CX, EA, EIS APPENDIX AND NUMBER:

Description:

- A9** Information gathering (including, but not limited to, literature surveys, inventories, audits), data analysis (including computer modeling), document preparation (such as conceptual design or feasibility studies, analytical energy supply and demand studies), and dissemination (including, but not limited to, document mailings, publication, and distribution; and classroom training and informational programs), but not including site characterization or environmental monitoring.

Covered actions include, but are not limited to: programmed lowering of thermostat settings, placement of timers on hot water heaters, installation of solar hot water systems, installation of efficient lighting, improvements in generator efficiency and appliance efficiency ratings, development of energy-efficient manufacturing or industrial practices, and small-scale conservation and renewable energy research and development and pilot projects. The actions could involve building renovations or new structures in commercial, residential, agricultural, or industrial sectors. These actions do not include rulemakings, standard-settings, or proposed DOE legislation.

Rational for determination:

The State of New Mexico Department of Energy, Minerals, and Natural Resources has signed the DOE SEP Template and will administer their proposed projects within the bounds of the signed SEP NEPA Template. All projects under this program are bounded in compliance with the uploaded and signed SEP Template for Expedited NEPA review.

Any projects that falls outside the scope of the template are conditioned pending further NEPA review.

The projects associated with the NM Department of Energy, Minerals and Natural Resources comprise technical advice, and actions to conserve energy; therefore they are categorized under CX A9, A11, and B5.1.
