Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination	Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. Rational for determination:

DOE is proposing to provide funding to Evoworx Inc. dba as Energy Savvy to test the impact that the new Home Energy Score (HES) has on a homeowner's likelihood to convert from an in-home audit to retrofit. This study will analyze the impact of the use of HES on various existing home retrofit programs, to quantitatively isolate the conversion rate lift resulting from the introduction of HES. EnergySavvy also intends to test the impact of providing preliminary HES results through a variety of online channels.

Based on review of the project information, DOE has determined the project activities would not have a significant individual or cumulative impact to human health and/or environment. DOE has determined that the work outlined is consistent with the activities identified in Categorical Exclusion A9 Information gathering, analysis, and dissemination and is categorically excluded from further NEPA review.
