Curecanti - Crystal 115-kV Transmission Line Vegetation Management, Task Order No. 103, Herbicide Treatment Montrose County, Colorado *Project No. 2016-030*

- A. <u>Brief Description of Proposal</u>: Western Area Power Administration (Western) proposes to survey and inspect the Curecanti Crystal (CCI-CRY) 115-kV Transmission Line and conduct herbicide treatment of scrub oak stumps, saplings, suckers, and noxious weeds that have emerged since the 2013 danger tree management project. The 2013 treatments in these areas were designed to remove incompatible species, reduce wildfire fuel loading, clear around structures, and encourage more compatible plant communities over the long-term. The proposed work is needed to continue monitoring these areas after the primary treatment to control the re-emergence of previously treated vegetation. This is a continuation of monitoring and treatment from 2015. This Categorical Exclusion (CX) covers only herbicide treatment of noxious weeds and scrub oak on private property within Western's right-of-way (ROW) along the CCI-CRY 115-kV Transmission Line. This includes only Structures 4/7 to 10/2. No danger tree or sagebrush removal or treatment is authorized. Herbicide treatment crews will consist of two to five persons. All travel will be confined to existing ROW and access roads. Only rubber-tired vehicles will be used.
- B. Number and Title of the Categorical Exclusion Being Applied: (See text in 10 CFR Part 1021, Subpart D.)

B1.3. Routine Maintenance.

Routine maintenance activities and custodial services for buildings, structures, rights-of-way, infrastructures (including, but not limited to, pathways, roads, and railroads), vehicles and equipment, and localized vegetation and pest control, during which operations may be suspended and resumed, provided that the activities would be conducted in a manner in accordance with applicable requirements. Custodial services are activities to preserve facility appearance, working conditions, and sanitation (such as cleaning, window washing, lawn mowing, trash collection, painting, and snow removal). Routine maintenance activities, corrective (that is, repair), preventive, and predictive, are required to maintain and preserve buildings, structures, infrastructures, and equipment in a condition suitable for a facility to be used for its designated purpose. Such maintenance may occur as a result of severe weather (such as hurricanes, floods, and tornados), wildfires, and other such events. Routine maintenance may result in replacement to the extent that replacement is in-kind and is not a substantial upgrade or improvement. In-kind replacement includes installation of new components to replace outmoded components, provided that the replacement does not result in a significant change in the expected useful life, design capacity, or function of the facility. Routine maintenance does not include replacement of a major component that significantly extends the originally intended useful life of a facility (for example, it does not include the replacement of a reactor vessel near the end of its useful life). Routine maintenance activities include, but are not limited to:

- (a) Repair or replacement of facility equipment, such as lathes, mills, pumps, and presses;
- (b) Door and window repair or replacement;
- (c) Wall, ceiling, or floor repair or replacement;
- (d) Reroofing;
- (e) Plumbing, electrical utility, lighting, and telephone service repair or replacement;
- (f) Routine replacement of high-efficiency particulate air filters;

Curecanti - Crystal 115-kV Transmission Line Vegetation Management, Task Order No. 103, Herbicide Treatment Montrose County, Colorado *Project No. 2016-030*

- (g) Inspection and/or treatment of currently installed utility poles;
- (h) Repair of road embankments;
- (i) Repair or replacement of fire protection sprinkler systems;
- (j) Road and parking area resurfacing, including construction of temporary access to facilitate resurfacing, and scraping and grading of unpaved surfaces;
- (k) Erosion control and soil stabilization measures (such as reseeding, gabions, grading, and revegetation);
- (1) Surveillance and maintenance of surplus facilities in accordance with DOE Order 435.1, "Radioactive Waste Management," or its successor;
- (m) Repair and maintenance of transmission facilities, such as replacement of conductors of the same nominal voltage, poles, circuit breakers, transformers, capacitors, crossarms, insulators, and downed powerlines, in accordance, where appropriate, with 40 CFR part 761 ("Polychlorinated Biphenyls Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions") or its successor;
- (n) Routine testing and calibration of facility components, subsystems, or portable equipment (such
 as control valves, in-core monitoring devices, transformers, capacitors, monitoring wells,
 lysimeters, weather stations, and flumes);
- (o) Routine decontamination of the surfaces of equipment, rooms, hot cells, or other interior surfaces of buildings (by such activities as wiping with rags, using strippable latex, and minor vacuuming), removal of contaminated intact equipment and other materials (not including spent nuclear fuel or special nuclear material in nuclear reactors); and
- (p) Removal of debris.

C. <u>Regulatory Requirements in 10 CFR 1021.410 (b)</u>: (See full text in regulation and attached checklist.)

1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded

Curecanti - Crystal 115-kV Transmission Line Vegetation Management, Task Order No. 103, Herbicide Treatment Montrose County, Colorado *Project No. 2016-030*

if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to, those listed in paragraph B. (4) (see Attachment A).

- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- 3) The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

D. Special Stipulations Pertaining to the Proposal:

If the scope of work of this project changes, Western's Environmental Division must be contacted for additional environmental review.

This CX expires one year from the signature date. If all project work has not been completed by the expiration date, or if need for an environmental compliance extension is anticipated, Western's Environmental Division must be contacted for an updated environmental review.

If any cultural resources are inadvertently discovered during implementation of the proposed action, work within 50 feet of the discovery area shall halt immediately, Western's archaeologist shall be contacted, and the resource shall be evaluated by an archaeologist or historian who meets the Secretary of the Interior's Professional Qualification Standards (36 CFR Part 61). Work in the area of discovery may not resume until notification is provided by Western's archaeologist.

To avoid sensitive species, no work under this CX is authorized from the Curecanti Substation to Structure 4/7 of the Curecanti - Crystal Transmission Line. In addition, no danger tree or sagebrush removal or herbicide treatment is authorized under this CX.

The contractor must be licensed to apply herbicides in the State of Colorado and must follow all applicable federal, state, and local laws, regulations, and guidelines. The contractor will use only EPA-registered pesticides, will follow all applicable label directions, and will use pesticides appropriate to the management area.

To minimize impacts to the environment and prevent damage to access roads, operation of off-road equipment will not be permitted during periods of heavy rains, when soils are wet, or when excessive soil damage may occur due to unsuitable operating conditions. No maintenance activities shall be performed during periods when the soil is too wet to adequately support equipment. If equipment creates ruts in excess of 6 inches deep, the soil shall be deemed too wet to adequately support the equipment.

Curecanti - Crystal 115-kV Transmission Line Vegetation Management, Task Order No. 103, Herbicide Treatment Montrose County, Colorado Project No. 2016-030

Western has a clean vehicle policy and all equipment used must be cleaned prior to use in order to prevent transportation of invasive plant or noxious weed seeds. Operators will be required to wash all machinery (trailers, trucks, skid steer loaders, etc.) before entering the action area and working on the project to prevent transport of non-native invasive species within the transmission line corridor.

The contractor or Western will notify the landowners before proceeding with work.

E. <u>Determination:</u> Based on my review of information provided to me and in my possession concerning the proposed action, I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

Date: 22 APRIL 2016

ATTACHMENT A

Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal

Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in appendix B to subpart D.		X	
(b)(2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal, including, but not limited to, scientific		X	:
controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternate uses of available resources.			
(b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other		Х	
actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation. B. Conditions that are Integral Elements of the Classes of	NO	YES	Unknown
Actions in Appendix B.	710	LLO	
(1) Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety and health, or similar requirements of DOE or Executive Orders.	X		
(2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;	X		
(3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;	Х		
(4) Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified	X

Rocky Mountain Region, Western Area Power Administration

Curecanti - Crystal 115-kV Transmission Line Vegetation Management, Task Order No. 103, Herbicide Treatment Montrose County, Colorado Project No. 2016-030

as needing protection through Executive Order, statue, or			
regulation by Federal, state, or local government, or a federally			
recognized Indian tribe. An action may be categorically			
excluded if, although sensitive resources are present, the action			
would not have the potential to cause significant impacts on	:	-	
those resources (such as construction of a building with its		:	
foundation well above a sole-source aquifer or upland surface			
soil removal on a site that has wetlands). Environmentally			
sensitive resources include, but are not limited to:			
(i) Property (such as sites, buildings, structures, and objects) of	X		
historic, archaeological, or architectural significance		1	
designated by a Federal, state, or local government, or			
property determined to be eligible for listing on the National			
Register of Historic Places;			
(ii) Federally-listed threatened or endangered species or their	X		-
habitat (including critical habitat) or Federally- proposed or			
candidate species or their habitat (Endangered Species Act);			
state-listed or state-proposed endangered or threatened			
species or their habitat; Federally-protected marine			
mammals and Essential Fish Habitat (Marine Mammal			
Protection Act; Magnuson-Stevens Fishery Conservation			
and Management Act); and otherwise Federally-protected		1	
species (such as under the Bald and Golden Eagle			
Protection Act or the Migratory Bird Treaty Act);			
(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4,	X		
—Compliance with Floodplain and Wetland Environmental			
Review Requirements: "Definitions," or its successor);		1	:
(iv) Areas having a special designation such as Federally- and	X		
state-designated wilderness areas, national parks, national			
monuments, national natural landmarks, wild and scenic	•		
rivers, state and Federal wildlife refuges, scenic areas (such]	
as National Scenic and Historic Trails or National Scenic			
Areas), and marine sanctuaries;			
(v) Prime or unique farmland, or other farmland of statewide or	X		
local importance, as defined at 7 CFR 658.2(a), —Farmland	7.		
Protection Policy Act: Definitions, or its successor;			
(vi) Special sources of water (such as sole-source aquifers,	X		
wellhead protection areas, and other water sources that are	44		
vital in a region); and	.		
(vii) Tundra, coral reefs, or rain forests; or	X		
(11) 1 diluta, cotai 10013, or rain 1010313, or	Λ.		

Curecanti - Crystal 115-kV Transmission Line Vegetation Management, Task Order No. 103, Herbicide Treatment Montrose County, Colorado Project No. 2016-030

(5) Involve genetically engineered organisms, synthetic biology,	X		
governmentally designated noxious weeds, or invasive species,			1
unless the proposed activity would be contained or confined in a			1
manner designed and operated to prevent unauthorized release			-
into the environment and conducted in accordance with			
applicable requirements, such as those of the Department of			
Agriculture, the Environmental Protection Agency, and the			
National Institutes of Health.	:
