ANNOUNCEMENT TO POTENTIAL OFFERORS

Status of Savannah River Site Management and Operating Request for Proposals

NNSA has elected to seek alternative solutions for performance of the Savannah River Plutonium Processing Facility (SRPPF) project through the upcoming RFP. Accordingly, prospective offerors will be requested to submit a technical approach for the project to accelerate completion.

As a result of this change, the RFP may be updated to:

- Adjust the SRPPF fee structure to reflect this change in approach;
- Designate SRPPF Key Personnel positions;
- Adjust instructions and evaluation criterion related to the Technical Approach factor to ensure that NNSA's evaluation appropriately captures NNSA's needs related to the SRPPF project; and
- Adjust the instructions and evaluation criterion related to Past Performance to ensure that NNSA's evaluation appropriately captures NNSA's need for experience with projects relevant to the SRPPF project.

RFP release is anticipated in Q2 of FY26.

Other information for prospective Offerors:

- NNSA will also post relevant documents for this competition on its contract competition website at <https://www.energy.gov/nnsa/savannah-river-site-management-and-operating-mo-contract-competition>.
- NNSA anticipates that it may hold an on-site walkthrough of the SRPPF project early in the proposal period. If applicable, information on this facility walkthrough would be released with the final RFP.
