Big George Substation Access Road Snow Prevention Park County, Wyoming

- A. Brief Description of Proposal: Western Area Power Administration (Western) proposes to construct a snow fence along its Big George Substation access road located approximately 7 miles southeast of Cody, Wyoming. For a short distance, the substation access roadway is sunken approximately 4 feet below the adjacent ground level. This causes wind driven snow drifts to accumulate in the roadway to a sufficient depth making the road impassable for much of the winter. Western would construct a 4 to 6 foot tall snow fence for approximately 100 yards along the roadway using wood posts and synthetic snow fence material. The fence would be erected on lands administered by the USDI Bureau of Land Management within Western's existing easement for the Big George-Hoodoo Tap 69-kV Transmission Line.
- B. Number and Title of the Categorical Exclusion Being Applied: (See text in 10 CFR Part 1021, Subpart D.)

B1.11 Fencing

Installation of fencing, including, but not limited to, border marking that would not have the potential to significantly impede wildlife population movement (including migration) or surface water flow.

- C. <u>Regulatory Requirements in 10 CFR 1021.410 (b)</u>: (See full text in regulation and attached checklist.)
 - 1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; and
- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to, those listed in paragraph B. (4) (see Attachment A).

Big George Substation Access Road Snow Prevention Park County, Wyoming

- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- 3) The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

D. Special Stipulations Pertaining to the Proposal:

If the scope of work of this project changes, Western's Environmental Division must be contacted for additional environmental review.

This Categorical Exclusion is valid for the 2013 field season after the signature date. If construction has not commenced within that time, Western's Environmental Division must be contacted for an updated environmental review prior to construction.

If any cultural materials are discovered during construction, work in the area shall halt immediately, Western Regional Preservation Officer shall be contacted, and the material evaluated by an archaeologist or historian meeting the Secretary of the Interior's Professional Qualification Standards (48 FR 22716, Sept. 1983).

All equipment used must be cleaned prior to use to prevent transporting of invasive plant or noxious weed seeds.

Date: 6/20/13

E. <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

ATTACHMENT A

Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal

Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in		X	
appendix B to subpart D.		17	
(b)(2) There are no extraordinary circumstances related to the		X	***************************************
proposal that may affect the significance of the environmental			***************************************
effects of the proposal, including, but not limited to, scientific			***************************************
controversy about the environmental effects of the proposal;			***************************************
uncertain effects or effects involving unique or unknown risks;			Advantable
and unresolved conflicts concerning alternate uses of available			
resources.		**	
(b)(3) The proposal has not been segmented to meet the		X	
definition of a categorical exclusion. Segmentation can occur			
when a proposal is broken down into small parts in order to			
avoid the appearance of significance of the total action. The			
scope of a proposal must include the consideration of connected			
and cumulative actions, that is, the proposal is not connected to			
other actions with potentially significant impacts (40 CFR			
1508.25(a)(1)), is not related to other actions with individually			
insignificant but cumulatively significant impacts (40 CFR			
1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or			
§ 1021.211 of this part concerning limitations on actions during			
EIS preparation.			TT 1
B. Conditions that are Integral Elements of the Classes of	NO	YES	Unknown
Actions in Appendix B.	77		
(1) Threaten a violation of applicable statutory, regulatory, or	X		
permit requirements for environment, safety and health, or			
similar requirements of DOE or Executive Orders;			
(2) Require siting and construction or major expansion of waste	X		
storage, disposal, recovery, or treatment facilities (including			
incinerators), but the proposal may include categorically			
excluded waste storage, disposal, recovery, or treatment			
actions or facilities;	,		
(3) Disturb hazardous substances, pollutants, contaminants, or	X		WATER CONTROL OF THE
CERCLA-excluded petroleum and natural gas products that			лагачения
preexist in the environment such that there would be			
uncontrolled or unpermitted releases;			
(4) Have the potential to cause significant impacts on	X		
environmentally sensitive resources. An environmentally			
sensitive resource is typically a resource that has been			
identified as needing protection through Executive Order,	<u> </u>		

Big George Substation Access Road Snow Prevention Park County, Wyoming

statue, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause			
significant impacts on those resources (such as construction			
of a building with its foundation well above a sole-source	***		
aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but	-		
are not limited to:			
(i) Property (such as sites, buildings, structures, and	X		
objects) of historic, archaeological, or architectural			
significance designated by a Federal, State, or local			
government, or property determined to be eligible for			
listing on the National Register of Historic Places;		<u> </u> 	
 (ii) Federally-listed threatened or endangered species or their habitat (including critical habitat) or federally proposed or candidate species or their habitat (Endangered Species Act); state-listed or state-proposed endangered or threatened species or their habitat; Federally-protected marine mammals and Essential Fish Habitat (Marine Mammal Protection Act; Magnuson-Stevens Fishery Conservation and Management Act); and otherwise federally-protected species (such as under the Bald and Golden Eagle Protection Act or the Migratory Bird Treaty Act); (iii) Floodplains and wetlands (as defined in 10 CFR 1022.4, — Compliance with Floodplain and Wetland 	X		
Environmental Review Requirements: "Definitions," or			
its successor);			
(iv) Areas having a special designation such as federally- and state-designated wilderness areas, national parks, national monuments, national natural landmarks, wild and scenic rivers, State and Federal wildlife refuges, scenic areas (such as National Scenic and Historic Trails or National Scenic Areas), and marine sanctuaries;	X		
(v) Prime or unique farmland, or other farmland of statewide or local importance, as defined at 7 CFR 658.2(a), — Farmland Protection Policy Act: Definitions, or its successor;	X		
(vi) Special sources of water (such as sole-source aquifers, wellhead protection areas, and other water sources that are vital in a region); and	X		
(vii) Tundra, coral reefs, or rain forests; or	X		

Big George Substation Access Road Snow Prevention Park County, Wyoming

(5) Involve genetically engineered organisms, synthetic biology,	X		
governmentally designated noxious weeds, or invasive		-	
species, unless the proposed activity would be contained or		<u> </u>	
confined in a manner designed and operated to prevent			
unauthorized release into the environment and conducted in			
accordance with applicable requirements, such as those of			
the Department of Agriculture, the Environmental Protection			
Agency, and the National Institutes of Health.
