As part of my overall assessment of SRNS's performance, I note that senior management engagement and use of corporate reach-back assets to improve schedule performance on the Waste Solidification Building (WSB) were a step in the right direction. However, I am disappointed that SRNS did not obtain certification of the Earned Value Management System, which NNSA relies upon as a critical tool for evaluating project performance against approved baselines. Ultimately, the on-going concern with cost overruns resulted in no fee awarded for WSB performance and a reduction in scoring for PO-4 and PO-5.
