Proposed Action Title: Sonora Substation - Install Antenna Pole

Program or Field Office: Western Area Power Administration/ Desert Southwest Region

Location(s) (City/County/State): Yuma, Yuma County, Arizona

Proposed Action Description:

Western proposes to install a new 50-foot-tall communications antenna pole at Sonora Substation. The monopole would be placed inside the existing substation fence next to the existing control building. The Pole foundation would measure 30 inches in diameter and extend six feet deep. The pole would be grounded and have a lightning rod on top. Western would install a waveguide structure to carry cables from the pole to the building. Western would drill a hole in the control building's outer wall so that the cables can reach the communications equipment inside; Western tested the wall materials in June 2015 and asbestos containing material were absent. Most construction equipment would set up inside the substation fence. If a crane is needed, it would set up outside the fence in an area that was previously bladed. The purpose of the work is to ensure the safety and reliability of the bulk electric system. Western needs avoid the interference experienced by the existing equipment.

Western plans to begin work in either Fall 2015 or Winter 2016.

The action is located south of Yuma in Yuma County, Arizona. It occurs within portions of Section 14 in Township 11 South, Range 23 West on the Gila and Salt River Baseline and Meridian. Western was granted a right-of-way from the Bureau of Land Management, and Bureau of reclamation currently manages the land.

Special Conditions: See Attached

Categorical Exclusion(s) Applied:

B1.19 - Microwave, meteorological, and radio towers

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

✓ The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

NEPA Compliance Officer:

Date Determined: 7-20./

## Categorical Exclusion Determination Form – Continuation Sheet

#### **Special Conditions:**

### **Biology**

- 1) The construction contractor shall participate in an environmental awareness training prior to starting fieldwork.
- 2) If construction equipment will be set up or equipment or materials stored in undisturbed habitat, Western will conduct a pre-construction survey for flat-tailed horned lizard and have a biological monitor present during construction.

#### Cultural

3) In the event of archaeological discoveries or discoveries of human remains during the action, activities must cease in the immediate vicinity of the discovery and Western's Environmental Manager (602 605 2524) and Regional Preservation Officer (303 328 1779) must be notified immediately.

## Project Location Map:

Checklist for Categorical Exclusion Determination, revised Nov. 2011

Checklist for Categorical Exclusion Determination, revised Nov.			
Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in		X	
appendix A or B to subpart D.			
(b)(2) There are no extraordinary circumstances related to the		X	
proposal that may affect the significance of the environmental effects			
of the proposal, including, but not limited to, scientific controversy			
about the environmental effects of the proposal; uncertain effects or			
effects involving unique or unknown risks; and unresolved conflicts			
concerting alternate uses of available resources			
(b)(3) The proposal has not been segmented to meet the definition of		X	
a categorical exclusion. Segmentation can occur when a proposal is		11	
broken down into small parts in order to avoid the appearance of			
significance of the total action. The scope of a proposal must include			
the consideration of connected and cumulative actions, that is, the			
proposal is not connected to other actions with potentially significant			
impacts (40 CFR 1508.25(a)(1), is not related to other actions with			
individually insignificant but cumulatively significant impacts (40			
CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or §			
1021.211 of this part concerning limitations on actions during EIS			
preparation.			
B. Conditions that are Integral Elements of the Classes of Actions	NO	YES	UNKNOWN
in Appendix B. :	Lyman Stan		
(1) Threaten a violation of applicable statutory, regulatory, or permit	X		
requirements for environment, safety and health, or similar			
requirements of DOE or Executive Orders.			
(2) Require siting and construction or major expansion of waste	X		
storage, disposal, recovery, or treatment facilities (including			
incinerators), but the proposal may include categorically excluded			
waste storage, disposal, recovery, or treatment actions or			
facilities;			
(3) Disturb hazardous substances, pollutants, contaminants, or	X		
CERCLA-excluded petroleum and natural gas products that			
preexist in the environment such that there would be uncontrolled			
or unpermitted releases;			
(4) Have the potential to cause significant impacts on	X		
environmentally sensitive resources. An environmentally	A		
sensitive resource is typically a resource that has been identified			
as needing protection through Executive Order, statue, or			
regulation by Federal, state, or local government, or a federally			
recognized Indian tribe. An action may be categorically excluded			
if, although sensitive resources are present, the action would not			
have the potential to cause significant impacts on those resources			
(such as construction of a building with its foundation well above			
a sole-source aquifer or upland surface soil removal on a site that			
has wetlands). Environmentally sensitive resources include, but			
are not limited to:	1		
(i) Property (such as sites, buildings, structures, and objects) of	X		
historic, archaeological, or architectural significance			
designated by a Federal, state, or local government, or			

	property determined to be eligible for listing on the National			
· · · · ·	Register of Historic Places;	V		
(ii)	Federally-listed threatened or endangered species or their	X		
	habitat (including critical habitat) or Federally- proposed			
	or candidate species or their habitat (Endangered Species			
	Act); state-listed or state-proposed endangered or			
	threatened species or their habitat; Federally-protected			
	marine mammals and Essential Fish Habitat (Marine			
	Mammal Protection Act; Magnuson-Stevens Fishery			
	Conservation and Management Act); and otherwise			
	Federally-protected species (such as under the Bald and		25	
	Golden Eagle Protection Act or the Migratory Bird Treaty			520
	Act);			G 1.41
(iii)	Floodplains and wetlands (as defined in 10 CFR 1022.4,	X		
	—Compliance with Floodplain and Wetland			
	Environmental Review Requirements: "Definitions," or its			
	successor);			=
(iv)	Areas having a special designation such as Federally- and	X		
	state-designated wilderness areas, national parks, national			
	monuments, national natural landmarks, wild and scenic			
	rivers, state and Federal wildlife refuges, scenic areas			
	(such as National Scenic and Historic Trails or National			
	Scenic Areas), and marine sanctuaries;			
(v)	Prime or unique farmland, or other farmland of statewide	X		
	or local importance, as defined at 7 CFR 658.2(a),			
	—Farmland Protection Policy Act: Definitions,    or its			
	successor;			
(vi)	Special sources of water (such as sole-source aquifers,	X		
	wellhead protection areas, and other water sources that are			
	vital in a region); and			
(vii)	Tundra, coral reefs, or rain forests.; or	X		
(5) In	volve genetically engineered organisms, synthetic biology,	X		
	overnmentally designated noxious weeds, or invasive species,			
un	aless the proposed activity would be contained or confined in			
I	manner designed and operated to prevent unauthorized			l 
	lease into the environment and conducted in accordance with			
ap	plicable requirements, such as those of the Department of			
	griculture, the Environmental Protection Agency, and the			
	ational Institutes of Health.
