

Weapons-Usable Nuclear Material Minimization

The Office of Nuclear Material Removal eliminates excess weapons-usable nuclear material (highly enriched uranium and separated plutonium) worldwide to achieve permanent threat reduction

As of May 2021, The Office of Nuclear Material Removal has removed or confirmed the disposition of over 7,225 kilograms of weapons-usable nuclear material, enough for approximately 320 nuclear weapons

Eliminated all weapons-usable nuclear material
(defined as less than 1 kilogram of material remaining)

Eliminated some weapons-usable nuclear material
