

RECORD OF CATEGORICAL EXCLUSION DETERMINATION

Project ID No.: 10105615

Title: Leak Remediation Work

Description: The subcontractor shall preform leak remediation work under cavern pressures with hydrocarbons present. The surface cavern oil well pressures range from 800 psi to 2000 psi. Therefore, pressure control equipment is required to run tools downhole into the wellbore to depths ranging from 2000 ft to 3000 ft. Properly sized hoisting equipment is required for remedial lifting operations. All equipment must be properly and safely rigged up, connected, pressure tested, and rigged down. The remediation will be performed on either a rigged or rig-less well pad.
