

3. Transfer jurisdiction for the BLM land within the renewed CMAGR to the DoN, which would make the DoN responsible for managing all land within the range in accordance with the Sikes Act until such time that the need for the range may end and it is deactivated and closed (Alternative 3).

The no-action alternative (Alternative 5) would result in the closure of the CMAGR for military training. Selection of this alternative would trigger planning and actions to compensate for the displacement of training from the range and planning and actions for the decommissioning, decontamination and cleanup, and potential reuse of at least portions of the range. The BLM would resume full administrative responsibility for about 226,825 acres of currently withdrawn BLM land, with the possible exception of parcels that the Secretary of the Interior may not be able to accept because of potential expended ordnance contamination. The Secretary of the Navy would be responsible for custodial management of parcels with unacceptable levels of expended ordnance contamination. The Secretary of the Navy would also retain administrative responsibility for about 229,256 acres of DoN land from the closed CMAGR until such time as a portion or all of that land could be transferred to another federal agency, the State of California, or otherwise disposed of through existing GSA authorities and procedures. The State of California holds reversionary rights for about 11,311 acres of DoN land in the CMAGR that were acquired in fee from the State. California also holds some or all mineral rights on an additional 10,981 acres of the DoD land.

Dated: August 24, 2012.

C.K. Chiappetta,

Lieutenant Commander, Office of the Judge Advocate General, U.S. Navy, Federal Register Liaison Officer.
