciprocating piston engine

| | |
|-----------------------------|--|
| Unique split-cycle engine | Follows the common 4-stroke cycle dynamics, while incorporating split-cycle merits |
| Superior thermal management | Reducing the cooling and exhaust losses |
| Platform technology | Scalable for a wide variation of power outputs, and adopts state-of-the-art technologies |
