ENVIRONMENTAL REVIEW FOR CATEGORICAL EXCLUSION DETERMINATION Rocky Mountain Region, Western Area Power Administration

Holyoke Substation Transformer Replacement Phillips County, Colorado

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (Western) proposes to allow installation of electrical equipment at its Holyoke Substation, located in the Town of Holyoke, Colorado. Western and Highline Electric Association (Highline) are parties to Contract No. 94-LAO-789 for Consolidated Facility Arrangements (CFA) at the substation. Section 11.3 of the CFA allows the parties to perform major repairs, replacements, or modifications for each other upon request.

In order to meet expected higher future demands on the Highline feeders due to load growth, and to provide backup connection to the Town of Holyoke, Highline proposes to replace the existing 14 MVA KY2A transformer with a 33.3 MVA transformer as well as all other necessary equipment. There is no work outside the fenced perimeter of the substation. There are no fluid dispersion routes from the substation as it is located in a topographical low area surrounded by higher ground within the developed town limits.

B. Number and Title of the Categorical Exclusion Being Applied: (See text in 10 CFR Part 1021, Subpart D.)

B4.6 Additions and modifications to transmission facilities:

Additions or modifications to electric power transmission facilities within a previously disturbed or developed facility area. Covered activities include, but are not limited to, switchyard rock grounding upgrades, secondary containment projects, paving projects, seismic upgrading, tower modifications, load shaping projects (such as the installation and use of flywheels and battery arrays), changing insulators, and replacement of poles, circuit breakers, conductors, transformers, and crossarms.

- C. Regulatory Requirements in 10 CFR 1021.410 (b): (See full text in regulation and attached checklist.)
 - 1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
- Have the potential to cause significant impacts on environmentally sensitive resources. An
 environmentally sensitive resource is typically a resource that has been identified as needing
 protection through Executive Order, statute, or regulation by Federal, State, or local
 government, or a federally recognized Indian tribe. An action may be categorically excluded
 if, although sensitive resources are present, the action would not have the potential to cause

significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to, those listed in paragraph B. (4) (see Attachment A).

- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- 3) The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

D. Special Stipulations Pertaining to the Proposal:

If the scope of work of this project changes, Western's Environmental Division must be contacted for additional environmental review.

This Categorical Exclusion is valid for 1 year after the signature date. If construction has not commenced within that time, Western's Environmental Division must be contacted for an updated environmental review prior to construction.

If any cultural materials are discovered during construction, work in the area shall halt immediately, Western Regional Preservation Officer shall be contacted, and the material evaluated by an archaeologist or historian meeting the Secretary of the Interior's Professional Qualification Standards (48 FR 22716, Sept. 1983).

E. <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal

Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in		X	
appendix B to subpart D.			
(b)(2) There are no extraordinary circumstances related to the		X	
proposal that may affect the significance of the environmental			
effects of the proposal, including, but not limited to, scientific			
controversy about the environmental effects of the proposal;		***************************************	
uncertain effects or effects involving unique or unknown risks;		-	
and unresolved conflicts concerning alternate uses of available

(b)(3) The proposal has not been segmented to meet the		X	
definition of a categorical exclusion. Segmentation can occur			
when a proposal is broken down into small parts in order to		***************************************	
avoid the appearance of significance of the total action. The			
scope of a proposal must include the consideration of connected			
and cumulative actions, that is, the proposal is not connected to			
other actions with potentially significant impacts (40 CFR		***************************************	
1508.25(a)(1)), is not related to other actions with individually			
insignificant but cumulatively significant impacts (40 CFR			
1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or §			
1021.211 of this part concerning limitations on actions during			
EIS preparation.		***************************************
