Re: Northern Pass

I do NOT want to have the Towers of Northern Pass for many reasons. I do not want to see them. More importantly, this state is a jewel of natural beauty - our trees, our hills and mountains and lakes are glorious in any season. A major source of income in this state comes from tourism → from people who come here to share our Bounty. These are people who probably come from industrialized states who have destroyed in great part their own aesthetics as they have developed their industry and expanded their cities and ex-urbs. They come here and spend their money here as they seek the relief of "getting back to Nature." Those Towers will be a blight to our vistas and to our eyes. And our souls.

Whatever jobs they may create, they will harm NH and ultimately the USA. If these Towers are allowed, to further \$ to corporate interests, then the USA, the Nation, will be destroying a National Treasure.

Sincerely,

Paula Van de Werken
